PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of Awang Had Salleh Graduate School of Arts and Sciences. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to

**Dean of Awang Had Salleh Graduate School of Arts and Sciences College of
Universiti Utara Malaysia

ACKNOWLEDGEMENT

In the Name of Allah S.W.T, the Most Gracious and the Most Merciful

First of all, I would like to seize this opportunity to thank Allah S.W.T the Almighty that has granted me health throughout the completion of this research. I would also like to take this opportunity to thank all who have contributed their help and support in completing this study.

With a deep sense of gratitude, I wish to express my sincere thanks to both of my supervisors, Dr. Amalina Farhi Binti Ahmad Fadzlah and Associate Professor Dr. Wan Rozaini Binti Sheikh Osman for their continuous support, patience, motivation, enthusiasm, and immense knowledge. Their valuable guidance and advice contributed substantially to the completion of this study.

I would also like to give my sincere thanks to Pn. Latifah Binti Abdul and my colleagues in the College of Arts and Science for their help.

My special thanks and gratitude go to my parents, family, husband and kids for their support and encouragement; which motivate me to do my best in this study.

Lastly, I would like to thank all who show concern and stand by my side throughout the whole process of completing this study.

ABSTRACT

The aim of this research is to develop a prototype of an online registration system for Form One students to assist teachers and parents in the registration of Form One students. It is also targeted to help ease the process of student registration for school and also for the hostel, thus reducing the time of registration as the current manual system requires students and their parents to queue to register which, sometimes, could take a long time and, consequently, interfere with subsequent programmes planned resulting in important information not reaching all students and parents. Besides, it also meant to reduce cost, time and energy as all the printed forms will be made available online. It also benefits users by giving them flexibility where they can do the registration on their own personal comfort time and place since this system is accessible anytime and anywhere as long as there is an Internet connection.

CHAPTER ONE

INTRODUCTION

1.1 Introduction

The term online in regards to computer technology and communication means that the computer is connected to a network. In a network, computers are allowed to share resources such as hardware, software, data and information. The access to the resources on the network is controlled by a server. (Shelly, Cashman, Vermaat, 2006). The term online system refers to a computer system which allows online users to transmit and receive information. (PublishingDictionary, 2011). Nowadays, an online system plays a major role in almost all organizations. One major advantage of using an online system is it provides a convenient way of doing things at any time and anywhere as long as there is an Internet connection.

1.2 Background

The aim of this study is to create a prototype of an Online Form One Student Registration System (OFOSRS) to assist teachers and parents in managing the school and hostel registration of Form One students and is targeted on the students of SMKA Al-Mashoor (Lelaki), Pulau Pinang. Currently, the registration process is conducted manually which consumes time and energy and bears the cost of printing the bulk of school and hostel registration forms, which is sometimes wasteful when
