PERMISSION TO USE

In representing this thesis in partial fulfillment of the post graduate degree from Universiti Utara Malaysia, I agree that the University Library make it freely available for inspection. I future agree that permission of copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisors or, in their absence, by the Dean of College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part should be addressed to:

Dean of Research & Postgraduate Studies

ABSTRACT

Intention to stay abroad is usually seen around the world by different groups of people. One major case of the intention to stay happens when students from one country studying in another country decide not to return home after their studies. This issue also leads to the concept of “brain drain” as a phenomenon that people of a high level of skills, qualifications, and competence, leave their countries and emigrate. In this study, we examined the factors affecting international students’ intention to stay in their host countries in a sample of 189 China’s students who came to study in UUM of Malaysia. The results support a three-fold model of factors that influenced this intention. Students’ perceptions of ethnic differences and labor markets, their adjustment process to the host country, and their family ties in host and home countries all affect their intention to stay.

Keywords: brain drain, intention to stay, China’s students.
ACKNOWLEDGEMENTS

I would like to extend my gratitude to my project supervisor, Madam Norizan bt. Haji Azizan for her valuable support, contribution and guidance.

I wish to thank Dr Ismail Lebai Othman for his input and advice during the Research Methodology class. Special thanks are also extended to all lecturers in the Human Resource Management Group, College of Business, Universiti Utara Malaysia who had helped me in getting through the hard time, also for their useful knowledge and information.

I am also wish to acknowledge the support of my respected parents. Their love, encouragement, support and sacrifice have been exemplary. Their concerns on my education as well as their continuous support had contributed in the success of this study.

Lastly, I am grateful for the encouragement that I received from all of my friends for the unconditional love in supporting my quest for knowledge has been extraordinary.

CHAPTER 1

INTRODUCTION

1.1 Background

For centuries, the international flow of talent is a noticeable phenomenon in the study of human resources management. In a long time, this flow acted as a one way flow which the talent moves from the sovereign states to the colonial states, from European countries to African, Asian and American countries, and from rich lands to poor lands. However, by the mid-20th century, this flow has been changed into a complex situation due to the current international system and environment (Wang, 2004). It can be characterized by three trends,

1) From the newly developed countries to the most developed countries. As several countries had great economic development forward into newly developed countries, more students went to the most developed countries and never come back. Huang (1995) indicates that from 1950 to 1988, Taiwan sent a total of 112,200 students study abroad, however, the return rate was only 11%.

2) From developing countries to developed countries. This kind of flow is more frequently appeared in most countries. By Thomason (1990) a research shows that only a decade from 1969-1979, the United States received 375,000 professional technicians from developing countries, and 50% of them are from Asia.

3) From developed countries to developed countries. After the World War II, the
