**PERAKUAN KERJA KERTAS PROJEK  
(Certification of Project Paper)**

Saya, yang bertandatangan, memperakukan bahawa  
(I, the undersigned, certify that)

**MOHD TAUFIK BIN ALIAS**

calon untuk Ijazah  
(candidate for the degree of) Sarjana Sains (Teknologi Maklumat)

telah mengemukakan kertas projek yang bertajuk  
(has presented his/her project paper of the following title)

**AKADEMI INFOTECH MARA (AIMAS) INTRANET LEARNING PORTAL**

seperti yang tercatat di muka surat tajuk dan kulit kertas projek  
(as it appears on the title page and front cover of project paper)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan,  
dan meliputi bidang ilmu dengan memuaskan.  
(that the project paper acceptable in form and content, and that a satisfactory  
knowledge of the field is covered by the project paper).

Nama Penyelia  
(Name of Supervisor) : En. Ariffin bin Abd. Mutalib

## **PERMISSION TO USE**

In presenting this project in partial fulfillment of the requirements for a post-graduate degree from Universiti Utara Malaysia, I agree that the University Library may take it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or, in absence, by Dean of the Graduate School. It is understood that any copying or publication or use of this project or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due to recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for my permission to copy or to make other use of materials in this project, in whole or in part, should be addressed to:

Dean of Graduate School

Universiti Utara Malaysia

Kedah Darul Aman

## **ABSTRAK**

Sistem pembelajaran secara elektronik (E-Learning) adalah salah satu teknik pembelajaran yang semakin diminati dan berkembang pesat di institusi-institusi pendidikan terutamanya di peringkat tinggi seperti universiti dan kolej. E-Learning dibangun dan dilaksanakan dalam bentuk aplikasi web kerana banyak faedah yang diperolehi dengan menggunakan aplikasi web.

Tujuan prototaip portal E-Learning ini dibangunkan adalah untuk mengurangkan penggunaan kertas, menjalinkan hubungan baik antara pensyarah, pentadbiran dan pelajar Akademi Infotech MARA, Alor Setar (AIMAS), mempermudahkan pembelajaran dan penyebaran maklumat daripada para pensyarah.

Metodologi yang digunakan untuk pembangunan prototaip system ini adalah Rapid Application Development (RAD) yang terdiri daripada empat fasa iaitu analisis, rekabentuk, pembangunan dan perlaksanaan. Pengkalan data yang digunakan untuk membina system ini adalah MySQL dan PHP sebagai bahasa pengaturcaraan. Pelayan (server) yang digunakan adalah Apache Server dan web ini boleh dicapai dengan menggunakan browser Internet Explorer 6.0. Faedah yang boleh diperolehi daripada portal ini adalah pengguna boleh menggunakanannya di mana-mana sahaja di dalam bangunan AIMAS. Dengan wujudnya portal ini, pensyarah boleh menjimatkan masa dan kos untuk menyebarkan maklumat, nota, kuiz, tugasan dan projek kepada pelajar.

## **ABSTRACT**

Electronic Learning (E-Learning) is one of the studying techniques, which is growing rapidly in the higher institution such as universities and colleges. E-Learning is developed and implemented through the web application form as it is beneficial while using it.

The progress of developing E-Learning portal. are to reduce paper consumption, develop good relationship and networking among lecturers, administration staff and students of Akademi Infotech MARA Alor Setar (AIMAS), simplify the learning and disseminating of knowledge/information by the lecturer.

Methodology used in developing the prototype system is Rapid Application Development (RAD), which comprises of 4 phases such as analysis, design, development and implementation. Database used to develop the system is MySQL with PHP programming language. Apache server is used as the server to run the system and Internet Explorer 6.0 as a web browser of the system. The benefit could be acquired by using this portal is users may apply it at anywhere in AIMA'S building. Through the creation of this portal, lecturer would be able to reduce cost and time consumption in providing notes, quizzes, information and project to students.

## **ACKNOWLEDGEMENT**

Alhamdulillah, thanks to Allah SAW that finally this project was finally complete. I would like to acknowledge the following person whose support has been very significant in ensuring the successful completion of this project. First and foremost, I would like to express my appreciations to my supervisor Mr. Ariffin Abdul Mutalib for his supervision of the project. His ideas and guidance have been enormous help throughout the process of this project.

I also would like to thank my colleagues at Akademi Infotech Mara Alor Setar (AIMAS) especially Mr. Mohamed Mahatir Khairuzzaman, my friend Mr. Hazizul Zamrud and my friends around ASEAN who joint the Computer and Network Administration Training Center for their knowledge sharing in developing this project.

Finally I wish to thank my family especially my wife for their continuous support, understanding and encouragement until this project has finally finish. I am indeed very grateful to have all of you around me thus give me courage and energy to complete this project.

## **CHAPTER ONE**

### **PROJECT OVERVIEW**

This project is to fulfill upon the request of course Thesis/Project (TZ6996) as one of the graduation requirements for Master Science in Information Technology (MSc. IT) in Universiti Utara Malaysia. The purpose of this project is to generate a model or prototype of Akademi Infotech MARA Alor Setar (AIMAS) Intranet Learning Portal.

This chapter gives an overview of organization, problem statement, project objectives, scope and project significant.

#### **1.1 Introduction**

*“Everything I need is in one place. I can find what I need when I need it without having to wait on an email reply, walk around looking for someone, or search through gigabytes of information of the internet. Plus after working through difficult situations, I can post my lessons learned on the site so my colleague can learn from my experience”* say Mike Pusich Senior Service Manager for Boeing (LearningCircuit, 2002). This statement shows that now people are very welcoming easy access information that will make their job simpler due to time preciousness. The impact is obvious that over the last half year, portal technology has become very popular to the large and medium size organization for information exchange.

The portal technology is also playing a very essential role in the education fields. It is being used to ensure that the curriculum provided meets the educational

The contents of  
the thesis is for  
internal user  
only
