PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from the Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner in whole or in part, for scholarly purposes may be granted by my supervisor(s) or in their absence by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to

Dean of Graduate School
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darel Aman.
ABSTRACT

The general trend in institution of higher learning is to treat the students as their customers and guarantee maximum customer satisfaction as being properly observed in the ideal business environment. Previous studies also revealed the need for all institutions of higher learning to embrace the use of Customer Relationship Management (CRM) solutions that can be used to monitor relationship with student right from the time of enrolment to the alumnus stage. This study is aimed at conducting an exploratory study using quantitative approach to determine the factors responsible for the selection of CRM solution in UUM by proposing an institutional based CRM model. An institutional-based prototype will be developed and usability of the prototype will be evaluated qualitatively.
ACKNOWLEDGEMENT

By the Name of Allah, the Most Gracious and the Most Merciful

First of all thank to Allah for giving me the strength to complete my Master generally and this thesis specifically.

First, I would like to express my appreciation to Allah, the Most Merciful and the Most Compassionate who has granted me the ability and willing to start and complete this study. I do pray to His Greatness to inspire and enable me to continue the work for the benefits of humanity.

My most profound thankfulness goes to my supervisor Dr. Mohd Syazwan for his scientifically proven and creativity encouraging guidance. Honestly, he has been all the time center of inspiration and guidance. I'm gratefully and deeply thank him for his support and cooperation as being equipped to provide his best help. My thanks also go to all the lecturers who helped me to collect my data during their classes. "May Allah bless all of them".

Also my most profound thankfulness to all my parents, brothers, my wife, my children.

CHAPTER 1

INTRODUCTION

1.1 Preface

It is generally believed that students are the future leaders. Also, such future leaders must pass through one institution of higher learning or the other. Their various experiences in such institution will continue to linger on their minds and this will affect their future relationship with the institution. Thus, it is becoming imperative on every institution of higher learning to consolidate their relationship with their students and maintain such relationship after graduation. The reason for poor relationship between institution and students in the past can be traced to the belief that it is only business organizations that needs to maintain a smooth relationship with their customers for future patronage. This belief has been disproved by many authors that, the same thing should be applicable to higher students and students’ enrollment should be regarded as sales which should be well followed for future patronage (Christopher, 2008). This study is aimed at examining the factors to be considered for successful implementation in an institutional-based Customer Relationship Management (CRM).
