ABSTRAK

ABSTRACT

It is important that Higher Education Institutions recognized themselves as contributing in the service industry to meet with the increasing demand of their stakeholders. In competing globally, Malaysian institutions are becoming popular destination for overseas studies. This study attempted to empirically identify the relationship between internet marketing and foreign students’ web search behaviour towards their choice of institution. The study involved foreign students who were studying at Universiti Utara Malaysia (Northern Malaysian University). A total number of 288 valid responses were collected through questionnaire-based survey method representing a total of 96.97 per cent response rate. Hypotheses testing method were employed, and self-administered questionnaire with five-point Likert scale was used to collect the data. Data were analyzed through Pearson correlation and multiple regressions analysis. The results were there is a positive relationship between internet marketing and web search behaviour with foreign students’ choice of institution (UUM), hence hypotheses are accepted. Regression analysis indicated that web search behaviour explained more variance in foreign students’ choice of institution at r=0.477, p<0.01 in comparison to internet marketing. Practical implications, recommendations and future research were offered in this study.
ACKNOWLEDGEMENTS

Praise be to Allah of His Perfection, none has the right to be worshipped except Allah and Allah is the Greatest. He who sent His Messenger Muhammad with guidance and the religion of Truth, may peace and blessings be upon him.

I would first express my heartfelt gratitude to my advisor, Mr. Shamir Sivaraj Abdullah, for his assistance, encouragement, guidance and opportunities that he provided. He is known among his students as a person of knowledge and practicality, caring and above all his nature able to translate or explain a difficult subject in a layman manner. I know I cannot thank him enough for his continuous dedication into teaching which I find both interesting and admirable. Thank you sir for giving me the chance to pursue this paper with you.

My heartfelt appreciation to Prof. Dr. Habshah Bakar, Tn. Hj. Mohamad Zainol Abidin Adam and Tn. Hj. Mustafa Zakaria for your guidance and moral support.

To all of whom have helped and support me in their respective capacities that made this term bearable if not easier, for me.

To my loved ones: Umi whose love and advice is invaluable; my dearest husband whose strength and patience have yield me to become a better person; my darling children who kept me going; my sister whose been my pillar; my brothers for their pillow punch therapies; and my dearest friends (Mama Hasnah & Abah Bani, Nora, Melissa, Kak Zee, Wana, Elley, Irfa and Aza) who shared numerous and countless moments that are unique.

~ Thank You ~

CHAPTER 1
INTRODUCTION

1.1 Background Of The Study

In recent times, Higher Education face substantial changes as demands for generated outcomes and knowledge-creation have increase tremendously. Institutions contribute to the population, economy and country that evolve in the terms as being in a ‘service industry’. Higher education institutions as many service industry are competing in a consumer environment where ‘economic rationalism, or neo-liberalism, assumes that the market delivers the best outcomes because consumers purchase rationally; they know their interests better than any regulating body’ (Gomes and Murphy, 2003). Mazzarol (1998) earlier on examined the nature of services and highlighted that international education execute the same service capability as any other to market their contributions.

In the past decade, according to Verbik and Lasanowski (2007) there are 1.2 out of the 2.7 million students (45% total amount of all foreign students) who are studying abroad with major players like United States, United Kingdom and Australia ranked first amongst the most popular destination countries for overseas studies. The reason was clear, they were able to attract students from different countries, establish a diversified market and generated their countries’ economic landscape. For instance Australia first introduced a full-fee system in 1986 and opened its market for public
