PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a post graduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence, by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part, should be address to:

Dean of Graduate School

ABSTRAK

Projek ini bertujuan untuk mengkaji proses IT outsourcing dan membangunkan teoritikal rangka untuk IT outsourcing proses yang terdiri daripada tujuh fasa. Rangka ini meliputi fasa permulaan keputusan outsourcing, fasa analisis dan perancangan, fasa menentukan pengurusan outsourcing, fasa memilih pembekal system maklumat, fasa implementasi, fasa menguruskan hubungan outsourcing and fasa penilaian. Selain itu, projek kajian ini juga mengenalpasti faktor pencapaian kritikal yang perlu diperhatikan dalam proses IT outsourcing.

Kaedah penyelidikan yang digunakan dalam usaha membangunkan rangka bermula dari proses ulasan karya supaya memperolehi kefahaman yang lebih mendalam. Di samping itu, soalan kajian dan temuduga secara semi-struktur juga dijalankan ke atas pegawai-pegawai IT dari institusi-institusi bank untuk mendapatkan maklumat yang lebih lanjut. Pada dasarnya, soalan-soalan yang ditanya meliputi isu pengurusan IT dalam sesuatu organisasi seperti kaedah untuk mengenal pasti masalah dan menilainya. Tambahan pula, soal tentang perancangan perniagaan, proses kelulusan projek dan kesan-kesan IT outsourcing terhadap pengurusan projek juga dikemukakan.

Sebab-munasabab yang menyumbang pembangunan rangka untuk IT outsourcing adalah untuk memastikan organisasi dapat mencapai matlamat dan manfaat daripada aktiviti outsourcing. Selain itu, hasil daripada kajian ini juga dijangka dapat memberi peringatan kepada organisasi bahawa kos analysis yang menyeluruh perlu dijalankan dalam usaha melaksanakan proses IT outsourcing.
ABSTRACT

The paper will study the IT outsourcing process decision and developed a theoretical framework consisting of seven phases of IT outsourcing process decision. The framework consists of initial outsourcing decision phase, analysis and planning phase, design outsourcing management phase, selecting IS supplier phase, implementing phase, monitor outsourcing relationship and evaluating phase. Meanwhile, the study of the project also identifies the critical success factors should be pay attention during the process of IT outsourcing activities.

The methodology chooses to use to develop framework began with the literature review on the previous journal and research paper. Meanwhile the data for this study is also drawn from a mixture of questionnaires and semi-structured interviews administered to multiple recipients at banking institutions. Basically, the questions cover general issues of IT management in the firm such as the methodology for identifying and evaluating projects, developing business plans, the approval process, and their project management guidelines.

The reason to provide a IT outsourcing process framework is to ensure organization achieved the desire benefits from the outsourcing activities. Beside, outcome of the study also expected to alert organizations to the strategic issue along with a comprehensive cost analysis that should be considered if an effective IT outsourcing process framework is eventually formulated.
ACKNOWLEDGEMENT

This project would not be possible without the participation of many people. No matter how much work the author put into a project, there are always others who provided valuable guidance and information that enable the completion of the project.

First of all, I would like to take this opportunity to express my appreciation to my project supervisor, Associate Professor Dr Wan Rozaini Sheik Osman, for her kind tutelage, comments and suggestions in the development of this project. She has offered me very sound advices and enables me to finish this project on time.

Finally, a heart felt thank you to everyone who had directly or indirectly contributed to the completion of this project. I also want to take this opportunity to thank my parents and friends for their support and assistance in whatever form possible. Without their support, I might not have made this so far.

CHAPTER THREE: RESEARCH METHODOLOGY

3.1 Introduction

3.2 First Phase – Preliminary Work
  3.2.1 Literature Review
  3.2.2 Survey Preparation

3.3 Second Phase – Survey to Define the Classification Dimensions
  3.3.1 Determine the Different Types of Outsourcing

3.4 Third Phase – Experience Survey

3.5 Fourth Phase – Framework Preparation

CHAPTER FOUR: FRAMEWORK DEVELOPMENT

4.1 Introduction

4.2 The Initial Sourcing Decision
  4.2.1 Decide Whether to Initial Sourcing Assessment
  4.2.2 Set up Preliminary Decision Process
    4.2.2.1 Determine Relationship Sourcing Decision and Information Planning
    4.2.2.2 Determine the Scope of the IS Function Consideration
    4.2.2.3 Determine Role of Variables in Initial Sourcing Decision

4.2.3 Determine Goal Variables
4.2.4 Access Current Situation and Change Planned
4.2.5 Access Situational Factors
4.2.6 Determine Attractiveness of Outsourcing
4.2.7 Chose Sourcing Option
  4.2.7.1 Develop Alternative Sourcing Options
  4.2.7.2 Evaluate Alternative Sourcing Options
  4.2.7.3 Choose Sourcing Option

4.3 Analysis and Planning
  4.3.1 Establishing Analysis Criteria
  4.3.2 Cost Benefit Analysis
4.3.3 Quantitative Considerations
  4.3.3.1 Dollar Cost
4.3.4 Qualitative Considerations
  4.3.4.1 Time
  4.3.4.2 Risk
4.4 Design Outsourcing Arrangement
  4.4.1 Design Outsourcing Relationship
    4.4.1.1 Determine Economic Relationship
    4.4.1.2 Determine Legal Relationship
    4.4.1.3 Determine Transactional Relationship
  4.4.2 Design Management Structure
    4.4.2.1 Requirement Definition
    4.4.2.2 Pricing Mechanisms
    4.4.2.3 Lead Time Mechanisms
    4.4.2.4 Quality Control Mechanisms
4.5 Selecting IS Supplier
  4.5.1 Set up Selection Process
  4.5.2 Call for a Tender
  4.5.3 Select Potential Suppliers for Tender
  4.5.4 Evaluate Tender Response
  4.5.5 Write the Contract
4.6 Implementing the Outsourcing
4.7 Monitor the Outsourcing Relationship
  4.7.1 Maintain Internal Capacity
  4.7.2 Measure Compliance to Requirements
  4.7.3 Enforce Compliance
4.8 Evaluation Phase
  4.8.1 Ensure Service is Provided
  4.8.2 Contract Termination
4.9 Critical Success Factors
  4.9.1 Strategic Analysis
  4.9.2 Managing the Relationship
CHAPTER FIVE: CONCLUSION

5.1 Introduction 53

5.2 Further Research 53

CHAPTER ONE
INTRODUCTION

1.1 Introduction

The business world is increasingly adopting the practice of outsourcing activities in the organization. In recent years, the outsourcing of information technology functions has become a common practice for small and large companies alike. Outsourcing has been loosely defined as the contracting out all or parts of a company's functional work to one or more external vendor (Sengupta and Zviran, 1997). Studies the outsourcing phenomenon, starting with strategic analysis and working through the many practical considerations and decisions that practicing IT managers towards the success of outsourcing activities. Outsourcing is a fully-fledged business mega trend – both in the USA and around the world (Embleton, 2003). This is the statement that reflects the enthusiasm of outsourcing as it generated in the business world.

Outsourcing refers to the concept of hiring outside professional services to meet the in-house needs of an organization or an agency (Gupta, 1992). In the Information Technology (IT) industry, outsourcing refers to using external agencies to process, manage or maintain internal data and provide IT information related services. Some of the simpler definitions of outsourcing including:

1) "having an outside vendor provides a service that you usually perform in-house" (Laabs, 1997).
The contents of the thesis is for internal user only
