PERAKUAN KERJA TESIS / DISERTASI
(Certification of thesis / dissertation)

Kami, yang bertandatangan, memperakukan bahawa
(We, the undersigned, certify that)

PUGUH KARYANTO

Ph.D

calon untuk Ijazah
(candidate for the degree of)

telah mengemukakan tesis / disertasi yang bertajuk:
(has presented his/her thesis / dissertation of the following title):

"FACTORS AFFECTING THE ADOPTION OF SUSTAINABLE UPLAND AGRICULTURE AT LAWU MOUNTAIN, INDONESIA"

seperti yang tercatat di muka surat tajuk dan kulit tesis / disertasi.
(as it appears on the title page and front cover of the thesis / dissertation).

Bahawa tesis/disertasi tersebut boleh diterima dari segi bentuk serta kandungan dan meliputi bidang ilmu dengan memuaskan, sebagaimana yang ditunjukkan oleh calon dalam ujian lisan yang diadakan pada : 30 Jun 2010

That the said thesis/dissertation is acceptable in form and content and displays a satisfactory knowledge of the field of study as demonstrated by the candidate through an oral examination held on: 30 June 2010

DECLARATION

I hereby declare that the thesis is based on my original work except for quotations and citations which have been acknowledged. I also declare that it has not been previously submitted for any degree at Universiti Utara Malaysia or other institution.

PUGUH KARYANTO

Date: Oktober 2010

PERMISSION TO USE

In presenting this thesis in fulfillment of the requirement for the degree of Doctor of Philosophy from University Utara Malaysia, I agree that the University Library may take it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor Prof. Dr. Mohammad Hanapi Mohammad, or in his absence, by the Dean of College of Law, Government and International Studies. It is understood that any copying or publication or use of this thesis or part thereof for financial gain shall not be allowed without my written permission. It is also understood that due to recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which be made of any material from my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part should be addressed to:

Dean of College of Law, Governmental and International Studies
University Utara Malaysia
06010 Sintok
Kedah Darul Aman
Malaysia

ABSTRACT

Sustainability in upland agriculture has faced a great challenge since a balance must be sought between environmental protection and economic orientation. Towards sustainable upland agriculture, stakeholders must perform particular strategies that address the economic orientation of the agriculture without compromising the upland conservation efforts to maintain the critical ecological properties of the upland. At the study site, organic farming and some other forms of environmentally friendly agriculture has been promoted as strategies that are in line with the idea of sustainable upland agriculture. However, despite the promotion of these green strategies, the upland farmers at the study site are still suffered from adopting these sustainable agricultural practices. This case shows that the diffusion of sustainable upland agriculture has faced many obstacles. Yet, this research is aimed to observe factors behind the poor diffusion of sustainable upland agriculture.

Framework for assessing linkage between capacity/incentive and natural resource degradation and the Driving Force-Pressure-State-Impact-Response Framework (DPSIR) were used in combination in this research. The capacity was translated into five types of livelihood asset *i.e.* social, human, financial, natural and physical capital. The incentive was translated into the governmental incentive and market signal. Both the capacity and incentive were proposed as predictors for the extent of adoption of sustainable upland agriculture. Stratified random sampling was the sampling technique used in this research. The data was collected by applying questionnaire upon 408 farmers. By using SPSS released 16.5, the obtained data was analyzed by the multiple-linear regression analyses.

The obtained R square from the regression analysis is 0.649 with the F statistic less than 0.05. The regression model did a good job in explaining relationship between the proposed predictors and the independent variable. All predictors except the market signal are significantly associated with the dependent variable. According to the value of the beta standardized coefficient, the Incentive is the major predictor in affecting the diffusion and adoption of sustainable upland agriculture. Ensuring the profitability of performing sustainable upland agriculture by building good market channel, providing credit and, allocating subsidy for the organic input are considered as critical. Buildings strong human capital in agriculture by providing assistances, trainings and guidance are also become one of important actions to improve the upland farmers' confident to adopt sustainable upland agriculture.

AKNOWLEDGEMENTS

First I'd like to say Alhamdulillah, my thankfulness to Allah Subhannahu Wa Ta'alaa, to Him only I dedicate whole of my life.

Second, my deepest gratitude goes to my beloved wife, Khoirina Dwi Nugrahaningtyas, for her support that goes much beyond this research, for her love and mainly for sharing life with me. Thanks and loves to my children 'Abidah, 'Aisyah, Rasyad and Rasyid, that have lightened up my live. Thanks and love to my beloved mother Sijem, my father Pardan Sastra Sasmita; *Allahumagfirlii waliwalidayya warhamhumma kamaa rabbayaanii shaghiira.* May Allah bless you with his mercy and take care of you with his great love. Thanks to my father in law Bedjo Mulyono and my mother in law Siti Syamsiyah for your prays and supports. Thanks to my brothers Agus Supadiyo, Brojol Supadmono Aris Sumartono and my sistesr Purwanti, Tri Rubiyati and Eti Sarwiyatni for your many ways of supports.

