PERMISSION TO USE

In presenting this thesis in partial fulfilment of the requirement for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that the permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or in their absence, by the Dean (Research and Postgraduate) of College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material form my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

ABSTRACT

The main objective of this study was to examine the relationship between job satisfaction and intention to leave among academic staff in UUM. Five facets of job satisfaction namely work itself, pay/salary, promotion, superior and co-workers satisfaction will be analysed to identify on the job satisfaction of academic staffs in UUM with their intention to leave job. Research instruments that were used to obtain the data are questionnaire. A total of 130 respondents were randomly selected from three colleges (COB/CAS/COLGIS) as the sample of the study. The data was analysed by "Statistical Package for Social Science" (SPSS Window) Version 16. The tests involved are reliability, Pearson Correlation Coefficient and Multiple Regression.

The findings of the study show that the majority of the respondents are 30-39 years old and 42 percent of the respondent have been working for 5-9 years in UUM. Generally, the results of job satisfaction and intention to leave supported the hypotheses. The strongest facet influenced academic staffs intention to leave is co-workers satisfaction. This means that, co-workers satisfaction play important role in other academician intention either to leave or stay working at UUM. These finding also show that university should focus on related facets to retain their academicians. Finally, some recommendations been given for future study that would be more interesting and comprehensive.
ABSTRAK

Dapatan kajian menunjukkan majoriti responden adalah berumur diantara 30-39 tahun dan 42 peratus telah bekerja di UUM selama 5-9 tahun. Secara umumnya, dapatan kajian disokong dengan hipotesis yang dibuat. Faktor atau ciri kepuasan bekerja yang paling kuat dalam mempengaruhi niat untuk meninggalkan kerja adalah kepuasan rakan sekerja. Dapatan kajian ini juga menunjukkan bahawa universiti seharusnya memberi penekanan terhadap faktor yang berkaitan dengan kepuasan berkerja bagi mengekalkan staff akademik mereka. Akhir sekali, beberapa cadangan telah dikemukakan kepada pengkaji lain pada masa akan datang bagi menjadikan bidang kajian ini lebih menarik dan meluas.
ACKNOWLEDGEMENT

First and foremost, I would like to convey my gratitude to Allah S.W.T for giving me the strength and motivation both mental and physical to complete this study. I would like to express special appreciation and deep gratitude to the following people because without their help and support I would never have completed this study:

Firstly to my project supervisor, Dr. Zainol bin Bidin who always gave advice, guidance, encouragement and sharing generous amount of the time throughout the process of completing this study. His attention to detail study is impressive and it is such an honour and privilege of having such great opportunity to learn from someone who is professional like him.

My special thanks to the respondents of (COB/CAS/COLGIS academic staffs) who have contributed significantly by participating in this study and answering questionnaires. I highly appreciate your cooperation, assistance and comments during collecting the data.

To my beloved parents, Encik Hassan bin Mohd Tahar and Puan Wan Hasimah bt. Wan Abdullah for their love and compassion who made me like who I am today. Not to forget, my siblings Hasrat, Naluri, Ikhlas, Ilham, Hakikat Hasanah and Liyin for their endless support. Lastly, my special thanks to all my friends whom helped me to stimulate or criticizes some of the ideas directly or indirectly throughout in the completion of this study.

CHAPTER 1

INTRODUCTION

1.0 Background of the Study

Education is associated with academicians. Meanwhile, according to Capellaras (2005) as cited in Lew, T. Y (2009) academics can be considered as the operational core of the universities and their performance determines align with the quality of the students higher education experience toward the contribution to institutions make to society. Meaning that, quality of academicians needs to prepare both mentally and physically to give higher degree of knowledge to the student. Thus, they will be accomplishing to build higher educated person in future.

Furthermore, according to Dato Ir. Dr. Radin Umar (2010) as Director General of Higher Education Institutions (HEI) “HEI must able to produce competitive intellectual to pursue nations aspirations, provide information and services and be able to meet the need of any Department, agencies, student as well as public. Malaysian national philosophy of education also claims that the education is continuously enhancing potential individual in any manner due to achieve individual who are perfectly balancing their spiritual, emotional and intellectual. In the meantime, it is priority to Malaysian academicians to seek a full of commitment and motivated throughout their universities to attract more excellence student become potential people in future.
