PERMISSION TO USE

In presenting this project paper in partial fulfillment of the requirements for a Post Graduate degree from the Universiti Utara Malaysia (UUM), I agree that the Library of this university may make it freely available for inspection. I further agree that permission for copying this project paper in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or in their absence, by the Assistant Vice Chancellor of the College of Business where I did my project paper. It is understood that any copying or publication or use of this project paper or parts of it for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to the Universiti Utara Malaysia (UUM) in any scholarly use which may be made of any material in my project paper.

Request for permission to copy or to make other use of materials in this project paper in whole or in part should be addressed to:

ABSTRAK

Tujuan kajian ini ialah untuk menyiasat penglibatan pekerja unit-perniagaan dan sumber-sumber yang mempengaruhi kejayaan organisasi. Kajian ini bertujuan untuk menyemak dan memperolehi pemahaman yang lebih baik berhubung faktor-faktor yang mempengaruhi penglibatan kerja di unit perkilangan syarikat multi-nasional yang terletak di Kulim Hi-Tech Park. Hasil dari kajian ini adalah untuk memberi sumbangan kepada literatur kajian dan membantu para pemimpin atasan memberi fokus pada strategi modal insan yang menghasilkan pulangan ke atas pelaburan mereka.

ABSTRACT

The purpose of this study is to investigate a business-unit work engagement and resources affecting its organizational success. The study is to examine and gain better understanding of the drivers that affects the work engagement at a multi-national company manufacturing unit located at Kulim Hi-Tech Park. The result of this study is to contribute to the research literature and help senior leaders focus on human capital strategies that produce returns on their investments.

This study was done among 105 exempt staff of a manufacturing unit. Data were gathered through hardcopy questionnaires and was being analyzed using Statistical Package for Social Science (SPSS) version 16. Throughout the statistical analysis - correlation analysis, it was found that there is significant relationship between the two independent variables namely Personal Resources and Job Resources with dependent variables of Work Engagement. Among the two independent variables, job resources were found to be the most independent variable in driving the work engagement in this business unit.
ACKNOWLEDGEMENT

In the name of Allah, most gracious, most merciful, I thank Allah Subhanahuwa ta’ala for granting me with strength and ability to complete this study.

I would like to extend my gratitude to my project supervisor, Dr. Norsiah Binti Mat who has been very supportive and encouraging in guiding me to complete this research paper. Her professional advice given throughout the completion of this research will not be forgotten.

I want to thank my family, my husband and my children for their tremendous support and encouragement throughout my entire process with this project paper. I am so grateful for having them by my side with their continuous encouragement and understanding while I’m juggling through this tough period.

The journey in completion of this project paper is not lonely at all with the support from my dearest classmates who have shown me their support and assistance in the accomplishment of this educational endeavor.

Not forgetting all dearest lecturers throughout my master study - Assoc. Prof Dr. Husna, Assoc. Prof Dr. Khulida, Dr. Yazam, Pn. Norizan, Dr. Faizuniah, and Pn Wan Shakizah who has shared their knowledge throughout my study with UUM. I am sure that I could not have arrived at this stage without them.

Lastly, I would like to present my humble appreciation and gratefulness to all the people who made this journey possible. I am in debt to those who knowingly and unknowingly.

Thank you.

CHAPTER 1
INTRODUCTION

1.1 INTRODUCTION

Why do some employees perform at high levels, whereas others perform at minimum levels of acceptance? Theoretical models and empirical studies concerning between-person differences mainly examine how employees' traits or general tendencies determine their performance (Cropanzano & Wright, 2001).

Similarly, the motivational process of the Job Demand-Resources (JD-R) model, (Bakker & Demerouti, 2007) suggests that job resources are the main initiators of employee's work engagement and consequently of enhanced performance. Job resources refer to physical, social or organizational aspects of the job that are functional in achieving work-related goals, reduce demands and the associated costs, and stimulate personal growth and development (Bakker & Demerouti, 2007).

Work engagement is the level of commitment and involvement which employee has towards their organization and its values. An engaged employee is aware of business context, and works with colleagues to improve performance within the job for the benefits of the organization. The organization must work to develop and nurture engagement, which requires a two-way relationship between employer and employee. Thus, work engagement is a barometer that determines the association of a person with the organization.

Harter, Schmidt & Hayes (2002) found that levels of engagement were positively correlated with business-unit performance (e.g. customer satisfaction and loyalty, unit
