PERMISSION TO USE

In presenting this thesis in fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia (UUM). I hereby agree that University Library may make it unreservedly available for inspection. I further agree that permission for copy of thesis in any manner, in whole or in part, for scholarly purposes may be granted by supervisor MR. Shahmir Abdullah. It is understood that any copying or publishing or using of this of this thesis or parts thereof for financial gain shall not be allowed without any written permission. It is also understood that d recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from this thesis.

Requests for the grant permission to copy or to make other use of material in this thesis, in whole or in part should be addressed to

ABSTRACT

The Use of ICT Tools for Decision-Making within Private Business Organization in the UUM obtained the easy way for the different organizations working with UUM. However, the ICT tools among the organizations support the other integrations with the external and the internal integrations, such as the decision making tools, that obtain the flexible process during the organization progress, otherwise the study try to discover the various patterns of these integrations. Furthermore, the Use of ICT Tools for Decision-Making within Private Business Organizations in UUM implemented in these organizations to evaluate the usefulness of these tools.
ACKNOWLEDGEMENT

Alhamdulilah, all praise to Allah for the strength and endurance provided to me to complete the thesis. Working for Msc degree generally and this dissertation specifically is no doubt a challenging and enduring journey that I will cherish all my life. My excessive gratefulness is to my mother, and my father, who bless me all the time and work for my best since I was born.

Firstly and foremost, I would to render my utmost appreciation and to my supervisor, MR. Shahmir Abdullah, for his earnest guidance in imparting his knowledge to his students. Without his understanding, consideration and untiring advice, this dissertation would not have been completed successfully.

I also would like to express my grateful appreciation to my other lecturer whom have imparted me valuable knowledge and know-how during my studies for Msc program.

I am blessed, thankful and appreciate of what I conquered. To all those people, thank you so much.

Haetm A.A.Eamee

CHAPTER ONE

INTRODUCTION

1.1 Introduction and Background of the Study

The development in the ICT sector has made it easier and cheaper to store, reuse and share valuable information than to have to reinvent it is as it is needed (Hedelin and Allwood, 2002). Issues related with related to ICT have been extensively researched over recent years and positive impacts of using ICT is undoable agreed by all. ICT are shaping many industries, often by reshaping how information is shared. Information intensive industries such as banking and finance by their nature have the greatest impacts due to advancement in ICT. ICT for decision making are now a day widely used by organizations both in public and private sectors. Here in this proposed research we will try to find out the relativity of using of the information and communication technology (ICT) tools for decision making in the private business organization working within UUM.

It has been 50 years since Malaysia broke free from the claws of colonialism. The journey of progress and development relatively smooth despite some bumpy rides here and there, which are not uncommon. Compared to many countries, Malaysia is better off
