PERAKUAN KERJA KERTAS PROJEK
(Certificate of Project Paper)

Saya, yang bertandatangan, memperakukan bahawa I, the undersigned, certify that

ABDUNASSER EHMIID MEHREZ SAAD

calon untuk ijazah (candidate for the degree of) MSc. (Information Technology)

telah mengemukakan kertas projek yang bertajuk (has presented his/her project paper of the following title)

A REQUIREMENT MODEL OF ONLINE APPLICATION REMINDER TO RENEW VISA FOR INTERNATIONAL STUDENTS

seperti yang tercatat di muka surat tajuk dan kulit kertas projek (as it appears on the title page and front cover of project paper)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan dan meliputi bidang ilmu dengan memuaskan. (that the project paper acceptable in form and content, and that a satisfactory knowledge of the field is covered by the project paper).

PERMISSION OF USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the university library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in their absence by the Dean of the graduate School. It is understood that any copying or publication or used of this thesis or parts thereof for financial gain shall not allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Dean of Graduate School

ABSTRACT

Information accessibility has become easier and can be improved by using web-based application. The aim of this project is to identify a requirement model of web-based reminder system. This system is an assistant tool for international students to remind them especially when they forget renew their visa at the time. It applies knowledge base and web base application in order to add element such as user friendly, usefulness, pleasing and informative. This prototype has been developed using general methodology of design research, Object-oriented approach focusing on Unified Modeling Language notation. The development of this prototype starts with analysis phase and ended with testing and evaluation. This project discusses some findings, problem encountered and limitation of the project’s development. Finally, brief recommendation given as contribution to the future development.
ACKNOWLEDGEMENTS

First of all, thank the almighty God, for generously supporting me through all my studies. I would like to express my sincere gratitude to my supervisors, Assoc. Prof. Dr. Wan Rozaini Sheik Osman for her kind help, support and guidance and pieces of advice throughout the whole process of writing this thesis. My sincere thanks to Madam Norida Darro for her help. I would like to express my gratitude to many staff at the University were a constant challenge and source of support. I owe to them a lot for what they taught me during these years.

Special thanks I would like to give to my beloved wife who supported me in my study. Many thanks go to my relatives back home especially to my beloved father and mother, Mr. Ehmid Mehrez Saad and Mrs. Mabrouka Ali Athmona. I wish to take this opportunity to express my deepest thanks to my brothers, sisters, brother in law and for the love affection and support they have provided me with on every step of my life, specially this important part of my education.

Last but not least I want to extend my warmest thanks to those that have helped me, in any way, during my thesis work.

*****

To who wept for me and supported me in this life

To who gave me life by her love

To Gareha

My Allah bless us

CHAPTER 1

INTRODUCTION

This project is to fulfill upon the request of course Thesis/Project (TZ6996) as one of the graduation requirements for Master Science in Information Technology (MSc. IT) in University Utara Malaysia. The purpose of this project is a requirement model of online application reminder to renew visa for international students.

This chapter gives a background, and further discussion about the problem statement, research question, objectives, motivation of the research and research scope.

1.1 Background

Information accessibility has become easier and can be improved by using web-based application. Web-to-host access tools are software products that ease the process of connecting to several types of data: legacy data, computer software applications, e-mails, faxes, documents, etc.

John & Micheal (1999) introduced a research about the application that appeared on the internet network that can be referred as online application. However, online application must be distinguished from a standard WWW application by the type
The contents of the thesis is for internal user only
