PERMISSION TO USE

In presenting this thesis in fulfillment requirements for the Degree of Master Science (Management) from University Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or by his absence, by the Director of the Centre of Graduate Studies. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission.

It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Assistant Vice Chancellor

ABSTRACT

The aim of this study is to find out the customer’s satisfaction with Yemeni Mobile service providers. This study examined the relationship between perceived quality, perceived value, customer expectation, and corporate image with customer satisfaction. The result of this study is based on data gathered online from 118 academic staff in public universities in Yemen. The study found that the relationship between perceived value, perceived quality and corporate image have a significant positive influence on customer satisfaction, whereas customer expectation is positively related to customer satisfaction but not statistically significance within the selected 5% confidence level.
ABSTRAK

ACKNOWLEDGEMENTS

I would like to express my gratitude to Allah for providing me the blessings to complete this work. I also deeply gratefulness to my supportive and helpful supervisor, Dr. Salmiza Md Salleh for assisting and guiding me in the completion of this research. With all truthfulness, without her, the project would not have been a complete one. Dr. Salmiza Md Salleh has always been my source of motivation and guidance. I am truly grateful for her continual support and cooperation in assisting me all the way through the semester.

I would like to present my thanks to my mother, my father, my wife, sisters, brothers and all my family who has always been there for me. Finally, I would like to express my appreciations to all my friends, colleagues, other staff, and everyone who has helped me in this journey.

CHAPTER ONE

BACKGROUND OF STUDY

1.1 Introduction

In a very limited period, mobile telecommunications have become an increasingly needed service with a very high penetration rate in most countries. With the extensive mobile telecommunications usage, the mobile services market is now recognized as the most competitive part of the telecommunications sector. The emergence of a competitive markets has led to lower prices, which has also resulted in the widespread use, greater variety and quality of mobile services.

Mobile telecommunications technologies have developed over successive generations. The first generation (1G) appeared in the 1950's. The second generation (2G) or GSM technology was used extensively, but was challenged globally by the next (third) generation (3G) technologies. This sequence of generations is characterized by increasing capacity and richer content of the message. Further penetration of 3G depends on the integration of telecommunications and multimedia services, which turned out to be more complicated than most experts predicted (Dunnewijk & Hultén, 2006). Since 1990, the telecommunications sector has become dynamic and vital to the economic development of industrialized nations. This is a result of the tremendous technical progress, as well as the emergence of many network operators and the ensuing intense competition. These factors, in turn, are the result of the abolition of monopoly rights, which were enjoyed mainly by workers in the states of public telecommunications networks. At the beginning of 2004, there