I would like particularly to thank Prof. Dr. Mohammad Hanapi Mohammad and Assoc. Prof. Dr. Fariza Hashim, who have supervised this research with expertise, advice, and even more by his friendly support. Many thanks to Prof. Dr Suntoro Wongso Atmodjo, Prof Dr Shalihuddin Djalal Tandjung, Drs Yulius Slamet, Rahayu, M.Si, Drs Triyono, MS for your advice.

Thank you very much to Dr. Razib Arshad (external examiner), Assoc. Prof. Dr. Mohammad Basir Saud (internal examiner), Prof. Dr. Abdul Rahman Abdul Aziz (Chairman), Assoc. Prof. Dr. Rusniah Ahmad (Dean) and Dr. Bashawir Abdul Ghani for your encouragement and support of this project. Thanks also to Rector of UNS Prof. Dr. H. Moch. Syamsulhadi Sp.Kj, Prof. Dr. Ravik Karsidi, MS (Vice rector for academic affairs) and Prof. Dr. M. Furqon Hidayatullah, M.Pd (Dean of Faculty of Teacher's Training and Education) for the given facilities, thanks to my colleagues at Faculty of Teacher's Training and Education (FKIP) Universitas Sebelas Maret for all supports.

Thanks to all my “friends in struggle”, all my fellow graduate students particularly Najib Imanullah, Marsusi, Ropangi, Ahmad Adib for sharing everything in sadness and happiness.

Thanks to my students Joko Suryanto, Risang, Puji, Nurmi, Murni, Anis and Dita for many ways of helping.

I own a great deal of the accomplishment of this work to over four hundred farmer at Lawu I have worked with during this research. Without their co-operation and willingness to help this research would not be possible. For the same reason, I also in debt with the local agricultural institution, the Departemen Pertanian Kabupaten Karanganyar and the person in charge at that department.

THANK YOU ALL

CHAPTER 1

INTRODUCTION

1.1 BACKGROUND

1.1.1 Sustainable Agriculture

Sustainable has the root word “sustain”. It is derived from the Latin word *sustinere*; *sus-* from below and *-tenere* to hold (Gold, 1999). Referring to that grammatical meaning, sustainability can be interpreted as to handle something to keep it exist for the unlimited of time. As pertained to agriculture, sustainable agriculture then can be defined as a state when agricultural activity is handled to stay functional and productive for all the time. Functional means that agriculture must ensure its function, to allow the society to meet with their basic need. Productivity means that agricultural activity must be able to produce sufficient supply of food and fibre for the society along with its function. Towards sustainable agriculture, both function and productivity must be maintained without harming the environment.

Sustainable agriculture is an idea in agriculture that popularized after the widespread dissemination of Brundtlandt's report “Our Common Future” especially, after the publication of UN conference on the environment and development held in Rio de Janeiro 1992 (Azar *et al*, 1996). The Brundtlandt's report was the important starting point for the widespread popularization of

Petunjuk pengisian :

Isilah jawaban pada tempat yang disediakan dengan memberi lingkaran pada jawaban yang cocok atau dengan mengisi titik-titik yang telah disediakan.

BAGIAN I. IDENTITAS

Nama :
Umur :
Alamat : RT.....
RW/Kebayanan.....
Desa.....
Kecamatan.....
Pendidikan : Tidak Sekolah () SD () SMP ()
SMA ()
Perguruan tinggi ()
Perkiraan lama bertani :
Pekerjaan selain bertani :
Jumlah Tanggungan :
Status kependudukan : Asli () Pendatang ()
Perkiraan *income* keluarga perbulan :

Kepemilikan lahan (in meter square) :

1. Status kepemilikan lahan () Sendiri () Sewa () Keduanya ada
2. Total luas lahan yang digarap :

BAGIAN II
MODAL SOSIAL (SOCIAL CAPITAL)

RELATION OF TRUST

Untuk setiap pertanyaan:

- 1 Sangat tidak percaya
- 2 Sedikit percaya
- 3 Biasa
- 4 Percaya
- 5 sangat percaya

- | | | | | | |
|--|---|---|---|---|---|
| 1. Bagaimanakah kepercayaan saudara terhadap keluarga dekat
(Orangtua/suami/istri/anak) dalam pengambilan keputusan bertani | 1 | 2 | 3 | 4 | 5 |
| 2. Bagaimanakah kepercayaan saudara terhadap saudara jauh (ipar/sepupu, misan/dll)
dalam pengambilan keputusan bertani | 1 | 2 | 3 | 4 | 5 |
| 3. Bagaimanakah kepercayaan saudara terhadap tetangga dekat dan sejawaat petani
dalam pengambilan keputusan bertani | 1 | 2 | 3 | 4 | 5 |
| 4. Bagaimanakah kepercayaan saudara percaya terhadap orang asing Cina dan Arab
untuk berhubungan dengan mereka | 1 | 2 | 3 | 4 | 5 |
| 5. Bagaimanakah kepercayaan saudara percaya terhadap pemerintah pada tingkat Desa | 1 | 2 | 3 | 4 | 5 |
| 6. Bagaimanakah kepercayaan saudara terhadap pemerintah
pada tingkat Kecamatan/Kabupaten/Propinsi/Pusat | 1 | 2 | 3 | 4 | 5 |
| 7. Bagaimanakah kepercayaan saudara terhadap institusi (dinas) pertanian yang ada | 1 | 2 | 3 | 4 | 5 |
| 8. Bagaimanakah kepercayaan saudara terhadap para penyuluh pertanian | 1 | 2 | 3 | 4 | 5 |
| 9. Bagaimanakah kepercayaan saudara pada LSM bidang pertanian dan pedesaan | 1 | 2 | 3 | 4 | 5 |

