2009
DECLARATION

I declare that this thesis entitled "A survey on the factors that affect on tax evasion in Algeria" is a result of my own research excepted as cited in the references. The thesis has not been accepted for any degree and is not concurrently submitted as a candidate of any other degree.

I certify that any help had received in preparing this thesis and all the sources that used have been acknowledged.

PERMISSION TO USE

In presenting this thesis as a part fulfillment of the requirement for a postgraduate degree from Universiti Utara Malaysia, I agree that the Universiti Library may make it unreservedly available for inspection. I further agree that permission for copy of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor Associate Professor Norasifah Ahmad, in absence, by the Dean of College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without any written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from this thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Dean,

College of Business,

Universiti Utara Malaysia,

06010 UUMSintok,

Kedah Darul Aman.
ABSTRACT

The study looks into the way in which tax evasion could be a problem to the government of Algeria. The study is based on looking into four variables that will be used to see or analysis how organizations and people how are in Algeria are evading tax. The four variables that are mentioned in this study are penalties, tax rate, education, and confidence in government of any country that will be responsible for making sure that each and every citizen of a country pays his or her own tax charges. The reason why these four variables where selected is that they were noted as the major variables that are leading to people and companies in Algeria not abiding by the regulatory authorities that are responsible of collecting tax. This were the contributing factors to many individuals not paying tax as they felt that the government is over charging them when it comes to paying tax and there are no penalties that are given to individuals or co-operations that are not paying their tax. The limitations that were noted are that accessing adequate information to actually see what is really happening in Algeria for people to evade tax.
ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and Most Merciful

All praise to Allah for all his blessing and guidance which provide me strength to face all
the tribulations and trials in completing this project.

My love and appreciation go to my parents, my brothers Ali, Massoud, Salem, Noradine
and Abdulalim and my sisters who instilled in me the value of hard work and dedication.
The innumerable sacrifices which they have made for me are something for which I will
always be grateful. I would like to convey my grateful thanks to my supervisor Associate
Professor Norafifah Ahmad who also had been giving me support and advice for the
completion of this project. She had spent a lot of her time patiently and painstakingly
giving and valuable information, correcting errors, just to ensure the best effort has
been given in the completion and achievement of this study. Needless to say, I could not
have completed this study if it's not been for her admirable diligence and
resourcefulness. Without the intelligent idea and guidance from her this study will not
exist at all. My thanks also go to Dr. Sameer Al-shaikh and Dr. Imhemad Abdusalim
Almahdi Imhemad alzwen, Mr. Mahfoudh Abdulkarem AlMusali and Mr. Mohammed
Abdulkarem Mohammed Alrezaki who have helped me to the completion of this
thesis. May Allah bless them all.

I would like to thank to all MSc (International Accounting) lecturers, for outstanding
accounting knowledge during knowledge building time.

My sincere appreciations are given to my beloved mother and family members for their
patience, prayers and understanding over the entire period of my study.

CHAPTER 1

OVERVIEW OF THE RESEARCH

1.1 Introduction

Tax evasion is the illegal practice where a person, organization or corporation intentionally avoids paying his or her or its true tax liability and those that are caught evading the taxes will be generally subjected to criminal charges and any substantial penalties will be charged on them (Engel et al 1998). There are also differences between tax minimization, avoidance and tax evasion; all citizens have the right to reduce the amount of tax they pay as long as it is legal means so that they won’t face the problems with the tax authorities.

This paper looks into ways or factors that could be adopted in trying to find out what really can be done in solving the major problems that are being faced when it comes to tax evasion in Algeria. There will be considerable amount of time that will be spend in trying to find out how well will the government of Algeria be able to stop or reduce the tax evasion taking place in Algeria. The different solutions that could be used mitigated and solve the problems concerning tax evasion which is one of the major problems in Algeria that the tax authorities have raised and should be looked into.

1.2 Background information

The tax evasion is a phenomenon that affects all societies without exception it is illegal and anathema to all legislation. According to Nurtegin (2008) “tax evasion has been recognized as a serious social malady to an extent of causing staggering” which is a
