The factors impact information technology adoption among employees at tax authority of Yemen

A thesis submitted to The Facility of Business Management in partial fulfillment of the requirements for the degree of Master of Business Administration

Gamal Abdullah Al-Douis

College of business
University Utara Malaysia
KOLEJ PERNIAGAAN  
(College of Business)  
Universiti Utara Malaysia

PERAKUAN KERJA KERTAS PROJEK  
(Certification of Project Paper)

Saya, mengaku bertandatangan, memperakuan bahawa  
(I, the undersigned, certified that)  
GAMAL ABDULLAH AL-DOUIS (801169)

Caion untuk ijazah Sarjanamuda  
(Candidate for the degree of) MASTER OF BUSINESS ADMINISTRATION

telah mengemukakan kertas projek yang bertajuk  
(has presented his/her project paper of the following title)

THE FACTORS IMPACT INFORMATION TECHNOLOGY ADOPTION AMONG EMPLOYEES AT  
TAX AUTHORITY OF YEMEN

Seperti yang tercatat di muka surat tajuk dan kuit kertas project  
(as it appears on the title page and front cover of the project paper)

Bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan dan meliputi bidang ilmu  
dengan memuaskan.  
(that the project paper acceptable in the form and content and that a satisfactory knowledge of the field is  
covered by the project paper).

Nama Penyelie  
(Name of Supervisor) : DR. FAIS AHMAD

ABSTRACT
Information is powerful. This great statement led to do this research by seeing information technology power in developing several countries such as Malaysia. Due to the increased organizational dependence on information systems and technology, most of today's organizations and governments have plans to implement information technology in all of their job processing and communication tools.

This study aims to describe the current state of information technology adoption among employees in Tax Authority of Yemen and to find the relationship with complexity, compatibility, and relative advantages. To deepen the analysis, reliability test has been done, then, study used liner regression to test the hypothesis. Moreover, descriptive statistics was computed to describe the current state of information technology adoption by using tables, charts and graphs to present the findings in an understandable manner. As a result of the study relative advantages has the highest relationship, then compatibility, and complexity.

This research provided some recommendations through its results both can help the top management of tax authority of the Republic of Yemen push growing of information technology implementation.
ACKNOWLEDGEMENT

First of all, thanks to Allah SWT, who with His willing has given me the capability to complete this project. All Praise and Gratitude is due to Allah, the most Beneficent, the Most Merciful, for without Him, everything will cease to be, and peace and blessing upon our beloved Prophet Mohammad.

I would like to express my sincere gratefulness to my supportive and helpful supervisor, Dr. Fais Ahmad for his encouragement, support and guidance to complete this paper and overcome the challenges behind it.

Besides I would further like to express my gratitude to the authority of Utara University Malaysia (UUM) for providing me and all students with a good environment and facilities to acquire knowledge. Also, I would like to take this opportunity to thank to the College of Business (COB) including all lecturers who taught me during the whole MBA program study period.

I wish to convey my deep appreciation to Mr. Noman Alsohibi and Mr. Ahmad Galeb for continues support.

A special thanks goes to my friends who helped in any way in the completion of this project. Mr. Hamdan Amer Aljaefi and Abdo Ali Homaid are the most helpful persons. I am grateful to all those who helped in making this study possible.
My deepest appreciation goes to my family who shared with me both the joy and frustration during my study in Malaysia. I specially dedicate my gratitude to my father who taught me how to respect others and live with his moral support along my lifetime. Moreover, my cheerful gratitude is also addressed to my dear mother for her motivation, dedication and indescribable love. Both of them were the secret behind my success. Their prayers lightened the darkness of my life. My brothers and sisters cannot be ignored; words and expressions won’t be sufficient to describe their role in my study life. Last but not least, I offer my demonstrative appreciations to my wife and children who understood my commitment and were always the source of my inspiration.

**Chapter One: Introduction**

1.1 Introduction

1.2 Background of Study

1.2.1 Republic of Yemen's Background

1.2.2 Communication and Information Technology in the Republic of Yemen

1.3 Problem Statement

1.4 Research Question

1.5 Research Objective

1.6 Justification of Research (Research Gap)

1.7 Scope of Study

1.8 Significance of Study

1.8.1 Operational definition

1.8.2 Limitation of the study

1.9 Organization of the study
CHAPTER TWO LITERATURE REVIEW

2.1 Introduction 12
2.2 Information technology in Yemen 16
2.3 Information technology in tax authority of Yemen government 17
2.4 Diffusion of Innovation Theory 19

CHAPTER THREE RESEARCH METHODOLOGY

3.1 Introduction 24
3.2 The research design 24
3.3 Population and sample 25
3.4 Hypothesis 26
3.5 Data Analysis Method 27

CHAPTER FOUR : ANALYSIS AND RESULTS

4.1 Introduction 28
4.2 Overview of the collected data 28
4.3 Response Rate of the study 29
4.4 Analysis on Demographic Characteristics 29
4.5 Profile of respondents 30
4.5.1 Gender of participants 30
4.5.2 Age of participants 31
4.5.3 Education of participants 32
4.5.4 Occupation of participants and there level in the organization 33
4.5.5 Period of work at government 34
4.5.6 Computer usage in job 35
4.5.7 Computer usage in job 36
4.5.8 Goodness in internet usage 37
4.6 Descriptive analysis for data used 39
4.8 The reliability test 63
4.9 Hypothesis testing 64
4.9.1 Compatibility and adoption of information technology hypotheses testing 64
4.9.2 Complexity and adoption of information technology hypotheses testing 65
4.9.3 Relative advantage and adoption of information technology hypotheses testing 66
4.10 Regression Results 67
4.10.1 Compatibility and adoption of information technology 67
4.10.2 Complexity and adoption of information technology 68
4.10.3 Relative advantage and adoption of information technology 68

CHAPTER FIVE DISCUSSION, CONCLUSION, AND RECOMMENDATIONS

5.1 Introduction 70
5.2 Summary of findings 70
5.3 Recommendation for future research 72
5.4 Conclusion 73

CHAPTER ONE

INTRODUCTION

1.1 Introduction

Information is powerful. Information is useful in telling an organization how its current operations are performing and estimating and strategizing how future operations might perform. (Baltzan & Philips, 2009).

Information is everywhere in and around the organizations, however, managing it successfully, and how and when it can be gotten helps managers in top management as well as in several positions to take the right decision. Therefore, they must get the right information in the appropriate time with an appropriate form.

Information is considered as an organization asset. It is widely acknowledged that organizations increasingly depend on information technology (IT) for the execution of a variety of operational, tactical, and strategic processes (Applegate et al. 2003).

Governments around the world like the United States, Singapore, Canada, and United Arab Emirates have succeeded in implementing e-government, and, as a result, have gained many benefits; some of these benefits are shown below:

- Simplifying delivery of services to citizens
- Minimizing the government bureaucracy
- Improved interactions among government units and with business, industry and citizens
- Increased empowerment of citizens and businesses through access to information, knowledge and services
The contents of the thesis is for internal user only