RECIPROCITY AND EXCHANGE

Untuk setiap pertanyaan:

- ✓ 1 Tidak pernah
- ✓ 2 hampir tidak pernah
- ✓ 3 kadang-kadang
- ✓ 4 Hampir sering
- ✓ 5 Sering

1. Dalam setiap saling kunjung antara saudara dengan kerabat, seberapa sering membicarakan hal yang berkaitan dengan masalah pertanian	1	2	3	4	5
2. Dalam setiap saling kunjung antara saudara dengan tetangga seberapa sering membicarakan hal yang berkaitan dengan masalah pertanian	1	2	3	4	5
3. Dalam setiap saling kunjung antara saudara dengan teman di luar desa, seberapa sering membicarakan hal yang berkaitan dengan masalah pertanian	1	2	3	4	5
4. Seberapa sering anda berpartisipasi dalam kegiatan bersih desa atau sambutan untuk kepentingan sosial	1	2	3	4	5
5. Dalam satu tahun terakhir seberapa sering anda hadir pada pertemuan yang diselenggarakan pada tingkat desa (PKK, LMD, PNPM dan lain2)	1	2	3	4	5
6. Dalam satu tahun terakhir seberapa sering anda berpartisipasi dalam kegiatan kelompok tani lokal (RT)	1	2	3	4	5
7. Dalam satu tahun terakhir seberapa sering anda berpartisipasi dalam kegiatan antar kelompok tani pada tingkat di GAPOKTAN	1	2	3	4	5
8. Seberapa sering anda terlibat pada kegiatan di tingkat kecamatan atau di atasnya	1	2	3	4	5
9. Seberapa sering anda berbagi sarana produksi pertanian (misalnya Pupuk, bibit, atau peralatan tani) dengan petani lain	1	2	3	4	5

APPENDIX 1. RESEARCH QUESTIONNAIRE (In Indonesian language)

4

10. Dalam satu tahun terakhir seberapa sering anda memberikan sumbangan uang/barang/donor darah untuk kepentingan sosial

1 2 3 4 5

COMMON RULE, NORM AND SANCTION

Untuk setiap pernyataan:

- ✓ 1 Sangat tidak setuju
- ✓ 2 Tidak setuju
- ✓ 3 Antara setuju dan tidak setuju
- ✓ 4 Setuju
- ✓ 5 Sangat Setuju

1. Pemeritah hendaknya ikut berperan mengatur praktek-praktek pemanfaatan sumber daya alam (hutan, air dan tanah) untuk pelestariannya	1	2	3	4	5
2. Praktek pemanfaatan sumber daya alam (hutan, air dan tanah) Juga perlu diatur melalui kesepakatan masyarakat lokal setempat	1	2	3	4	5
3. Bersedia mengikuti program-program kerja pertanian yang dibuat pada tingkat Kelompok tani/GAPOKTAN/pemerintah desa	1	2	3	4	5
4. Bersedia mengikuti program-program pertanian yang turun dari pemerintah kecamatan/Kab/Negara	1	2	3	4	5
5. Bertani dilahan miring hendaknya memperhatikan usaha-usaha pencegahan, erosi tanah melalui terasering dan penanaman pokok kayu	1	2	3	4	5
6. Penggunaan pupuk kimia secara berlebihan dapat merusak tanah dan mencemari lingkungan	1	2	3	4	5
7. Penggunaan pestisida kimia dapat membahayakan diri dan konsumen	1	2	3	4	5
8. Lebih baik bertindak mengurangi input kimia dalam praktek bertani di lahan miring	1	2	3	4	5

APPENDIX 1. RESEARCH QUESTIONNAIRE (In Indonesian language)

6

CONNECTEDNESS, NETWORK AND GROUP

Untuk setiap pertanyaan:

- ✓ 1 Tidak pernah
- ✓ 2 hampir tidak sekali saja
- ✓ 3 Kadang-kadang /dalam frekwensi 2
- ✓ 4 Agak sering /dalam frekwensi 3 kali
- ✓ 5 Sering /lebih dari 3 kali

