PERMISSION TO USE

In presenting this project of the requirements for a Master of Science in Information Technology (MSc. IT) from University Utara Malaysia, I agree that the University library may make it freely available for inspection. I further agree that permission for copying of this project paper in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor(s) or in their absence, by the Dean of Awang Had Salleh Graduate School of Arts and Science. It is understood that any copying or publication or use of this project or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my project paper.

Request for permission to copy or make other use of materials in this project, in whole or in part, should be addressed to:

Dean of Awang Had Salleh Graduate School of Arts and Science

College of Arts and Sciences

Universiti Utara Malaysia

ABSTRACT

With the advancement of Information and Communication Technology in this era, teachers should take the advantage to improve their teaching techniques. Students should be allowed to learn at anytime, anywhere and at their own pace. Teachers also be able to keep a collection of test/tutorial questions online. Furthermore, the motivation for this study is to improve the learning environment in SIMAD University through the use of Internet technology. Therefore, based on the above ideas, a prototype of E-learning Management System has been developed. In addition, this software is a web based application system that can be accessed by students as well as lecturers through the Internet technology by anywhere and anytime. The methodology adopted in this study is the design research Methodology by Vaishnavi and Kuechler (2004).
ACKNOWLEDGMENTS

In the Name of Allah, the Most Gracious and Most Merciful

All Praises to Allah for his guidance and blessing for giving me the strength and perseverance to complete this study. I would foremost like to thank my beloved wives, for providing me with the opportunity to pursue my goals and for their love and affection, which has helped me along my study stages and through all my life. I would like to express my deepest gratitude to my supervisor Assoc. Prof. Dr. Wan Rozaini Sheik Osman her valuable guidance, instructions, and her advices that have enabled me to complete my project properly. Last not least my thanks would go to my all friends and classmates who gave me their help and shared with me their knowledge and also gratitude to my colleagues in SIMAD University for their financial support.

### Chapter One

**Introduction**

1.0 Background of the study 1
1.1 Problem Statement 3
1.2 Research Questions 4
1.3 Research Objectives 5
1.4 Scope of the study 5
1.5 Deliverable 5
1.6 Report Structure 6
1.7 Gantt chart 7
1.8 Summary 7
Chapter Two

Literature Review

2.0 Introduction 8

2.1 Learning Management System (LMS) 8

2.1.1 The context of LMS 9
2.1.2 Quality in online teaching and learning 10

2.2 E-learning 12

2.2.1 Types of E-learning 14

2.2.1.1 Knowledge databases 14

2.2.1.2 On-line Support 14

2.2.1.3 Asynchronous training 14

2.2.1.4 Synchronous training 15

2.2.2 E-learning perspectives 15

2.2.3 Potential Benefits and Limitations of E-learning 16

2.2.4 E-learning and E-training 18

2.2.5 Interactive tools in the Learning and Training 19

2.2.6 E-learning Critical Success Factors 20

2.2.6.1 E-learning CSFs categories 21

2.3. Web-Based Learning Environment 23

2.4 Web Applications Definition 25

2.4.1 Web and Internet 26

2.4.2 Basic Web Architecture 26

2.5 Web-Based Application 28

2.5.1 Advantage of Web-based Application 29

2.6. Previous work 30
Chapter Three

Methodology

3.0 Introduction

3.1 Research Methodology

3.1.1 Awareness of Problem

3.1.2 Suggestion

3.1.2.1 Hardware requirement

3.1.2.2 Software requirement

3.1.2.3 User requirements

3.1.3 Development

3.1.3.1 Analysis

3.1.3.2 Construction

3.1.3.3 Testing

3.1.4 Evaluation

3.1.5 Conclusion

3.2 Summary
## Chapter Four

### System Analysis and Design

Chapter One
Introduction

1.0 Background of the study

Information and Communication technology has created a need to transform how University students learn by using more modern, efficient, and effective alternative such as E-learning or E-learning. According to Global Industry Analysts (2008), E-learning has emerged as an imperative tool to communicate knowledge in the academic as well as corporate sectors. Since E-learning has several compensation in terms of cost reduction, simplified training programs, flexibility and convenience; it is balanced to become an integral component of information dissemination and emerges as the new paradigm of modern education. Backed by several favorable trends, the world of E-learning market is projected to exceed US$52.6 billion by 2010 (Global Industry Analysts, 2008). It is believed that the role of E-learning and information and Communication technology in education will continue to expand in scope and complexity of the education.

According by Ron Kurtus (revised 4 April 2004) E-learning is a catch-all term that covers a wide range of instructional material that can be delivered on a CD-ROM or DVD, over a local area network (LAN), or on the Internet. It includes computer-based training (CBT), web-based training (WBT), and electronic performance support systems (EPSS), distance or online learning and online tutorials. The major advantage of E-learning to students is to access easily anytime anywhere. There are some typical elements and a standard approach of developing or authoring E-learning material. E-learning System is apart Learning Management System that is developed to apply SIMAD University Mogadishu-Somalia.
