PERMISSION TO USE

In presenting this project paper in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that Universiti Library may make it freely available for inspection. I further agree that permission for copying of this project paper in any manner, in whole or part for scholarly purpose may be granted by my supervisor or in their absence, by the Dean of Graduate School of Business. It is understand that any copying of publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understand that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my project paper.

Requests for permission to copy or to make other use of materials in this project paper, in whole or in part should be addressed to:

III
ABSTRACT

This study empirically examines the strategic role of information technology towards building organization’s competitive advantage, in particular, the main objective of this study is to report the association of productivity efficiency, innovation, customer-supplier relationship, and database marketing with organization’s competitive advantage. This study is a summary-based investigation focusing on southern region of Yemen. The sample of this study compromises of 130 usable questionnaires.

The findings of this study indicate that there is positive relationship between information technology and competitive advantage. This address problems and barriers encountered in the application of information technology as medium to build competitive advantage among organizations in Yemen (Southern Region). It is certainly enables scholars and practitioners to make better decision.
DEDICATION

This dissertation is dedicated with love and gratitude to my beloved father, SALMEN, and my mother NADIA, who have provided undying love, support and encouragement. They are my strength, dreams, courage and determination to move through the final stages of this process. My dream came true due to their love and sacrifices.

I also dedicate this dissertation to my brother SAMER, ABDULLAH, MOHAMMED, AMER, Sisters, and all my friends, who always inspire me. Without their love, patience and sacrifices, this dissertation would not have been possible.

Thank you all and best of luck.
ACKNOWLEDGEMENTS

All PRAISE and gratitude are to Allah for all the help and blessing that He bestowed upon me which finally enable me to complete this thesis.

Although most learning activity is about personal commitment, it has still in needs for help, support and encouragement from others. Just as an eagle could not be soar without the invisible strength of the wind. This also happened on me, as I could not have arrived at this place without the help of others. I would like to present my humble appreciation and gratefulness to all the people who made this journey possible. I am in debt to those who knowingly and unknowingly involve and so helpful and especially during my difficult moments.

Firstly, my deepest appreciation goes to Dr. Haim Hilman who has provided unlimited amount of encouragement and professional support. He valued my commitment to self and lifelong learning and always there to support me. Thank you, Dr. Haim Hilman, for your positive attitude and outlook; you are an incredible supervisor and an outstanding leader.

I wish to thank Dr. Mohd Zainuddin Othman for proof reading my project paper, talking out ideas, providing technical and psychological assistance, and for guiding and supporting my efforts to succeed in this program.

Secondly, to the vice-Chancellor of UUM, Prof. Dato’ Dr. Mohamed Mustafa Ishak is who has provided expertise, knowledge, support and coaching during my study at UUM. The highest compliment I could say to a leader like you are: I have learned a lot from

VI
you. I also want to thank, Dr. Filzah, Dr. Faiz Ahmad, Dr. Ghazali Din, Assoc. Prof. Dr. Hartini, Assoc. Prof. Dr. Haji Khairu din, Dr. Mina Haron, Mr. Shahmir Abdullah, Dr. Nik Ab. Halim Nik Abdullah, Dr. Mohammed Nasri and Dr. Santhisegaran S.R. Nadarajan for teaching, providing technical and psychological assistance, guidance and support, which finally enable me to succeed in this program.

I will not forget to thank all staff of UUM, especially COB staff for their guidance and support.

I am also very grateful to my friends who know the meaning of friendship and to my classmate who only could be described as a great team. I also would like to extend my gratitude to all employees in Yemen for their willingness to participate in this study.

Last but not least, I would like to thank Allah, The Sublime, The Majestic, for instilling in me the courage and strength to complete this study. May Allah, in His infinite Grace and Mercy, accept this humble effort. Amin.

To all those people, thank you so much.

CHAPTER ONE

INTRODUCTION

1.1 Introduction

The field of strategic management focuses on understanding sources sustainable competitive advantages for firms (Porter, 1980; 1985; Rumelt, R.P., Schendel, D., & Teece, D.J., 1991, Barney, 2001; Priem & Butler, 2001). A variety of factors have been shown to have an important impact on the ability of firms to obtain sustainable competitive advantage, including the relative cost position of a firm (Porter, 1980), a firm's ability to differentiate its products (Johannessen & Olsen, 2003; Caves and Williamson, 1985; Porter, 1980), and the ability of firms to cooperate in strategic alliances (Kogut, 1988).

IT has also been mentioned for its possible role in creating competitive advantages for firms (Tabb, L., 2006; Barney, 1991; Clemons, 1986; 1991; Clemons and Kimbrough, 1986; Clemons and Row 1987; 1991a; Feeny, 1988; Feeny and Ives, 1990). Many organizations in most industries have little choice but to implement some form of information technology in order to remain both innovative and remain on the cutting edge of competitive advantage (Porter, 2001). IT is firmly grounded in the business as competitive impact and alignment needs of IT (Ward & Peppard, 2002).