1. Dalam satu tahun terakhir, seberapa sering melakukan kontak dan komunikasi dengan saudara dekat **untuk mengagas beberapa hal menyangkut masalah pertanian** 1 2 3 4 5
2. Dalam satu tahun terakhir, seberapa sering melakukan kontak dan komunikasi dengan saudara jauh **untuk mengagas beberapa hal menyangkut masalah pertanian** 1 2 3 4 5
3. Dalam satu tahun terakhir, seberapa sering melakukan kontak dan komunikasi dengan tetangga-petani lokal **untuk mengagas beberapa hal menyangkut pertanian** 1 2 3 4 5
4. Dalam satu tahun terakhir, seberapa sering melakukan kontak dan komunikasi dengan petani dan organisasi petani di luar desa atau daerahnya **untuk mengagas beberapa hal menyangkut pertanian** 1 2 3 4 5
5. Dalam satu tahun terakhir, seberapa sering berkegiatan yang mencerminkan keinginan atas terbentuknya kelompok tani di desanya **atau berkegiatan yang mencerminkan usaha-usaha memajukan kelompok tani yang sudah ada** 1 2 3 4 5
6. Dalam satu tahun terakhir, seberapa sering anda aktif mengurus organisasi/lembaga tani di tingkat lokal 1 2 3 4 5
7. Dalam setahun terakhir, aktif mengurus organisasi/lembaga petani di tingkat GAPOKTAN atau Kecamatan 1 2 3 4 5
- 8 . Dalam setahun terakhir berpartisipasi aktif pada LSM yang berhubungan dengan pertanian 1 2 3 4 5

APPENDIX 1. RESEARCH QUESTIONNAIRE (In Indonesian language)

7

BAGIAN III MODAL MANUSIA (HUMAN CAPITAL)

Untuk setiap pertanyaan:

- ✓ 1 Tidak pernah
- ✓ 2 hampir tidak pernah (sesekali saja)
- ✓ 3 Kadang-kadang (dalam frekwensi 2 kali)
- ✓ 4 Sering (dalam 3 kali)
- ✓ 5 Selalu (rutin)

- | | | | | | | |
|-----|--|---|---|---|---|---|
| 1. | Dalam setahun terakhir apakah anda selalu merasa dalam keadaan sehat | 1 | 2 | 3 | 4 | 5 |
| 2. | Dalam setahun terakhir seberapa sering anda mengunjungi puskesmas/dokter/ahli medis untuk melakukan check up/perawatan pencegahan penyakit | 1 | 2 | 3 | 4 | 5 |
| 3. | Mengkonsumsi sumber karbohidrat (singkong/ kentang,/nasi) dalam 3 kali makan setiap hari | 1 | 2 | 3 | 4 | 5 |
| 4. | Mengkonsumsi lauk sumber protein (tempe/tahu/daging/ikan) dalam 3 kali makan setiap hari | 1 | 2 | 3 | 4 | 5 |
| 5. | Mengkonsumsi sayuran dan buah dalam 3 kali makan setiap hari | 1 | 2 | 3 | 4 | 5 |
| 6. | Dalam setahun terakhir, seberapa sering anda mendapat saran dari rekan tani/Penyuluh/LSM/Sponsor untuk mengurangi input kimia | 1 | 2 | 3 | 4 | 5 |
| 7. | Dalam setahun terakhir seberapa sering anda mendapatkan informasi dan penyuluhan bertani dari Penyuluh/Dinas/LSM/Sponsor lain | 1 | 2 | 3 | 4 | 5 |
| 8. | Dalam setahun terakhir seberapa sering anda mendapatkan penyuluhan mengenai bertani di lahan miring | 1 | 2 | 3 | 4 | 5 |
| 9. | Dalam setahun terakhir, seberapa sering anda mendapatkan penyuluhan tentang bertani organic | 1 | 2 | 3 | 4 | 5 |
| 10. | Dalam setahun terakhir, seberapa sering anda mendapatkan pelatihan bertani dari dinas pertanian/LSM/sponsor lain | 1 | 2 | 3 | 4 | 5 |
| 11. | Dalam setahun terakhir, seberapa sering anda mendapatkan pelatihan bertani secara organic | 1 | 2 | 3 | 4 | 5 |

BAGIAN IV MODAL FINANSIAL (Financial Capital)

Untuk setiap pertanyaan:

- ✓ 1 Tidak pernah
- ✓ 2 hampir tidak pernah
- ✓ 3 kadang-kadang
- ✓ 4 Sering
- ✓ 5 Selalu

1. Mempunyai uang tunai yang cukup untuk keperluan dasar sehari-hari setiap bulannya	1	2	3	4	5
2. Mempunyai tabungan (boleh dalam bentuk ternak) untuk keperluan mendesak setiap bulannya	1	2	3	4	5
3. Mempunyai cukup uang pribadi untuk modal bertani seperti yang biasa dilakukan	1	2	3	4	5
4. Memiliki kemampuan untuk membeli pupuk dan pestisida organic maupun kimia	1	2	3	4	5
5. Uang hasil penjualan panen dapat dijadikan sebagai modal bertani kembali	1	2	3	4	5
6. Hasil pertanian dapat mencukupi kebutuhan konsumsi keluarga sehari-hari	1	2	3	4	5
7. Uang hasil penjualan panenan yang dijual cukup untuk memenuhi kebutuhan keuangan keluarga sehari-hari setiap bulannya	1	2	3	4	5
8. Mempunyai sumber penghasilan lain dari selain bertani	1	2	3	4	5
9. Mempunyai anggota keluarga yang dapat bekerja dan membantu penghasilan Keluarga	1	2	3	4	5
10. Mendapatkan kemudahan pinjaman /kredit (Koperasi/Bank/) untuk modal bertani	1	2	3	4	5
11. Berada pada status tidak berhutang dengan tetangga	1	2	3	4	5
12. Dipandang sebagai warga kecukupan sehingga tidak menerima BLT atau bantuan lain	1	2	3	4	5

