The main objective of this research is to identify and determine the level of SCM practices, and barriers or impediments to implement these practices in oil and gas industry particularly the case company, Murphy Sarawak Oil Company Ltd.. In this study, nine dimensions that being used are: strategic supplier partnership, customer relations practices, information sharing, information quality, internal lean practices, postponement, information technology, training and internal operation. Previous literatures related to SCM and its practices are reviewed to support the present study. Specifically, the case company was analysed mainly through semi-structured interviews with some of the practitioners in each departments who is actively involve in the process of SCM activities. Set of questionnaires have also been sent via email to the case company, and yielded 10 responses. The study found that among nine practices proposed, seven are identify to be implemented by the company. Such findings are necessary and lay the foundation for the eventual development of SCM practices. Among the dimensions which are sought to be implement by the company are strategic supplier partnership, customer relations practices, information sharing, information quality, information technology, training and also internal operation. Hence, the finding reveals that the other two practices which are not applicable in oil and gas industry include internal lean practices and postponement which are more relevant to be implemented in manufacturing sector. This initial findings offer some insights on the SCM practices in the case company. The result of this study also contributed to knowledge as it discovered additional dimension of the practices in the industry. Directions and recommendations are discussed on how oil and gas company can realize the benefits of SCM and to implement it effectively.

ABSTRAK

ACKNOWLEDGEMENT

In The Name of Allah the Most Merciful the Most Compassionate

Peace and Blessings be upon His Beloved Prophet

I am making uncounted thanks to my Allah the Almighty who has guided me to remember Him at this time. I thank Him, for it is Him who has made this study possible. Nothing is possible unless He made it possible.

This project was made possible with the help and support of many people which I must acknowledge especially by the generous funding of University Teknologi MARA. Firstly, I am sincerely much indebted to my supervisor and mentor, Associate Professor Dr. Zulkifli Bin Mohamed Udin who has supported me throughout my project paper with his patience and knowledge whilst allowing me the room to work in my own way. I attribute the level of my appreciation to his encouragement and effort and without him this project, too, would not have been completed or written. My special thanks and appreciation to the representatives from Murphy Sarawak Oil Company Ltd., for their help and assistance in giving valuable information and necessary inputs towards completing this study.

Where would I be without my family? My family especially my parents and parents-in-law deserve special mention for their inseparable support and prayers. My loving husband, Haibatul Shahmi Bin Asniel, in the first place is the person sincerely supported me with his caring and gently loves. To my beloved son who is the source of my inspiration and motivation, Muhammad Adam Danish, everything I do, I do it for you sayang.

**TABLE OF CONTENTS**

**CHAPTER 1: INTRODUCTION**

1.0 Introduction  
1.1 Background of the Study  
1.1.1 Supply Chain Management (SCM)  
1.1.2 Supply Chain Management Practices  
1.1.3 Oil and Gas Industry  
1.1.4 Murphy Sarawak Oil Company Ltd. ("Murphy" or "the Company")  
1.2 Problem Statement  
1.3 Research Questions  
1.4 Research Objectives  
1.5 Significance of Study  
1.6 Definition of Terms  
1.6.1 Upstream  
1.6.2 Downstream  
1.6.3 Exploration  
1.6.4 Refining
CHAPTER 2: LITERATURE REVIEW

2.0 Introduction

2.1 Supply Chain Management (SCM)

2.2 Supply Chain Management Practices
   2.2.1 Strategic supplier partnership
   2.2.2 Customer relations practices
   2.2.3 Information sharing
   2.2.4 Information quality
   2.2.5 Internal lean practices
   2.2.6 Postponement
   2.2.7 Information technology
   2.2.8 Training
   2.2.9 Internal operation

2.3 SCM in Oil and Gas Industry

2.4 Oil and Gas Industry
   2.4.1 Oil and gas industry in Malaysia
   2.4.2 Players
   2.4.3 Murphy Sarawak Oil Company Ltd.

2.5 Summary of the Chapter

CHAPTER 3: RESEARCH METHODOLOGY

3.0 Introduction

3.1 Research Design
3.1.1 Case study
3.2 Data Collection Method
  3.2.1 The primary data
  3.2.2 The secondary data
3.3 Population and Sampling
  3.3.1 Sampling technique
  3.3.2 The population and sampling frame
3.4 Questionnaire Design
  3.4.1 Interview
3.5 Summary of the Chapter

CHAPTER 4: DATA ANALYSIS AND FINDINGS
4.0 Introduction
4.1 The Supply Chain Management Practices
4.2 Strategic Supplier Partnership
4.3 Customer Relations Practices
4.4 Information Sharing
4.5 Information Quality
4.6 Information Technology
4.7 Training
4.8 Internal Operation
4.9 The Barriers or Impediments in Implementing SCM Practices
4.10 Summary of the Chapter
CHAPTER 5: DISCUSSION AND CONCLUSION

5.0 Introduction 57
5.1 Discussions 57
5.2 Managerial Implications 61
5.3 Limitations 62
5.4 Recommendations for Future Research 63
5.5 Conclusion 64

CHAPTER 1

INTRODUCTION

1.0 Introduction

This chapter provides an overview of supply chain management practices in oil and gas industry in Malaysia. It starts with a background of the study, followed by problem statement, research objectives and also research questions. Several contributions of this study are discussed in the next section followed by explanation of the terms used in this study.

1.1 Background of the Study

Thirty-six years ago the Malaysian Parliament passed the Petroleum Development Act (1974) and laid down the groundwork for the development of the oil and gas industry in the country. Since then, the industry has developed to become one of the most important economics sector with multi billion dollar industry which taken advantage of the most demanding and challenging of technological advances. The Oil & Gas (O&G) industry has seen no small amount of attention during recent months, not only because of the increase of crude prices, but also the simultaneous rise of petrol prices due to reduction in government subsidies. Hence, news of discoveries of new potentially
