## **PERMISSION TO USE**

In presenting this report in partial fulfilment of the requirements for a postgraduate degree from University Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this report in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor Associate Professor Dr. Wan Rozaini binti Sheik Osman, or, in her absence by the Dean of Postgraduate Studies and Research.

It is understood that any copying or publication or use of this report or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my report.

Requests for permission to copy or to make other use of materials in this report, in whole or in part, should be addressed to

## ABSTRAK

Di masa lalu pembuli selalu mengganggu pelajar di sekolah dan di mana pun mereka boleh. Kini, pembuli mempunyai alternatif baru untuk membuli: ruangan siber. Perkataan berbaur lucah disebar melalui e-mel, yang dipasang pada Laman Jaringan Sosial (SNS) dan dihantar sebagai mesej teks. Kegiatan-kegiatan negatif tersebut dikenali sebagai *cyberbullying*. Disebabkan ini merupakan trend baru khususnya di Malaysia, fokus utama dari kajian ini adalah untuk meningkatkan kesedaran pelajar tentang *cyberbullying* dengan menggunakan *Persuasive Technology*. Kajian ini ditujukan untuk pelajar sekolah menengah. Metodologi yang akan digunakan adalah tinjauan (persoalan kajian), *Facebook Group “CyBIC”* (sebagai *Persuasive Technology*), dan forum yang melibatkan pensyarah dan pendidik, pelajar UUM, pelajar sekolah, pakar IT (Cyber Security Malaysia) dan kaunselor. Harapan dari projek ini adalah bahawa kesedaran fenomena *cyberbullying* akan diperluaskan ke sekolah-sekolah di Malaysia serta institusi pendidikan lain juga.

Kata kunci: *cyberbullying*, *Persuasive Technology*, perilaku, Laman Jaringan Sosial (SNS), Facebook

## ABSTRACT

In the past bullies always disturb children in schools and wherever they can. Presently, bullies have a new site for bullying: cyber space. Nasty chat are spread through e-mail, posted on Social Networking Sites and sent as text messages. These negative activities are known as cyber bullying. Since this is a new trend especially in Malaysia, the main focus of this research is to raise the awareness of students concerning cyberbullying by using Persuasive Technology. It is aimed at secondary school students. The methodologies that will be used are survey (questionnaire), Facebook group *CyBIC* (as Persuasive Technology), and a forum (involving lecturers and educators, UUM students, school students, IT expert (Cyber Security Malaysia) and counsellor). The expectation of this project is that the awareness of cyberbullying phenomenon will be raised in Malaysian schools and perhaps other educational institutions as well.

Keywords: cyberbullying, persuasive technology, behaviour, social networking sites, Facebook

## ACKNOWLEDGMENTS

**In the Name of ALLAH, the Most Gracious and the Most Merciful**

There really is no way to make it through your project without a lot of help, encouragement, and a few reality checks. No one has helped more in all three of these areas than my project supervisor, Associate Professor Dr. Wan Rozaini binti Sheik Osman. Thank you so much Dr. Wan for helping to guide me through this process and for all your wonderful feedback along the way. I would also like to thank my co-supervisor Pn. Syamila Zakiyah binti Abd. Wahab and my evaluator En. Muhammad Shakirin bin Shaari. The extensive reviews of my proposal and project have been invaluable and help with formatting was much appreciated.

The STIZ6996 Masters Project paper brought me through some excellent agendas that enriched my knowledge base and guided me towards work on my project. I would like to thank Dr. Wan for helping to prepare me for what was to come in my project writing and taking the time to get me ready for that experience.

Finally, I would like to thank my family, friends and students for all their love and encouragement along the way. I would also like to thank my wife and children for putting up with the craziness of deadlines.

# **CHAPTER ONE**

## **INTRODUCTION**

### **1.0 Introduction of the Study**

First and foremost, this study provides an inclusive overview of cyberbullying; the problems caused by cyberbullies on the Internet and mobile phones. This study also holds ample background explanations of the research, problem statements, and research questions along with its objectives, significance of the research, research scope, problems, limitations and suggestion for future research. All the subtopics will be described in an overall review of this particular chapter. Together with that, this study simultaneously discovers persuasive technology, a new area of research that has the potential to assist in raising awareness of cyberbullying and other educational related issues as well. Persuasive computing technology is a computing system, device, or application intentionally designed to change a person's attitude or behaviour in a predetermined way (Fogg, 2003). For introduction, we will have a look at the web, Web 2.0, Social Networking, Social Network Sites and cyberbullying problem.

In 1989, Tim Berners-Lee invented the web and began the modern Internet era. The Internet is viewed as an 'irreversible innovation' of enhanced digital connectivity (Hoffman, 2004). The Internet refers to the entire connection of interconnected networks around the world that share a common addressing scheme (Fomenkov, at el.,