BAGIAN V MODAL SUMBER DAYA ALAM (NATURAL CAPITAL)

Untuk setiap Pernyataan:

- 1 Sangat tidak setuju
- 2 Tidak Setuju
- 3 antara setuju dan tidak setuju
- 4 Setuju
- 5 Sangat setuju

1. Air untuk bertani mudah didapatkan dan murah	1	2	3	4	5
2. Tanah pertanian yang saudara miliki adalah tanah yang subur	1	2	3	4	5
3. Lahan pertanian yang anda miliki hanya sesuai untuk tanaman pertanian tertentu	1	2	3	4	5
4. Mengetahui bahwa lingkungan pegunungan hanya memungkinkan jenis tanaman Tertentu untuk ditanam	1	2	3	4	5
5. Lahan pertanian anda yang miring mudah mengalami erosi	1	2	3	4	5
6. Lahan pertanian anda mudah kehilangan kesuburan	1	2	3	4	5
7. Jika diperlukan, anda tidak pernah kesulitan mendapatkan mulsa alami dan tanaman kayu untuk mencegah erosi/longsor	1	2	3	4	5
8. Anda selalu mudah mendapatkan pupuk kandang dan kompos secara cukup untuk lahan yang dimiliki	1	2	3	4	5

BAGIAN VI MODAL SARANA PRODUKSI ALAT dan INFRASTRUKTUR (PHYSICAL CAPITAL)

- 1 Tidak pernah
- 2 hampir tidak pernah
- 3 kadang-kadang
- 4 Sering
- 5 Selalu

1. Mempunyai kemudahan mendapatkan air dari saluran air	1	2	3	4	5
2. Mempunyai kemudahan akan sarana transportasi (jalan dan kendaraan) untuk menjual hasil pertanian	1	2	3	4	5
3. Terdapat agen/toko/koperasi yang menjual pupuk dan pestisida organic pabrikan yang mudah dijangkau	1	2	3	4	5
4. Menggunakan pupuk organic buatan pabrik pada setiap tindakan pemeliharaan	1	2	3	4	5
5. Menggunakan pestisida buatan pabrik pada setiap tindakan	1	2	3	4	5
6. Menggunakan peralatan bertani sederhana/bukan mesin yang dimiliki sendiri	1	2	3	4	5
7. Menggunakan mulsa plastik	1	2	3	4	5
8. Mampu melakukan manajemen lahan miring dengan menerapkan system teras, gulungan dan parit-parit untuk mencegah erosi tanah dan pelindihan hara	1	2	3	4	5
9. Mempunyai kemudahan mendapatkan alat/sarana untuk memroses hasil panen	1	2	3	4	5

BAGIAN VII INCENTIVES
Insentif Pasar (Market signal)

Untuk setiap pertanyaan/untuk item tertentu

- ✓ 1 Tidak pernah
- ✓ 2 hampir tidak pernah/dalam luasan sedikit sekali (misalnya hanya di pematang)
- ✓ 3 kadang-kadang/dalam luasan kurang lebih sepanjang lahan yang dimiliki
- ✓ 4 Sering/dalam sebagian besar luasan lahan yang dimiliki
- ✓ 5 Hampir selalu atau pada seuruhan lahan yang dimiliki

1. Mencari informasi mengenai harga terbaru	1	2	3	4	5
2. Mencari informasi mengenai komoditas pertanian yang sedang laku	1	2	3	4	5
3. Menanami lahan dengan pertimbangan penyesuaian jenis tanaman dengan pasokan, jumlah permintaan dan harga setelah panen	1	2	3	4	5
4. Menanami lahan dengan komoditas baru yang banyak diserap oleh pasar dan mendatangkan keuntungan	1	2	3	4	5
5. Menanam lahan secara non organik karena hasilnya lebih baik dan lebih mudah dipasarkan	1	2	3	4	5
6. Menanami lahan dengan komoditas pertanian yang hanya untuk dijual	1	2	3	4	5

BAGIAN VIII INCENTIVES
Insentif Pemerintah (Govermental signal)

Untuk setiap pertanyaan:

- ✓ 1 Tidak pernah
- ✓ 2 hampir tidak pernah
- ✓ 3 kadang-kadang
- ✓ 4 Sering
- ✓ 5 Selalu

Menurut anda apakah pemerintah :

