ABSTRACT

This study has identified to what extent the impact of organizational performance of suppliers and vendors by absorbing quality management system ISO 9001. Moreover, this study also determines the organizational performance of suppliers and vendors before and after adopting the ISO 9001 quality management system (QMS). Especially the research framework was developed from a case study conducted at Motorcycle and Engine Nasional Sendirian Berhad (MODENAS) as the supplier for a total of 97 companies working as vendors for MODENAS. The data was collected from several sources, including primary and secondary data, which included monitoring vendors’ performance. The results have indicated that significant improvements of supplier organization performance such as productivity results had increased to 80 percent: Straight Pass had increased to 87 percent: Warranty claims had fallen to 0.12 percent. In conclusion, this study provided insight and further understanding on how other sector could adopt ISO 9001 quality management system into their vendors that would provide better organizational performance.

CHAPTER 1: INTRODUCTION

1.0 Introduction

The purpose of this introductory chapter is to give some overviews of the research context. It begins with some explanations of the research background, followed by the problem statement and the research objectives.

1.1 Research Background

The quality of the product is becoming an essential to customer satisfaction and also as a competitive advantage as a success factor for all sizes of organizations (Huarng et.al, 2000). And according to Deming, (1982) the future of the organisation depends on attaining higher quality levels through quality activities such as continuous improvement, data collection, improving products and able to measure customers satisfaction.

Furthermore, the implementation of ISO 9001 quality management system can improve the quality and organization performance, (Tsiotras et.al, 2002). Many researchers have found the benefits of implementing ISO 9001 quality management system into an organization so that they can achieve the targets, such as quality improvement, corporate image, marketing advantages (Corbett et. al., 2003), and customers satisfaction, quality products and services and productivity improvement (Jones and Arnot, 1997). As well as increase client satisfaction,
