PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirement for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor, or, in absence, by the Assistant Vice Chancellor of College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain should not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for the grant of permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Assistant Vice Chancellor of College of Business

AKNOWLEDGEMENTS

In the Name of Allah, the Most Gracious and the Most Merciful. Above others, my praise to Allah S.W.T, whose blessing and guidance have helped me to get through the entire project. Peace be upon our Prophet Mohammed S.A.W. who has given light to mankind. My highest and most sincere appreciation goes to my beloved parents who have always encouraged and guided me to be independence and never try to limit my aspirations.

I am very grateful to my supervisor Professor Dr. Noor Azizi Ismail for his guidance, patience, understanding, insight, knowledge, attention, kindness and encouragement throughout my Master of International Accounting in Universiti Utara Malaysia. Words alone cannot express my greatest appreciation and gratitude to him. May Allah reward him abundantly.

My deepest appreciations also go to the lecturers who taught me well during my studies in Universiti Utara Malaysia, among others, Professor Dr Mahamad Tayib, Professor Zakaria Abas, Associate Professor Dr Kamil Md Idris, Dr Shamharir Abidin and Dr Shahmir Abdullah. Last but not least, a very special thanks to all my beloved family members who are very patient and supportive to me over my entire study journey. Finally, thank you so much, to all the MSc International Accounting lecturers, members of the Faculty and my friends. Thanks again to everyone including those who I have probably forgotten to mention here.

Abstract

Extensible Business Reporting Language (XBRL) is an important new technology for the electronic communication of business and financial data. XBRL will be more important in the future because of the many advantages it offers. Academic and professional researchers are getting more interested to investigate issue relating to XBRL. However, research results from South Africa, Australia and the USA showed unacceptably low levels of awareness and understanding of XBRL among practitioners. This study examined the levels of awareness and understanding of XBRL among accounting and finance lecturers in Universiti Utara Malaysia (UUM). Findings from the study indicate a low level of XBRL awareness and understanding among accounting and finance lecturers in UUM. Results from the survey show that, while 75% of respondents said “they have heard” of XBRL, only 27% of them are fully aware of this technology. Despite that, a majority of the respondents acknowledged the fact that it was necessary for them to investigate issues relating to XBRL in the near future.

Key words

Extensible Business Reporting Language (XBRL), lecturers, financial reporting, information technology
CHAPTER ONE
BACKGROUND OF STUDY

1.1 Introduction

The Internet and Information Technology (IT) are playing important role in our business life. Implementing new technologies, using new software, bringing, adopting new innovations to the business is helping companies to make effective business decisions. Using Internet as a tool for communicating corporate information is becoming increasingly popular in companies. These companies are reporting their financial statement through the Internet as information to the various groups of external users and sharing information with them. Nowadays one of the new tools for reporting financial statement through the Internet is Extensible Business Reporting Language (XBRL).

XBRL is an electronic communication of business and financial data language developed to present financial statement on the Internet. The key advantage of this new "language" is that an identifying tag is applied for each individual item of data instead of treating them as a block of text.

Since the financial data is now tagged, it thus can be recognized by the recipient party's computer. Accountants, auditors, regulators and financial analysts use XBRL technology to present financial information in variety of ways in a fraction of a second. This technology eliminates the possibilities of human error during the re-keying of financial data. XBRL also allows flexibility while enhancing transparency and timely dissemination of relevant financial information.