- | | | | | | |
|---|---|---|---|---|---|
| 1. Mendukung sektor pertanian organic/ramah lingkungan dengan menyediakan, menambah dan memperbaiki infrastruktur pertanian (misalnya sistem air/ jalan/pasar/Koperasi) | 1 | 2 | 3 | 4 | 5 |
| 2. Menjaga suplai atau memberikan subsidi atas pupuk organic pabrik | 1 | 2 | 3 | 4 | 5 |
| 3. Melalui penyuluh, aparat desa atau kader, memberikan pengatahan mengenai pertanian upland | 1 | 2 | 3 | 4 | 5 |
| 4. Melalui penyuluh, desa, atau kader, mensosialisasikan pertanian organic dan standarisasi produk pertanian organik | 1 | 2 | 3 | 4 | 5 |
| 5. Pemerintah melalui penyuluh/desa/kader melakukan pelatihan yang berhubungan dengan pertanian organic atau bentuk pertanian ramah lingkungan yang lain | 1 | 2 | 3 | 4 | 5 |
| 6. Terdapat agen pemerintah/ institusi perguruan tinggi/LSM/Sponsor yang berperan mendampingi petani | 1 | 2 | 3 | 4 | 5 |
| 7. Pemerintah mengadakan training/pelatihan pengolahan hasil pertanian | 1 | 2 | 3 | 4 | 5 |
| 8. Pemerintah memberikan serangkaian kemudahan finansial untuk modal bertani dalam berbagai bentuk | 1 | 2 | 3 | 4 | 5 |
| 9. Menjamin pasar dan harga di tingkat petani agar petani organik terhindar dari resiko kerugian | 1 | 2 | 3 | 4 | 5 |

Bagian IX Variabel bergantung (Keputusan Bertani)

Pertanyaan mengungkapkan tingkat keseringan dalam 10 kali tanam

Untuk setiap pertanyaan:

- ✓ 1 Tidak pernah
- ✓ 2 hampir tidak pernah (sesekali saja)
- ✓ 3 kadang-kadang (dalam 2 kali)
- ✓ 4 Sering (absen dalam 2 kali)
- ✓ 5 Selalu

1. Menanami lahan dengan banyak jenis lahan yang sama (polikultur)	1	2	3	4	5
2. Melakukan tanam seling dengan tanaman kayu menahan secara agroforestri dalam system lorong/surjan (<i>alley cropping</i>)	1	2	3	4	5
3. Menanam sekaligus dengan banyak jenis tanaman (multiple cropping) secara tumpang sari (<i>intercropping</i>) ataupun tumpang gilir (<i>relay cropping</i>)	1	2	3	4	5
4. Mengurangi penggunaan pupuk kimia atau tidak memakai	1	2	3	4	5
5. Mengurangi pestisida kimia atau tidak memakai	1	2	3	4	5
6. Melakukan pengendalian hama secara alami, secara organik	1	2	3	4	5
7. Menggunakan pupuk dan pestisida kimia dengan pengetahuan mengenai takaran yang diperlukan	1	2	3	4	5
8. Menggunakan rabuk kandang atau kompos sebagai media dasar utama setiap kali tanam	1	2	3	4	5
9. Hanya menggunakan pupuk dan pestisida organik	1	2	3	4	5
10. Memberakan lahan untuk mengistirahatkan lahan dan mengembalikan kondisi lahan	1	2	3	4	5
11. Melakukan sistem teras yang tegak lurus kemiringan untuk mencegah erosi dan longsor pada setiap penanaman	1	2	3	4	5
12. Menggunakan mulsa alami/buatan untuk mencegah erosi	1	2	3	4	5
13. Menanam dengan tanaman keras untuk mengurangi erosi dan longsor	1	2	3	4	5
14. Menanam dengan tanaman penambat nitrogen Untuk menambah kesuburan tanah	1	2	3	4	5

APPENDIX 1. RESEARCH QUESTIONNAIRE (In Indonesian language)

14

ADDITIONAL INCENTIVE

Untuk setiap pertanyaan:

- ✓ 1 Sangat tidak setuju
- ✓ 2 Tidak Setuju
- ✓ 3 Antara setuju dan tidak setuju
- ✓ 4 Setuju
- ✓ 5 Sangat setuju

1. Pemerintah pusat mengetahui keberadaan petani kecil di Indonesia 1 2 3 4 5
2. Pemerintah pusat telah memberikan perhatian terhadap keberadaan petani kecil di Indonesia 1 2 3 4 5
3. Pemerintah pusat telah membantu dan memberdayakan petani kecil di Indonesia 1 2 3 4 5
4. Pemerintah pusat telah menetapkan strategi yang sesuai pada petani kecil di Indonesia 1 2 3 4 5
5. Pemerintah pusat berniat mewujudkan konsep pertanian berkelanjutan 1 2 3 4 5
6. Pemerintah telah menerapkan strategi yang tepat dan sesuai untuk berbagai Tipe tani dan berbagai tipe pertanian 1 2 3 4 5
7. Pemerintah mendukung gerakan bertani secara ramah lingkungan Atau bertani secara organic 1 2 3 4 5
8. Pemerintah cukup memberikan insentif bagi pengembangan pertanian Ramah lingkungan dan pertanian organik 1 2 3 4 5

APPENDIX 4 VILLAGE PROFILE

SEMI STRUCTURED INTERVIEW

1. Harmanto

The head of the division of extension agent, Department of Agriculture of Karanganyar.

