PERMISSION TO USE

In presenting this dissertation in partial fulfillment of the requirement for a postgraduate degree from University Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree the permission for copying this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or, in absence, by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain should not be allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or to make other use of materials in thesis, in whole or in part, should be addressed to:

ABSTRACT

The main purpose of this study is to examine the tendency of Jordanian taxpayers toward tax evasion by investigate the influence of the following variables on tax evasion: (Age, gender, marital status, education, level of income, source of income, corruption and bribery, tax rate, penalty rate, probability of detection, fairness of tax system and government, religion, and ethics). The data was collected through distribution of questionnaires to 212 respondents in Jordan and processed using statistical package for social science (SPSS) software for the purpose of this study.

By using Correlation and regression analysis, the findings show that there is a positive significant relationship between corruption and bribery, tax rate, penalty rate, probability of detection, fairness of tax system and government, religion, and ethics with tax evasion, whereas education and level of income significantly negative with tax evasion. No significance correlation but the relation was positive between marital status with tax evasion, while the other factors, age, gender, and source of income have no significance correlation but the relation was negative.
ACKNOWLEDGEMENTS

In the name of Allah, the Most Merciful and Most Compassionate

First, I would like to express my appreciation to Allah, the Most Merciful and the Most Compassionate who has granted me the ability and willing to start and complete this study. I do pray to His Greatness to inspire and enable me to finish this study on the required time. Without his permission, for sure I cannot make it possible.

I would like to extend my heartfelt appreciation and deep gratitude to my project supervisor, Assoc. Prof Dr. Nor Aziah Abdul Manaf, who had provided continuous guidance, encouragement, support and advice in assisting me to complete this project paper. Her remarkable ways and professionalism in explaining and guiding me throughout the completion of this research has allowed me to see things in a more rational and critical view. I am also grateful for the encouragement that I received from my family, especially my Mom, Brothers and Sisters. Their outstanding patience and unconditional love in supporting my quest and love for education has been extraordinary.

Finally, I wish to thank my dearest friends Omar, Hussain, Anas, Mohamad, and my lecturers in University Utara Malaysia, for all their help.

Thank you

Yaser Ahmad Slehat

CHAPTER ONE

BACKGROUND OF THE STUDY

1.1 Introduction

The purpose of this study is to examine the tendency of Jordanian taxpayers toward tax evasion. Tax evasion is a worldwide phenomenon (Schneider and Enste, 2000). It may have harmful effects on economic efficiency (Eisenhauer, 2008), and may cause social welfare losses (Bayer and Sutter, 2009). Advanced as well as third world countries are facing trouble of tax evasion (Hindriks and Myles, 2008). In Jordan there is an acute tax evasion problem which reduces effectiveness of the government’s operations (Malkawi and Haloush, 2008), and negatively affects the resources, economic performance and society moral principles, also as a third world country, Jordan suffers annually from a large deficit in a way that makes the government unable to achieve the reasonable social welfare\(^1\). The effect of this phenomenon is aggravated year after year in Jordan, which negatively affects the kingdom resources and economic performance, in addition to the infrastructures of society. According to European Neighborhood and Partnership Instrument (2007) one of Jordan’s main economic weaknesses is its reliance on external grants to finance its fiscal deficit and its inefficient direct tax system. Therefore, this phenomenon must take place in the economic reform program, as part of Jordan moving forward economically, socially and politically.
