PERAKUAN KERJA TESIS
(Certification Of Thesis Work)

Kami, yang bertandatangan, memperakukan bahawa
(We, the undersigned, certify that)

LESLIE TAWAN AK. GANDIL

caled untuk ijazah
(candidate for the degree of) Master of Science (Management)

telah mengemukakan tesisnya yang bertajuk
(has presented his/her thesis of the following title)

TOM AWARENESS AMONG CIVIL SERVANTS IN EDUCATION SECTOR.

seperti yang tercatat di muka surat tajuk dan kulit tesis
(as it appears on the title page and front cover of thesis)

bahawa tesis tersebut boleh diterima dari segi bentuk serta kandungan, dan meliputi bidang ilmu dengan memuaskan.
(that the thesis is acceptable in form and content, and that a satisfactory knowledge of the field is covered by the thesis).

Hasil kajian utama menunjukkan bahawa tidak a&wujud perbezaan di antara kakitangan lelaki dan kakitangan perempuan mengenai persepsi kesedaran PKM. Didapati juga semua kakitangan mempunyai persepsi yang sama mengenai kesedaran PKM walaupun umur, keturunan, taraf perkahwinan, tempoh perkhidmatan dan sektor/bahagian jabatan mereka berbeza. Walau bagaimanapun, kelayakan pendidikan dan tahap jawatan responden telah menunjukkan hubungan yang positif dan signifikan dengan kesedaran PKM. Petunjuk utama mengenai kesedaran PKM ialah Semangat berpasukan, diikuti (mengikut susunan) oleh Mengutamakan pelanggan, Kepastian kualiti, Latihan dan pengiktirafan, Perancangan strategik kualiti, Pengukuran prestasi, dan Sokongan pengurusan atasam.

Daripada hasil kajian ini suatu kesimpulan yang dapat dibuat ialah: kelayakan pendidikan dan tahap perkhidmatan staf ada kaitannya dengan kesedaran PKM secara positif dan signifikan. Secara umumnya, kakitangan yang berkelulusan ijazah memegang jawatan sekurang-kurangnya pengurusan pada tahap rendah. Faktor pendidikan tinggi dan tahap jawatan inilah yang menunjukkan bahawa kesedaran PKM mereka yang positif.
ABSTRACT

This study attempts to investigate the correlation of TQM awareness among the civil servants in the State Education Headquarters in Kuching, Sarawak. Specifically, the study attempted to find out the relationship between the TQM awareness with the: gender, age, ethnic group, marital status, education qualification, job position, length of service and department sector/section of the respondents. The units of analysis were the staff of the education department from all eight sectors and sections, male and female. The research methodology utilised was a survey based on a personally distributed questionnaire which incorporated the Likert Scales. The resultant information was analysed by applying the statistical tools and techniques including t-Test, one-way ANOVA, Pearson Correlation Analysis and Multiple Regression to determine the significance of the relationship of the items under investigation with TQM awareness.

The study was motivated by the interest of the researcher following the introduction of TQM in the civil service since 1992. The TQM principles emphasized in the circular were: (1) Top management support, (2) Strategic quality planning, (3) Customer focus, (4) Team work, (5) Training and recognition, (6) Performance measurement, and (7) Quality assurance.

The major findings of the study revealed that there was no difference in the TQM awareness perceived by male and female staff. The findings further showed that the staff perceived equal TQM awareness irrespective of their age, ethnic group, marital status, length of service and departmental sectors/sections they belonged to. However, the educational qualification and job position of the respondents did indicate a positive and significant relationship with the TQM awareness. The findings further elaborated that all the seven TQM principles had shown positive and significant correlation with the TQM awareness. The best predictor of TQM awareness was team work followed by (in order) customer focus, quality assurance, training & recognition, strategic quality planning, performance measurement and top management support.

The findings concluded that educational qualification and job position were inter-related. Those who were graduates held the post of at least lower management. Generally, it was this management group that showed positive TQM awareness with respect to their educational qualification and job position in the department.
ACKNOWLEDGEMENT

The writer wishes to acknowledge and special thank to those who had made this thesis possible.

1. To INSTITUTE of AMINUDDIN BAKI (IAB) especially Dr. Ibrahim Ahmad Bajunid, Director of IAB and Encik Dzulkifli Bahari, of I A . 8 (Northern Branch) for their moral and financial support for making this course possible;

2. To the Graduate School of UNIVERSITI UTARA MALAYSIA for the opportunities opened up for scholarly and academic training;

3. To Associate Professor Dr. Ibrahim Abdul Hamid, Dean of the Graduate School, for his continuous encouragement and support;

4. To Associate Professor Dr. Rushaimi Zien Yusoff, Director of Institute of Quality Management, UUM and Professor Dr. Peter Wyer, British Aerospace Professor, for their guidance and commitment for the completion of this study;

5. To the Directors and staff of the State Education Headquarters of Sarawak and Perlis for making this study possible;

6. To brother Tan Wee Guan for unconditionally and sacrificially lending me his only brand new car to use in the campus throughout my one year Masters Degree study programme.
DEDICATION

Salute to my

late beloved father,

Gandil ak. Mambai

who has gone forever since Wednesday, 27th November, 1996 @ 11.00 a.m. while I was waiting for this thesis to be approved at UUM.

My fond memory of him is his gentleness, slow to anger, caring, loving and committed father.

CHAPTER ONE
INTRODUCTION

This research is conducted for the academic purpose of the researcher to meet the partial fulfillment of the requirements for the Masters Degree Programme in Management. It is indeed not a research for any other organisations to use.

1.1 Context of The Study
Although parents, students, teachers and politicians have probably always been interested in results obtained at a school, it is only recently that the quality of education has become an issue of common concern (Stensaaasen, 1995). Many in the developed countries - maybe in some developing countries too - have been worried by two disturbing trends in their education systems, i.e. a deterioration in the quality of education (particularly at the lower levels) and a growing mismatch between education and employment. These are common perceptions among educational planners and administrators, on the one hand, and recipients and users of education, on the other (Mukherjee, 1995). However, our Education Ministry may be aware of the quality of our education system and always ever ready to improve it now and then. In fact, the quality of our education is determined by the policy-makers and planners at the Ministry level. The process of implementation is carried out at various state and local education departments, and then involves schools.
The contents of the thesis is for internal user only