The district of Karanganyar has planned organic farming as the main strategy of farming towards sustainable agriculture. Yet, Karanganyar has urged its farmer to reduce the use of chemical input and back to use organic input (manufactured or stocks of organic input from livestock and compost). To support the local government' programme of organic farming extension agent (the well-trained people in agriculture) graduated has been hired. Extension agent function mainly to serve all about the agricultural problem that faced by the farmers as well as to diffuse the programme that ran by the local government. In every sub district there is one co-ordinator for the extension agent that served to direct some extension agent under his responsibility. Joko Santoso is the co-ordinator for the sub district of Tawangmangu. There are two extension agent provided for the four upland villages. Sadi Mulyono is the co-ordinator for the sub district of Ngargoyoso. There are two extension agents (for two villages) under his responsibility. The main function of co-ordinator is to make report related to his tasks.

2. Warjono

Extension agent for Gondosuli, Blumbang and Kalisoro (Tawangmangu)

The local government has urged the upland farmer to back to organic farming due to the negative externalities of using chemical input towards the soil quality. The programme to back to organic farming is in the stage of socialization. Urging farmer to use the green manure and serving the farmer with training to produce green manure are the main activities besides performing common assistances such as giving the guidance of performing particular cultivation technique and giving information about pest control. However, despite efforts that have been conducted, the farmers are still suffered from performing organic farming. The problems are related to two main causes. First, there are only two or three extension agents that are responsible to cover many villages within the sub district. Hence, the extension agent is considered as overburdened making his work is considered as not optimum. Second is about the farmer's participation. Not all farmers become the member of the farmer group. If the assistance is available only at farmer group level, theses farmers will be excluded.

APPENDIX 4 VILLAGE PROFILE

3. Sriyono

Extension agent for Tengklik (Tawangmangu)

The organic farming that has been programmed by the local government has faced problem related with the low farmer's level of literacy. This low degree of literacy however, becomes a challenge that must be addressed by the extension agent.

4. Sadi Mulyono

Co-ordinator of the extension agent for Ngargoyoso

The extension agent has urged the upland farmer to conserve the steeper land and to reduce the use of chemical input. The main challenge is in changing farmer's behaviour as they are used to be familiar with the immediate and incredible effects of agricultural chemical input. As organic input still gives dissatisfaction results, farmer would be no longer interested with organic farming. The upland farmers also considered as unaware to conserve the steeper land due to their need to maximize the space for their commodities.

5. Sri Santoso

Farmer (opinion leader at Segoro Gunung)

The farmers possess a high degree of trust towards their families and neighbours and also trust towards the government and the NGO. As in many villages in Karanganyar, the upland farmers possess a very good social tie called '*gotong royong*' and '*sambatan*'. Credit for farmer is available, but as the farmers are subjected to the risk they are not interested to such credit. The chosen management whether environmentally friendly or not depend on the commodities and climatic condition. The local climatic condition has forced the farmer to use chemical pesticide due to the high prevalence of diseases.

6. Sutarno (Tengklik) and Suharsono (Blumbang)

Farmer (the *kader* or trained person)

The attitude to perform organic farming is low due to the low profitability to perform organic farming. In addition, the manufactured organic input is still considered as expensive.

APPENDIX 4 VILLAGE PROFILE

DISTRICT OF KARANGANYAR

Size area : 772,20 square kilometres
Upland Sub-Districts : Ngargoyoso and Tawangmangu

1. **NGARGOYOSO** (65,34 square kilometres)
Upland Village : Berjo and Segorogunung
Land farm size for horticultural commodities: 282 hectares

a. Berjo.

This village is located at the western part of Lawu, there are 2 sub villages that are consider as upland, Berjo and Tlogo. At these sites, most of the agricultural commodities are cabbage, carrot, shallot and peas. The local farmers say their land as *lemah gemblung*, which is considered as less fertile. Farming commodities less varied. The farmers have performed a good multiple cropping strategy, the *tumpang sari*. Actually, they have less depended upon chemical fertilizer. Most of them have livestock. They have used livestock fertilizer, even they do not know to process their livestock manure into good fertilizer. Urea and TSP are the most fertilizer used there. There is no assistance from NGO and Extension agent. There is no farmer group there. Observations show that most farmers in this village are considered as poor. They heavily depend on land and forest.

b. Segorogunung

This village is located at the north side of Lawu. The NGO has assisted the farmers in this village (The LPTP). The extension agent has also available to give assistance. Farmer group are identified. There are three companies (Indofood, Acidatama and BPR Binsani) offered an agricultural co-operation to farmers to cultivate potato and garlic. Indofood is the supplier for the seed stock as well as the buyer for the harvested commodities; Acidatama is the the supplier for the manufactured organic fertilizer; whereas BPR Binsani is the credit provider. Farmers in this village have better welfare than in Berjo. They begin to look for other job opportunities from their surrounding municipal.

