ABSTRACT

This study was carried out to identify the factors that influence the student performance in Financial Accounting 1. The 67 respondents are comes from Certificate in Business Administration Course in Ungku Omar Polytechnic. The research was conducted by giving out the questionnaire to respondents who have taken the subject. A set of questionnaire was designed to obtain primary data from the respondents about the factors that influence their performance in Financial Accounting 1. The overall findings of the study indicates that students Cumulative Grade Point Average (CGPA) and Prior accounting Knowledge (PAK) were factors influencing students performance in Financial Accounting 1, with CGPA was influence most. In conclusions, some suggestions have been made to enhance the achievement of students in this subject and recommendation for future research has also been included in the final part of the report.
ACKNOWLEDGEMENT

I would like to thank Dr. Rosliza binti Mat. Zin, who supervised and guided me in doing this project paper. Her guidance and help throughout this study is deeply appreciated.

Special thanks and appreciation also due to En. Ahmad Sanari b. Md. Salleh, the Coordinater of Examination Unit of Commerce Department and all parties who helped me to get all the related information for this project paper.

Finally, I wish to express my sincere thanks to my beloved husband and my 7 kids, who gave me inspiration and full support in finishing this project paper. Without their support, this project paper would not be a success. To my parents, your support also motivated me until the end.

CHAPTER 1

1.0 INTRODUCTION

1.1 BACKGROUND OF THE STUDY

Academic performance of students is challenging to measure since students performance is a product of socio-economic, psychological and environmental factors (Hijazi, 2006). Alfan and Othman (2005) stated that in Malaysia, a number of studies were conducted to determine factors influencing the students performance from the university level and also in the post secondary level, the sixth form, for example Onn (1999) and Ho (2000).

Generally, students are consist of two groups, for example those who improve and those who do not improve. Inconsistency of students performance from Certificate Level in commerce Department, Ungku Omar Polytechnic in Financial Accounting I subject (P2201) has motivated the researcher to do a research on the students performance. This research examine the factors influencing students performance in Financial accounting I for the Business Administration Certificate Course in Commerce Department.
