PERAKUAN KERJA KERTAS PROJEK
(Certification of Project Paper)

Saya, yang bertandatangan, memperakukan bahawa
(I, the undersigned, certify that)

GOH CHOON INN

calon untuk Ijazah
(candidate for the degree of) Sarjana Sains (Teknologi Maklumat)

telah mengemukakan kertas projek yang bertajuk
(has presented his/her project paper of the following title)

DEVELOPING AN INTERACTIVE MULTIMEDIA APPLICATION FOR E-LEARNING

JAPANESE LANGUAGE

seperti yang tercatat di muka surat tajuk dan kulit kertas projek
(as it appears on the title page and front cover of project paper)

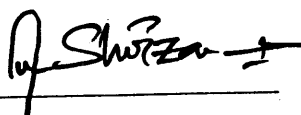

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan
dan meliputi bidang ilmu dengan memuaskan.
(that the project paper acceptable in form and content, and that a satisfactory
knowledge of the field is covered by the project paper).

PERMISSION TO USE

In presenting this thesis in partial fulfilment of the requirements for a post graduate degree from the Universiti Utara Malaysia, I agree that the Universiti Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor(s) or, in their absence, by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of material in this thesis in whole or in part should be addressed to:

**Dean of Graduate School

Kedah Darul Aman**

ABSTRACT (BAHASA MALAYSIA)

Projek ini dihasilkan untuk membangunkan satu perisian aplikasi multimedia interaktif untuk mewujudkan pembelajaran secara elektronik bagi pembelajaran bahasa Jepun. Aplikasi ini bertujuan menyumbangkan terhadap pembangunan aplikasi pendidikan di Malaysia. Aplikasi ini dapat menawarkan pembelajaran bahasa Jepun yang menarik, mudah belajar dan efektif dengan penggunaan teknologi komputer dan multimedia yang canggih. Aplikasi ini dapat menyediakan pembelajaran berbantuan komputer bagi kursus bahasa Jepun dan menyediakan suasana belajar mengikut kehendak dan kemampuan dalam pembelajaran bahasa Jepun. Kertas projek ini memberi penumpuan daripada penghasilan konsep pembangunan aplikasi sehingga terhasilnya versi prototaip aplikasi. Kekurangan aplikasi ini juga dibincangan. Selain itu, pembangunan dan kajian selanjutnya juga dicadangkan agar memperbaiki atau menghasikan aplikasi yang lebih baik pada masa depan.

ABSTRACT (ENGLISH)

This project is developed to present an interactive multimedia application for providing electronic learning (e learning) in Japanese language. The application aimed to contribute to the growth of educational application development in Malaysia. It provides fun, easy and effective approach in learning Japanese by integrating current sophisticated computer and multimedia technologies. It uses as computer-based instruction (CBI) to enhance the Japanese classes and provide self-paced environment in learning Japanese language. The paper focused on the project application from concept to produce the prototype version of the application. Limitations of the developed application are discussed as well. The future research and development of the project are suggested to take consideration in order to improve or to produce a better version in the future.

ACKNOWLEDGMENTS

I would like to thank my project supervisor, Encik Ahmad Shaarizan for his guidance, encouragement and support throughout the development of the project. I would like to thank Pusat Komputer, UUM for providing the facilities. I have to thank Mr. Yaginuma and Ms. Kurosawa for providing the information about Japanese course in Universiti Utara Malaysia.

Also, I would like to thank Miss Cheng Ah See, my Japanese teacher for helping me and support all the time.

CHAPTER ONE:

INTRODUCTION

The project is initiated to develop an interactive multimedia application for providing electronic learning (e-learning) in Japanese language. This chapter will cover background of interactive multimedia application in education, problems faced by the traditional classroom instruction method and the objective of the project. It will also cover the requirement, scope and significance of the project.

1.1 Background

After the Multimedia Super Corridor (MSC) was launch in 1996, multimedia has become a “*buzzword*” that using by many people in Malaysia. According to Gehris (1998), *multi* means more than one, and *media* means a form of communication. Generally, multimedia can be refer to any computer-based application or presentation software that integrates at least two or more of the elements like text,