APPENDIX 4 VILLAGE PROFILE

2. KECAMATAN TAWANGMANGU (70,03 km 2) :

Upland villages : Tengklik, Kalisoro, Blumbang, Gondosuli
Land farm size for horticultural commodities 339.5 hectares

a. Tengklik

This village is separated to Berjo only by small hill, Cempurung. However, the land type is slightly different. In Tengklik farmers called their land as *lemah greges* which is considered as more fertile than the *lemah gemblung* in Berjo. Extension agent is less active. There is no NGO assistance. Farmer group are recognized with a routinely meeting (every 35 days). As in Segorogunung, the farmers in this village have better welfare than in Berjo. They begin to look for another job opportunity from their surrounding municipal.

b. Kalisoro

This village is located upward from Tengklik. Extension agent is less active. Booming of onion at 1990 has made the farmers in this village are considered as has a good welfare. Many of them invested their financial capital in many non-agricultural sectors. Many farmers in this village are successful businessperson in non-agricultural sectors. Many of them are civil servant. The financial capacity in this village is categorized as good. Many other job opportunities related with tourism is also available. Most of them have begun to be less depending on land and forest. There is no NGO assistance. In this village a new commodity is introduced, the strawberry.

c. Blumbang

Blumbang and Kalisoro are considered as twin village. The farmers in these two villages are regarded as similar. In Blumbang, NGO and extension agent is more active than in other villages within the study site. Organic farming is initiated in this village. There are two prominent farmer groups, the POKJA KTB (*Kelompok Kerja Kelompok Tani Blumbang* or the working group of farmer at Blumbang) and the Puspahati. POKJA KTB is more focused on the post harvesting technology whereas Puspahati is more focused on organic farming. Not all farmers become the member of both farmer groups.

d. Gondosuli

Gondosuli is the highest village. Many natural limitations can be found there, such as the lack of water and the extreme of temperature. The economic capacities of most farmers are moderate. Poor farmer prefer to cultivate in the way most upland farmer do. Rich farmer prefer strawberry as it provides better income. NGO assistance is absence. Extension agent is considered as less active to serve with assistance.

APPENDIX 4 VILLAGE PROFILE

SEMI STRUCTURED INTERVIEW

1. Harmanto

The head of the division of extension agent, Department of Agriculture of Karanganyar.

The district of Karanganyar has planned organic farming as the main strategy of farming towards sustainable agriculture. Yet, Karanganyar has urged its farmer to reduce the use of chemical input and back to use organic input (manufactured or stocks of organic input from livestock and compost). To support the local government' programme of organic farming extension agent (the well-trained people in agriculture) graduated has been hired. Extension agent function mainly to serve all about the agricultural problem that faced by the farmers as well as to diffuse the programme that ran by the local government. In every sub district there is one co-ordinator for the extension agent that served to direct some extension agent under his responsibility. Joko Santoso is the co-ordinator for the sub district of Tawangmangu. There are two extension agent provided for the four upland villages. Sadi Mulyono is the co-ordinator for the sub district of Ngargoyoso. There are two extension agents (for two villages) under his responsibility. The main function of co-ordinator is to make report related to his tasks.

2. Warjono

Extension agent for Gondosuli, Blumbang and Kalisoro (Tawangmangu)

The local government has urged the upland farmer to back to organic farming due to the negative externalities of using chemical input towards the soil quality. The programme to back to organic farming is in the stage of socialization. Urging farmer to use the green manure and serving the farmer with training to produce green manure are the main activities besides performing common assistances such as giving the guidance of performing particular cultivation technique and giving information about pest control. However, despite efforts that have been conducted, the farmers are still suffered from performing organic farming. The problems are related to two main causes. First, there are only two or three extension agents that are responsible to cover many villages within the sub district. Hence, the extension agent is considered as overburdened making his work is considered as not optimum. Second is about the farmer's participation. Not all farmers become the member of the farmer group. If the assistance is available only at farmer group level, theses farmers will be excluded.

APPENDIX 4 VILLAGE PROFILE

3. Sriyono

Extension agent for Tengklik (Tawangmangu)

The organic farming that has been programmed by the local government has faced problem related with the low farmer's level of literacy. This low degree of literacy however, becomes a challenge that must be addressed by the extension agent.

4. Sadi Mulyono

Co-ordinator of the extension agent for Ngargoyoso

The extension agent has urged the upland farmer to conserve the steeper land and to reduce the use of chemical input. The main challenge is in changing farmer's behaviour as they are used to be familiar with the immediate and incredible effects of agricultural chemical input. As organic input still gives dissatisfaction results, farmer would be no longer interested with organic farming. The upland farmers also considered as unaware to conserve the steeper land due to their need to maximize the space for their commodities.

5. Sri Santoso

Farmer (opinion leader at Segoro Gunung)

The farmers possess a high degree of trust towards their families and neighbours and also trust towards the government and the NGO. As in many villages in Karanganyar, the upland farmers possess a very good social tie called '*gotong royong*' and '*sambatan*'. Credit for farmer is available, but as the farmers are subjected to the risk they are not interested to such credit. The chosen management whether environmentally friendly or not depend on the commodities and climatic condition. The local climatic condition has forced the farmer to use chemical pesticide due to the high prevalence of diseases.

6. Sutarno (Tengklik) and Suharsono (Blumbang)

Farmer (the *kader* or trained person)

The attitude to perform organic farming is low due to the low profitability to perform organic farming. In addition, the manufactured organic input is still considered as expensive.
