PERMISSION TO USE

In presenting this thesis in fulfillment of the requirement for the degree of Master of Science (Management) from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor, Shahmir Sivaraj Bin Abdullah, or in his absence, by the Assistant Vice-Chancellor of College of Business. It is also understood that any copying or publication or use of this thesis or part thereof for financial gain shall not be allowed without any written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from this thesis.

Request for permission to copy or to make other use of material in this thesis, in whole or in part, should be addressed to:

Assistant Vice-Chancellor

ABSTRACT

Strategic planning process is a key part of the business success and organizational performance. This study investigates the relationship between strategic planning process and firm performance in the Palestine service sector. Data were collected from executives in 20 service organizations in Palestine. Descriptive statistics were calculated and correlation analysis and regression analysis were used to test the hypothesized relationships. In this study, it has found that there is a positive relationship between strategic planning process and firm performances in Palestinian service sectors.
ACKNOWLEDGEMENT

First and foremost, I express special thanks to my lecturer Shahmir Sivaraj Bin Abdullah guided me throughout the semester to complete this study. He has given his constructive suggestion, guidance, encouragement, and consistence support to me to develop this study. Furthermore, I am deeply conveying my thanks to my friends who helped me to develop this study. I convey my special gratefulness to my God. Finally, I express my deep sense of gratitude to my parents for their timely counseling and guidance. This has enriched my knowledge and has provided insight to overcome the hurdles on the way to complete this project.

With profound regards to all scholars of management studies in past, present and future.

CHAPTER ONE

INTRODUCTION

1.0 INTRODUCTION

Numerous aspects of the scholarly investigation of planning within organizations form a source of academic debate and conceptual division (Beinhocker, 2003). Researchers have investigated the relationship between planning processes and performance with mixed results (Mintzberg, 1994). This is puzzling given both the intuitive, anecdotal, and theoretical support for the importance of the relationship (Duhaime and Grant, 1984; Jemison and Sitkin, 1986; Miller, 1989). It has been suggested that the key organizational issue in the future will be managing information, with some firms attempting to codify or automate these for use in their organizations (Lancaster, 1997). No process requires more coordination and informational input than the planning processes of an organization. Tremendous time, effort and money are devoted to it, as it appears to be one of the critical elements in the performance of the firm (Steiner, 1979; Mintzberg, 1994).

A strategic plan should not be confused with a business plan. The former is likely to be a very short document whereas a business plan is usually a much more substantial and detailed document. A strategic plan can provide the foundation and framework for a business plan. A strategic plan is not the same thing as an operational plan. The former should be visionary, conceptual and directional in contrast to an operational plan which is likely to be shorter term, tactical, focused, implementable and measurable. As an example, compare the process of planning a vacation such as where, when, duration, budget, who goes, how travel are all strategic issues with the final preparations such as tasks, deadlines,
