PERMISSION TO USE

In presenting this project paper in partial fulfilment of the requirements for a Post Graduate degree from the Universiti Utara Malaysia (UUM), I agree that the Library of this university may make it freely available for inspection. I further agree that permission for copying this project paper in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or in their absence, by the Assistant Vice Chancellor of the College of Business where I did my project paper. It is understood that any copying or publication or use of this project paper or parts of it for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to the Universiti Utara Malaysia (UUM) in any scholarly use which may be made of any material in my project paper.

Request for permission to copy or to make other use of materials in this project paper in whole or in part should be addressed to:

Assistant Vice Chancellor

Employee engagement has emerged as one of the most important topics in the sphere of human resource management. It stands for the extent to which the employees are fully involved in his/her work and will act in a way that furthers their organization interests. The study on this paper is to examine and gain better understanding of the drivers that influence employee engagement in a printing company. Employee communication, employee development and rewards and recognitions were selected as independent variables. Sample for the study consists of 123 staff from various levels and departments. Data were collected with the help of a questionnaire and analyzed using the Statistic Package for Social Science (SPSS) version 15. Throughout the statistical analysis, it is found that there is a significant relationship between the two independent variables namely employee communication and employee development with the dependent variable, employee engagement. Among the two independent variables, employee communication is the strongest drive to employee engagement in the printing company.
ACKNOWLEDGMENT

In the name of Allah, Most Gracious and Most Merciful.

First and foremost, Alhamdulillah, praises Allah s.w.t for giving me the will and strength in completing this research paper. I wish a very special thanks to my supervisor, Dr. Chandrakantan A/L Subramaniam for his guidance from the beginning until end of this research. I would like to express my appreciation to my employer for giving the permission and resources to do my research paper.

I would also want to thank all my family members especially my husband, Mohd Fairuz Bin Naemat, for being very patient, understanding and helpful in every time I needed his help and in helping me looking after our beloved, Maira Fareeha and Mukhriz Farhan, whilst I was very busy completing my project paper.

Last but not least, millions of thanks to my MHRM lecturers and UUMKL friends, Elfi, Salina, Rini, Choo Ling Suan, Jona, Ira, Fadzly and others who helped me in giving ideas and supports me. Not forgetting, thank you to all parties involved directly or indirectly in completion of this project paper.

Thank you all.

CHAPTER 1

INTRODUCTION

1.1 BACKGROUND OF STUDY

In today’s economic instability, organization started to look into people as an asset so that organization can utilize their skills, knowledge and abilities to sustain the competitiveness in the industry. This is because employees who are engaged in their work and committed to their organizations give crucial competitive advantages including higher productivity and lower employee turnover (Robert, 2006). However, according to Gallup Management Journal research done in 2006, only 29% of the U.S. working population is engaged (loyal and productive), 55% are not engaged (just putting in time), and 15% are actively disengaged (unhappy and spreading their discontent) (“Gallup Study”, 2006).

In fact, as reported by The Towers Watson Global Workforce Study 2010, 28% of the Malaysian workforce is engaged (“Malaysians Value Job Security and Stability”, 2010). The higher engagement level is an encouraging indication as engaged employees are less likely to leave their jobs, with the results showing that 41% of engaged employees in Malaysia has no plans to leave. According to Vivek Nath, Managing Director for Towers Watson Malaysia, the impact of the recession on the business should not be used as an excuse to deviate focus from engagement, as there is a risk of talent leaving the organization once the recession completely lifts, which could affect business performance (“Malaysians Value Job Security and Stability”, 2010).
