Performance measurement is a broad and interesting topic to study, especially in agriculture sector. In Malaysia, agriculture sector have been the third source of income for the national economic growth. The agriculture sector has also been determined by government as a valued prospect and needs to be concentrated especially to organization that relates with farmers. Thus, the purpose of this research is to investigate the performance measurement indicators that can be used by Farmers Organization in order to measure it performance. This study is focused on question: "What are financial and non-financial indicators that could be used as performance measurement by Farmers Organization?" To answer the research problem, this research employs the convergent interview with the Farmers Organization in Muda Agriculture Development Authority (MADA) region. From the analysis, the result suggested that have 9 indicators classified as performance measurement indicators for Farmers Organization.

ACKNOWLEDGEMENT

In the name of Allah, the most Gracious and the most Merciful. All my praises and gratitude to Allah, for His kindness and for meeting me with many wonderful people who, with His Grace, have had helped me tremendously in the successful completion of this research.

This research would not have been possible without the constructive comments, suggestion and encouragement received from my supervisor who has read the various draft. My special thanks and appreciation to my dedicated advisor, Assoc. Prof. Dr. Mohd Amy Azhar Bin Hj. Mohd Harif for the advices, guidelines, criticism and suggestions. For my internal examiner Assoc. Prof. Hoe Chee Hee, thank you for support and precious advice to me.

I would also like to thank my parents especially my mother, Hasnah Bt Abdullah who have been a continuous source of inspiration and encouragement. Thanks for giving a great support throughout the duration of my studies and unceasing prayers for my success. I also extend my sincere appreciation to my lovely wife Noor Hasliza Bt Mat Zain and my son, Muhammad Izzul Haziq for their encouragement, reassurances and support throughout my pursuance of the course in Master of Science (Finance) and ultimate achievement of this project.

In addition, thanks to all parties especially the management of Muda Agricultural Development Authority (MADA), my friends that helped, support and provided insight and useful ideas, constructive comments, criticism and suggestion throughout the duration of completing this research.

Thank you.

CHAPTER 1
BACKGROUND OF STUDY

1.1 Introduction

This chapter provides an overview of the project paper with a brief concept of performance measurement in the problem statement section. It will further discuss on research question and objective followed by significant and justification of the study. The summary of the chapter wraps up in the conclusion section. The next chapter will deal with literature review.

1.2 Background of the Study

Performance measurement (PM) is a topic which is often discussed but rarely defined (Neely et. al, 1995). Literally it is the process of quantifying action, where measurement is the process of quantification and action leads to performance (Neely et. al, 1995). In other words performance measure means to measure costs, quality, quantity, cycle time, efficiency, productivity of products and services. Measurement of performance is normally based on quantitative (report) base in which targets and objectives are established and accessed. Measurement is an organization wide phenomenon and such measures are inter-dependent and their aggregates contribution will reflect the effectiveness of the total company’s effort (Zairi, 1993).

Thus, performance measurement is not simply concerned with collecting data also associated with predefined performance goal or standard (Jensen, 2003). In addition, performance measurement is better thought of as an overall management system involving
