PERMISSION TO USE

In presenting this thesis in fulfillment of the requirements for the postgraduate degree from the Universiti Utara Malaysia, I agree that the Universiti Library may take it freely available for inspection. I further agree that the permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in his absence, by the Dean of the Postgraduate studies of College of Business. It is understood that any copy or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to the Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis. Request for permission to copy or make other use of material in this thesis in whole or in part should be addressed to:

Dean of the Postgraduate Studies of College of Business

ABSTRACT

This study was conducted to investigate the effect of Islamic work ethic on work outcomes (job satisfaction, organizational commitment and turnover intention) on Higher Education in state of Kedah (UUM, KUIN and UITM Merbok). Professional organizations work very hard to establish codes of ethics to help both staff admin and academic to understand and manage their ethical responsibilities. Islam considers ethics as an essential factor to build individuals, communities and society. Islamic ethics are set of moral principles and guidance that recognizes what is right behavior from wrong. It is universal, comprehensive, stable, fair, and historically prove success in building ethically great society. The study used a sample of 200 respondents from three institutions of Higher Education in Kedah (UUM, UITM & KUIN). The empirical testing indicates that Islamic work ethic has positive effects on both job satisfaction and organizational commitment; whereas there is no significant evidence of the effect of Islamic work ethic on turnover intention. Implication, limitation and suggestion for future research are discussed.

Keywords: Islamic work ethics, Job Satisfaction, Organizational commitment, and Turnover intention.

ACKNOWLEDGEMENT

Praise and gratitude be given to ALLAH the Almighty for putting forward me such a great strength, patience, courage, and ability to complete this project. I would like to express my sincere gratitude to my supervisor, Dr. Azizi Abu Bakar, for his intelligent guidance and helpful advice during the whole process. I am truly grateful to his continual support and cooperation, as being prepared to assist me all along the completion of the project.

I would like to express deeply and sincerely with a very humble smile, this research is highly fanatical to my beloved parents, Abd Muin b Hj Hashim and Rohani bt Hj Mohamed for their love, affection, trust, and support they have extended me every step of my life, thank you a lot because always giving me support in order for me to stand till the end of this research, giving me money, spent time and help me with your energy without any complaints. In addition, I would like to present my sincere and profound gratitude to my brothers and sister, Mohd Yazid, Nur Fatin, Muhammad Hanip, Mohamad Ihtizam, and Muhammad Ilham for their love, support and encouragements throughout all my life.

Finally, I would like to thank everybody who was important to the successful realization of my project paper especially Azizah Che Omar, Azlan, and Hamid Haryson, as well as expressing my apology that I could not mention personally one by one. Thank you.

CHAPTER ONE

INTRODUCTION

1.1 Introduction

The study of work ethics has gained significant interest in recent years following the failures of major corporations like Enron and WorldCom. However, most studies in this area, as well in the bigger subject area of business ethics, have been based on the experiences in the American and some European countries (Lim and Say, 2003; Rizk, 2008). Essentially, these studies (see Furnham, 1982, 1990; Furnham and Rajamanickam, 1992) relied on the Protestant Work Ethic (PWE) as advocated by Max Weber (Yousef, 2001). Notwithstanding the impact of Protestantism and PWE on economic development in the West (Weber, 1958), the applicability of models that are based on these elements maybe be limited in non-Western societies. This may be particularly so in societies which are dominated by the non-Islamic religion. Islam for example has its own concept of ethics that are derived from the Qur'an and sunnah. In a manner similar to Weberian Protestantism, Islam provides the ideological foundation for a variety of personal attributes that promote economic development (Ali, 1992). Indeed, Ali (2005) noted that the application of Islamic ethics brought the Muslims to the golden ages in the eighth until the fourteenth century.

However, not much is known about Islamic work ethics (IWE). To date, there are only a few researches that have looked at IWE (see Ali, 1988 and 1992; Yousef, 2000 and 2001;
