PERMISSION TO USE

In presenting this thesis as partial requirement for a post graduate degree from Universiti Utara Malaysia, I hereby consent to the Universiti Library to freely make available this thesis for references and inspection. I further consent to the copying of this thesis in any manner, in whole or in part, for academic purpose which may also be granted by my supervisor or, in their absence by the Dean of College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall be given to me and the Universiti Utara Malaysia for any academic use which may be made of any material from my thesis.
ABSTRAK

ABSTRACT

The main objective of this study is to determine the relationship between transformational leadership behavior and its dimensions and organizational citizenship behavior (OCB). The dimensions of transformational leadership behavior are idealized influence, inspirational motivation, intellectual stimulation and individualized consideration. This study also intends to examine whether any differences on OCB exist among the respondents based on the length of time they have been in their current grade and their place of work. Respondents of this study were 190 senior officers of grade 41 and 44 of Royal Malaysian Customs Department at Pulau Pinang, Wilayah Persekutuan Kuala Lumpur, Pahang, Johor, and Kuala Lumpur International Airport. Data were analyzed using SPSS version 15. The tests conducted were Pearson’s Correlation, multiple regression and one-way ANOVA. The Pearson’s Correlation showed that transformational leadership behavior, as well as each of its dimensions was correlated to OCB. However, multiple regression tests showed that OCB was significantly influenced by only one dimension; idealized influence. The findings of the one-way ANOVA showed that there were significant differences in respondents OCB based on the length of time they have been in their current grade. It was also found that there were no differences in respondents’ OCB based on their place of work.
ACKNOWLEDGEMENTS

First of all, my praise to Allah, who has blessed me with inner strength to complete this project paper.

I would like to express my sincere thanks to both my supervisors, Dr. Fais Ahmad of Universiti Utara Malaysia for his guidance and comments and Dr. Anesee Ibrahim of Institut Tadbiran Awam Negara (INTAN) for his statistical knowledge that helped in analyzing the data and the outcomes. I would also like to express my sincere gratitude to Associate Professor Dr. Abu Bakar Hamed for his insightful comments.

A special thank you to state training officers of Royal Malaysian Customs Department; YM Tengku Mat Raduan, Tuan Roslan Yusof , Puan Noor Arini Mat Daud , Tuan Soh Tek Liang and Puan Siti Fatimah for their cooperation in this study.

Not forgotten, my appreciation goes to my parents and siblings for their kind consideration. To my children, Zafirah, Zafri, Zahin and Zulfah Aqilah , I thank you for your understanding. To my husband Zainuddin Mohamad, thank you for the patience, support, and encouragement and for always being there for me.

I also thank those who I have not mentioned here but in many ways propelled me to strive toward greater heights.

CHAPTER ONE
INTRODUCTION

1.0 Introduction

Organizational citizenship behavior or better known as OCB was first introduced by Bateman and Organ (1983) twenty six years ago. Since then, it has been studied extensively and has been significantly associated with positive performance of an organization. Yet, in Malaysia, despite the apparent importance of OCB to organizations, not many studies were conducted and it is very rarely highlighted by the management in the public sector.

According to Organ (1988), OCB is defined as individual behavior that is discretionary, not directly or explicitly recognized by the formal reward system, and that in the aggregate promotes the effective functioning of the organization.

OCB has been identified as vital to the effectiveness of organizations and teams (Bateman and Organ, 1983; Organ, 1988 and Podsakoff, 1997). Previous researchers noted that OCB have contributed to organizational commitment (Podsakoff, MacKenzie and Boomer, 1996), and service quality (Bienstock, DeMoranville and Smith, 2003). Studies by Wayne, Liden, Graf and Ferris (1997) and Deluga (1998) showed that leader-
