PERAKUAN KERJA KERTAS PROJEK
(Certificate of Project Paper)

Saya, yang bertandatangan, memperakukan bahawa
(I, the undersigned, certify that)

NISOFIA NILAEH
[89446]

calon untuk Ijazah
(candidate for the degree of) MSc. (Information Technology)

telah mengemukakan kertas projek yang bertajuk
(has presented his/her project paper of the following title)

REQUIREMENT MODEL FOR UUM MOBILE COURSE EVALUATION SYSTEM

seperti yang tercatat di muka surat tajuk dan kulit kertas projek
(as it appears on the title page and front cover of project paper)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan
dan meliputi bidang ilmu dengan memuaskan.
(that the project paper acceptable in form and content, and that a satisfactory
knowledge of the field is covered by the project paper).

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from University Utara Malaysia, I agree that the University Utara Malaysia's library may take it freely available for inspection. I further agree that permission for copying this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or Dean of Academic College of Arts and Sciences, University Utara Malaysia. It is also understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without written permission. It is also understood that due recognition shall be to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make use of materials in this thesis, in whole or in part should be addressed to:

Dean of Academic

College of Arts and Sciences

ABSTRACT

Today people can access information without need for such efforts. Mobile technologies are rapidly growing and can assist in making this a reality. This study uses the mobile application to provide an alternative of a new method that utilizes mobile technology for course evaluation system. The aims of this study are to identify the requirement and develop the prototype Mobile Course Evaluation System. This system is alternative way in facilities and more convenience for student to evaluate of their courses. Moreover, the purpose of this study is to evaluate system prototype that using usability evaluation to get user's satisfaction by students. The study followed the phases in the Increment Iterative extreme Programming (IIXP) methodology. The findings of this study are requirement model, the prototype Mobile Course Evaluation System and user satisfaction results indicate that the most of students agree with using this system in terms of usefulness, ease of use and outcome future use of the system. This finding will be encouragement to improve and enhance into the existing system.
ACKNOWLEDGEMENTS

First of all, praise be to Allah, the almighty God for bestowing me with great strength, patience, and courage in completing all my studies. I would like to express my sincere gratitude to my supervisor, Mr. Azmi Md Saman for his kindness help, guidance, patience and faith in me throughout the process of this study. This research would not be completed without constructive suggestion, comments and encouragements from him.

My special thanks to my beloved family, especially my parents, who sacrificed so much and supported my efforts with love, understanding and constant encouragement without which it would not have been possible for me to earn this degree. I would like to extend my deepest love to my brother and sisters Firdaos with all they love and support given to me in every part of my life.

Lastly, I would like to dedicate my sincere gratitude and my deep appreciation to Ali Ahmad Zahrawi, and also all my friends around me who had helped, encouraged and contributed throughout the duration of my graduate studies.

CHAPTER ONE

INTRODUCTION

This chapter briefly elaborates the main idea of this study that describes the overall introduction in this study and motivation in order to the implementation. This is followed by the problem statement, objectives of the study, scope of the study and significance of the study. The last sub-topic elaborates the way this thesis is organized.

1.1 Introduction

Nowadays Online technologies and web-based applications are increasingly being utilized to aid in higher education. Mobile technology has been considered as viable alternative for developing application to be use for teaching and learning environment such like mobile education. A new form of technology has to support the educational process to helping access to educational information sources, such as announcements, course schedules, grades, and user directory details that mobile web access is considered to be a key enabler for mobile internet services. Even in a university campus mobility has become a part of a student’s daily life (Evangelos et. al, 2006).
The contents of the thesis is for internal user only
