PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree Master of Science (Information Technology) from University Utara Malaysia, I agree that the university's library may it freely available for inspection. I further agree that permission for copying this thesis in any manner, in a whole or in a part, for scholarly purpose may be granted by my supervisor or in their absence, by the Dean of Faculty of Technology Management. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part shall be addressed to:

**Dean Graduate School
University Utara Malaysia

Abstract

Application of information technology in our ways of doing things has become inevitable. Such innovations are now being introduced in an ideal working environment to create a knowledge workforce where vital knowledge relating to the activities of a working environment including expertise is shared among workers. Such approach facilitates a proper workflow and tells on the job's efficiency. In this study, we are to consider Blogs as a tool for sharing organization knowledge choosing UUM medical clinic center as the case study. Qualitatively, the study will determine the usage of Blogs for sharing organizational knowledge at UUM medical clinic center. Also Blogs prototype will be developed for the case study and usability testing will equally be conducted.

Keywords: expertise, workflow, blogs, usability

Acknowledgement

All praises and adoration to Almighty Allah, the BEGINNING and the end whom has in infinite mercy made this programmer a successful one. Allah has been wonderful to me in all respect. I say thank you ALLAH, Alhamdulillah. My gratitude also goes to my supportive supervisor Dr., Kang Eng Thye for his kind supervision despite his tight .schedule, I appreciate his constructive criticism all these sums up to today's success, May Allah thank you for me. I am equally grateful to my parents and all my brothers... for their parental care from my birth up to the present moment. Thank them for both financial and moral support. May Almighty Allah make them to reap the fruits of their lab our Lastly I am grateful to all my friends both in Libya and Malaysia who are too numerous to mention for their encouragement.

Thank you all.

Chapter One

General Introduction

1.0 Chapter Outline

This chapter being the introductory chapter gives the general overview of the entire activities involved in the study. It is made of the general introduction, the problem statement, the research objectives, the research questions, and the scope of the study, the limitation, and the significance of the study, the operational definition and study framework. It is hoped that having gone through this chapter the reader will have the general idea about the study

1.1 Introduction

1.1.1 Background of the Study

There is need for virtually all aspects of life activities to be conducted in an information technology compliant way. The innovations that accompany the introduction of information technology have really set the pace at which several activities are carried out, thus it will be odd to be crawling when the whole world is moving at a jet pace. Every organization are tend to embrace the idea of moving towards running a paperless office where activities and necessary workflow within a given organization can be achieved without any need to pass paper document around. Such idea is aimed at improving the productivity of knowledge workers since virtually all organizations now are knowledge-driven (Martin, 2004).
