UUM 2009
WEB BASED MODEL OF A DIGITAL FAX DOCUMENT MANAGEMENT SYSTEM

A Project Paper submitted to the Graduate School in partial fulfillment of the requirements for the degree
Master of Science (Information Technology)
College of Arts and Science
Universiti Utara Malaysia

By
Aida Rosmiza Binti Shuib  88006

MAY 2009
KOLEJ SASTERA DAN SAINS  
(College of Arts and Sciences)  
Universiti Utara Malaysia

PERAKUAN KERJA KERTAS PROJEK  
(Certificate of Project Paper)

Saya, yang bertanda tangan, memperakukan bahawa  
(I, the undersigned, certify that)

AIDA ROSMIZA SHuib  
(88006)

calon untuk ijazah  
(candidate for the degree of)  
MSc. [Information Technology]

telah mengemukakan kertas projek yang bertajuk  
(has presented his/her project paper of the following title)

WEB BASED MODEL OF A DIGITAL FAX DOCUMENT  
MANAGEMENT SYSTEM

seperti yang tercatat di muka surat tajuk dan kulit kertas projek  
(as it appears on the title page and front cover of project paper)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan  
(that the project paper acceptable in form and content, and that a satisfactory  
knowledge of the field is covered by the project paper).

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to

Dean of Graduate School
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darul Aman.
ABSTRACT

The Government of Malaysia has encouraged the use of Information Technology application among the public and private sector to enable both sectors to compete and provide better facilities. Most brick and mortar or physically located organizations also seek alternatives for handling the document management. Nowadays, most of the information in the organization is stored in unstructured manner that require certain technique to be applied in order to retrieve the important and relevant information from a large scale of collected data. A digital document management system takes advantage of advanced document analysis and management techniques. In this study, a document from the fax machine that is a structured data is used in the system to digitalize the fax documents into the document management system.
ACKNOWLEDGEMENT

In the name of Allah the most Gracious and Merciful, alhamdullilah for the strength that had been given to completed and finished this research. The completion of this research is through relentless coorporation of several persons in giving the guidance.

The utmost appreciation goes to my supervisor, Profesor Madya Fadzilah Binti Siraj for her guidance, counsel and patience throughout the research project. Her knowledge, advice, critic, help, support, and understanding helped me in writing this research.

Special thanks and appreciation goes to Tuan Haji Wahab bin Jusoh who is the Assistant Director General of Biro Tatangera Jabatan Perdana Menteri Putrajaya, for his willingness to corporate in contributing some insights for this research project.

Warmest thanks to all my family especially to my sister that motivated me and always there for me even in the hardest time. Also thanks to others that has been tolerant and patient in supporting me in my efforts to compete this research project.

Thank you for the companion.

May Allah bless all of us.

Thank you.

## CHAPTER ONE: INTRODUCTION

1.0 Introduction                                     1-5  
1.1 Problem Statement                                5-6  
1.2 Research Objectives                               6  
   1.2.1 Main Objective                               6  
   1.2.2 Specific Objectives                          6  
1.3 Research Questions                                7  
1.4 Scope of Study                                   7  
1.5 Significance of Research                         7-8  
1.6 Summary                                          9

## CHAPTER TWO: LITERATURE REVIEW

2.1 Introduction of Web-Based Model                  10-12  
2.2 Digital Fax performing Digital Document          13-16  
2.3 Digital Document Management System               16-20  
2.4 Conclusion                                       20

CHAPTER ONE

INTRODUCTION

The information technology (IT) revolution has empowered organizations and every individual as a whole. However, the critical difference of leading-edge organizations that want to stay ahead in the new economy will be the ability to manage their content. Information is now spruced all over the organization in faxes, brochures, tenders, drawings, e-files and single greatest task is to keep all this data systematically organized and available at any time. When information is freed from the physical limitations of paper and converted into an electronic format, it becomes a valuable strategic resource.

Instead of stashing business-critical documents in file cabinets, voluminous physical and electronic data into information databases could be easily retrieved. It will making easily retrievable by users throughout the enterprise and also make them available instantly if such information could be stored digitally. It save hundreds of staff’s man hours a month, searching for critical documents and eliminate vital information from damage, pilferage, theft, misplacement or loss. This helps users focus on getting their jobs done, rather than spending precious time looking for files and information.

Loosing of paper documents in folders or binders was the factors to create digital file. Low information density and lacks of computational power put paper as a poor storage device. It is not easy to distribute or back up bulky and heavy documents. Therefore, digitize paper documents and make the documents searchable will manage the digital version of documents with database and local search engine (Suzuki & Wobook, 2009).
The contents of the thesis is for internal user only
