PERAKUAN KERJA KERTAS PROJEK
(Certification of Project Paper)

Saya, yang bertandang, memperakukan bahawa
(1. the undersigned, certify that)

AINIMAZITA MANSOR (NO MATRIX: 86933)
calon untuk ijazah
(candidate for the degree of)
telah mengemukakan kertas projek yang bertajuk
(has presented his/her project paper of the following title)

LEARNER SATISFACTION TOWARDS E-LEARNING
AMONG FINAL YEAR FULL TIME AND PART TIME STUDENTS
IN UNIVERSITI UTARA MALAYSIA

Seperti yang tercatat di muka surat tajuk dan kolik kertas projek
(as it appears on the title page and front cover of project paper)

Bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan dan meliputi
bidang ilmu dengan memuaskan.
(that the project paper acceptable in form and content and that a satisfactory knowledge of the
field is covered by the project paper).

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree of Master of Science Management (M.Sc.Mgmt) from the Universiti Utara Malaysia, I agree that the University may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or, in his absence, by the Dean of the College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other uses of material in this thesis, in whole or in part should be addressed to:

Assistant Vice-Chancellor
College of Business
Universiti Utara Malaysia
06010 Sintok, Kedah Darulaman
Malaysia
ABSTRACT

The purpose of this study was to explore the learner’s satisfaction toward e-learning. Moreover, this study also tried to determine whether the dimensions of learner’s satisfaction moderate the relationship with knowledge gained. Data were collected from 111 final year students, part time and full time by using simple random sampling. A questionnaire consisting of 30 questions was administered to the respondents. The study showed that learner’s satisfaction dimensions were positively related with e-learning. The study also found out that the dimensions learner’s satisfaction influenced toward e-learning with 80.1 percent.
ACKNOWLEDGMENTS

In the Name of Allah, The Beneficent, The Merciful

This research requires a Master Project, I would like to thank my beloved supervisor of Master Project (Thesis), Mr Shahmir B. Abdullah, who gives me an opportunity to make my own topic. He had given the specific outlined for me to make a Master Project (Thesis).

Special thanks to my lovely family, Ahmad Fitri b. Zainol Abidin, Ahmad Affiq Hadri, Alia Qistina, Nur Diana, Tuan Haji Mansor b. Ahmad, Puan Hjh Ainishah bt Mohamed and Puan Hjh Wan Embon Bt Hj Megat Ibrahim who supports me lots during my study in Universiti Utara Malaysia regarding of the monetary and also some advices. Special thanks also to, who support me my study every day to survive and completed with all a widely logic thinking for completed my subject and thesis.

## CHAPTER 1: INTRODUCTION

1.1 Background of study               | 1    |
1.2 Problem Statement                 | 2    |
1.3 Purpose of Study                  | 3    |
1.4 Research Objectives               | 3    |
1.5 Research Questions                | 4    |
1.6 Research Hypothesis               | 4    |
1.7 Research Framework                | 6    |
1.8 Importance of the study           | 8    |
1.9 Definition of Terms               | 9    |
   1.9.1 Course structure              | 9    |
   1.9.2 Autonomy                     | 10   |
   1.9.3 Web-based course             | 10   |
1.10 Scope of the Study               | 11   |
1.11 Organization of the Report       | 11   |
CHAPTER II: LITERATURE REVIEW

2.1 Introduction 12
2.2 E-Learning 12
2.3 Theoretical Model 13
2.4 External Variables 13
2.5 Beliefs 16
2.6 Attitude 17
2.7 Course Structure 17
2.8 Autonomy 18
2.9 Computer Technology Experience 20
2.10 Satisfaction with Perceived Knowledge Gained through e-learning 21

CHAPTER III: METHODOLOGY

3.1 Introduction 23
3.2 Research Design 23
3.3 Research Population 23
3.4 Research Sampling 24
3.5 Instrumentation 24
3.6 Reliability Testing 26
3.7 Data Collection Procedures 27
3.8 Data Analysis 27
3.8.1 Descriptive Statistics 27
3.8.2 Inferential Statistics 28

CHAPTER IV: FINDINGS AND ANALYSIS

4.1 Introduction 29
4.2 Descriptive Statistics of Data Collection 29
4.2.1 Descriptive Statistic of Demographic Factor 29
4.3. Testing the Hypotheses                                      39
    4.3.1 Hypotheses testing for demographic factors             39
4.4 Hypothesis testing relationship between course structures, 45
    learners autonomy and computer technology with e-learning
4.5 Hypothesis testing influence between course structures, learners autonomy and computer technology with e-learning 48
4.6 Summary of the findings                                     50

CHAPTER V: CONCLUSION

5.1 Introduction                                                 51
5.2 Main effects on usage of e-learning                          51
5.3 Conclusions                                                  54

CHAPTER 1
INTRODUCTION

1.1 Background of study

e-learning is learning that takes place in an electronically simulated environment. e-learning, web-based training, internet-based training and computer-based training are the next-generation instruction methods being developed today. With e-learning, users can immerse themselves in a three-dimensional environment to further enhance their learning experience. Moreover, e-learning can be done anywhere and anytime as long as the user has the proper hardware. Today, e-learning is fast becoming a reality through higher education like UUM and others.

e-learning can be done using an internet connection, a network, an intranet, or a storage disk. It uses a variety of media like audio, text, virtual environments, video, and animation. e-learning, in some ways, is even better than classroom learning methods as it is a one-on-one learning method, it is self-paced and it has an experiential-learning format.

As with any other forms of learning, e-learning depends on its delivery method and content to ensure its success. For this reason, e-learning modules have to be interesting, interactive and informative in order to be effective. Because it is computer/software based however, e-learning has the capability of immersing its students completely within
The contents of the thesis is for internal user only
