

FUZZY CORPORATE STRATEGY FORMULATION APPLICATION SYSTEM

A project submitted to the Graduate School in partial fulfillment
of the requirements for the degree
Master of Science (Intelligent Knowledge Based System)
Universiti Utara Malaysia

By:
Nooraini Binti Yusoff

**Sekolah Siswazah
(Graduate School)
Universiti Utara Malaysia**

**PERAKUAN KERJA KERTAS PROJEK
(Certification of Project Paper)**

Saya, yang bertandatangan, memperakukan bahawa
(I, the undersigned, certify that)

NOORAINI BT. YUSOFF

calon untuk Ijazah

(candidate for the degree of) Sarjana Sains (Sistem Pintar Berasaskan

Pengetahuan)

telah mengemukakan kertas projek yang bertajuk
(has presented his/her project paper of the following title)

FUZZY CORPORATE STRATEGY FORMULATION APPLICATION SYSTEM

seperti yang tercatat di muka surat tajuk dan kulit kertas projek
(as it appears on the title page and front cover of project paper)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan,
dan meliputi bidang ilmu dengan memuaskan.
(that the project paper acceptable in form and content, and that a satisfactory
knowledge of the field is covered by the project paper).

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirement for a post graduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or, in their absence, by the dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts there of for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole part, should be addressed to :

**Dean of Graduate School
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darul Aman**

ABSTRACT (MALA Y)

Analisis strategik melibatkan proses membuat keputusan yang menganalisis faktor-faktor dalaman dan luaran kritikal sesebuah organisasi dan merancang strategi-strategi yang sesuai berdasarkan analisis faktor-faktor tersebut. Pembuatan keputusan merupakan satu proses yang dinamik dan kompleks. Pembuat keputusan atau perancang strategi berhadapan dengan masalah mencari maklumat, keputusan yang tertangguh dan memakan masa, ketidakpastian, kekaburan, dan dalam beberapa kes seringkali berlaku konflik semasa membuat keputusan. Keadaan-keadaan ini turut mempengaruhi keputusan yang bakal dibuat. Kajian ini melibatkan pembangunan sebuah Sistem Aplikasi Formulasi Strategi Korporat Kabur. Sistem ini merupakan sistem automasi formulasi strategik yang menggunakan teknik Kepintaran Buatan: Teknologi Logik Kabur untuk tujuan memperbaiki sistem automasi formulasi strategik yang sedia ada. Logik Kabur membolehkan komputer untuk manipulasi ketidakpastian yang melibatkan pengetahuan pakar dan material rujukan yang lain. Tujuan utama projek ini adalah untuk menghasilkan satu alat analisis perniagaan yang membantu perancang strategik merancang strategi. Output yang dihasilkan oleh sistem telah disahkan oleh pakar dalam pengurusan strategik. Sistem berupaya untuk menganalisa situasi semasa sesebuah organisasi dan meramal strategi yang sesuai, yang mana ianya mempunyai potensi untuk membantu dalam proses membuat keputusan strategik.

ABSTRACT (ENGLISH)

Strategic analysis involves the decision-making process that analyzes business internal and external critical factors and plan the appropriate strategies based on the analysis of the factors. Decision-making is a dynamic process. It is complex and at times ambiguous. Decision-makers encounter information search problems and detours, delayed feedback of results, uncertainty, ambiguity, and in some cases conflict during decision-making. In many situations, strategists seem to engage in an informal causal analysis in an attempt to favourably influence decision outcomes. In this study a Fuzzy Corporate Strategy Formulation Application System was developed. The system is an automated strategic formulation that embeds Artificial Intelligence technique: Fuzzy Logic for the purpose of improving the current practices of the automated strategic -formulation system. Fuzzy Logic allows computers to manipulate common sense in an uncertain world that involves knowledge of experts and other related references. The aim is to provide a business analysis tool that can assist the strategy decision-maker in a company to formulate strategies. The outcomes of the system have been validated with an expert in strategic management. The results reveal that the developed prototype is able to map the present situation of a company and to predict the possible future organization strategies, thus it has potential to assist in strategic decision-making.

ACKNOWLEDGEMENT

I would like to express my thanks and gratitude to Allah, the Most Beneficent, the Most Merciful whom granted me the ability and willing to start and complete this project. I pray to his greatness to inspire and to enable me to continue the work for the benefits of my country, specifically for educational institutions.

I am deeply indebted to my supervisor Assoc. Prof. Fadzilah Siraj whose help, stimulating suggestions and encouragement helped me at all the times during the project development and the writing of this project.

I would like to express heartfelt thanks to Professor Datin Dr. Siti Maimon, a strategic management professor in Universiti Utara Malaysia, for her willingness to be my second supervisor, who spent much times consulting me throughout this project, providing a lot of materials and willing to contribute her knowledge to this project.

I would also like to thank to my former IKBS classmates' batch November 2001/2002, IKBS lecturers who have supported me towards the completion of this project and to all those who gave me the possibility to complete this project. I wish to thank them for all their help, support, interest and valuable hints.

Especially, I would like to give my special thanks to my beloved family whose love and patient to see me through this work.

May God bless all of you. Thank you.

CHAPTER 1

INTRODUCTION

This section briefly presents the background, intentions, goals/objectives and justifications of developing the Fuzzy Corporate Strategy Formulation Application System. The main idea of the study is to such a system that able is to automate the strategic formulation process. The system is also capable to express the uncertainty and provide advices on the strategy to be implemented based on the knowledge embedded into the system using certain Fuzzy Logic technology. The automated strategic formulation analysis is embedded Fuzzy for the purpose of improving the current practices of the available automated strategic formulation system. The aim is to provide a business analysis tool that can assist the strategy decision-maker of a company in strategic decision-making. This section will be organized as follows:

1.1 Background

Strategic management is a set of managerial decisions and actions that determines the long-run performance of a corporation. It includes (1) **environmental scanning**, (2) **strategic formulation** (strategic or long-range planning), (3) **strategy implementation**, and (4) **evaluation and control**. Figure 1.1 shows how these four elements interact. The study of strategic management emphasizes monitoring and
