PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from the Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner in whole or in part, for scholarly purposes may be granted by my supervisor or in their absence by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Dean of Graduate School
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darul Aman.
ABSTRACT

This study is part of a larger study to explore and community, Factors that affect the organizational culture and adoption of information systems for the oil in Libya and banking sectors, And the results showed that there is a direct relationship between the positive and dimensions of societal culture, And the results showed that there were no differences in the community, Dimensions of culture between the two sectors covered in this study. This means that is affected by the adoption of the culture and community, Other factors that deserve investigation and future implication.
ACKNOWLEDGMENT

In the name of Allah, the Most Gracious and Most Merciful

First of all, I would like to extend my deepest and humble gratitude to my promoter and I am thankful to kindly supervisor Mr. Shahmir Abdullah for giving me the chance to conduct my Project under his supervision and the valuable advices and fruitful guides during the period of consultations. I am very much indebted to my family for helping me to join and register in Universiti Utara Malaysia and for encouraging me to do my master. I am also thankful to all my friends and staff in Universiti Utara Malaysia, especially from the college of Business for their help, support and encouraging me in my study.

CHAPTER ONE

CHAPTER ONE: OVERVIEW OF THE RESEARCH

1.1 Introduction

Information Technology (IT) has revolutionaries the way in which accountants work when it comes to using technology in preparing the books of accounting in such a way that work that used to be carried out by many people working within any organization has been reduced to few worker. Advances in IT transformed many firms in professional service industries and especially when looking into Tripoli in Libya the professionals in public accounting industries have been transformed. Once a slow paced and conservative industry, accountants underwent tremendous changes at the turn of the millennium sparkling large rapid changes in the way information technology is viewed when carrying out business transactions in accounting Elliott, R. (2000). Many accounting professionals have been experiencing different changes and tremendous growth over the past century, fortunately due to unethical accounting practices there has been an increase need for advanced technology of accounting system in order to better monitor what is going on with an organization especially in Libya. The information technology has revolutionized the way accountant work once a job that would require many accountants to tackle can now be easily done by a single person with a computer.

1.2 Background

With the introduction of information technology into the human lives no one ever thought that the effects of technology changes in IT would have such effects on all the aspects of the human life, this has also lead to affecting the accountants whether positively or negatively in carrying out business transactions. The introduction of information system into the banking
