PERMISSION TO USE

In presenting this project in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this project in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of Postgraduate and Research. It is understood that any copying or publication or use of this project or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my project.

Requests for permission to copy or to make other use of materials in this project, in whole or in part, should be addressed to

Dean of Awang Had Salleh Graduate School

ABSTRACT

In spite of the progress everywhere around the world, many children are still unable to have their basic rights of living. Child welfare services are concerned with helping vulnerable children by supporting their families and preventing problems by intervention services and tools that involve various resources. Information and Communication Technology (ICT) has a powerful capacity to transmit and deliver information besides controlling the communication. Community Sponsorship System for vulnerable children is suggested in this project by employing a Client Information System (CIS) that seeks ways to manipulate data processed by the CIS in order to assure the needs of vulnerable children and available services / resources are relevantly matched.
ACKNOWLEDGEMENT

Praise to Allah for his guidance and blessing for giving me the strength and perseverance to complete this study. I am heartily thankful to my supervisor: Dr. Yuhanis binti Yusof for her invaluable advice, constant guidance, insight, knowledge, kindness and encouragement from the beginning to the end of this study. I would like also to thank my late parents (God have mercy on them), for their love and support they gave me through my whole life. Until now their spirit still guarding and inspiring my steps to pursue my goals and helping me through the most difficult times. Equal gratitude goes to my family, brother and nephews for their continuous love and support. I also would like to express my most sincere appreciation to Dr. Mohammed R. Taka, Dean of Baghdad College of Economical Sciences University for his encouragement and support towards accomplishing my Master study. Last but not least I would like to thank all professors, instructors, lecturers of School of Computing, University Utara Malaysia (UUM) for the support and knowledge they gave me through my Master study, my evaluator Madam Nur Azzah Abu Bakar for her wonderful suggestions during evaluation. Equal thanks go to all my precious friends and colleagues who gave me their love and support.

Thank You UUM

CHAPTER ONE

INTRODUCTION

1.1 Overview

Child welfare service is a broad social work area concerning the support for families and preventing problems by intervention services and tools that involves various resources. It tends to understand acts and/or circumstances thought to harm children in the context of psychological or social difficulties experienced by their families (Spratt, 2001). In the last twenty years, a great deal of discussion and interest was spend about the most appropriate policy paradigm for delivering children’s services (Lonne, Parton, Thomson & Harries, 2009). With the entrance of the new century, a noticeable transformation was witnessed in child welfare services around the world. Families could be empowered to look after their children by providing them with support systems or services. With this they are more included and the individual accountability and choices are increased (Dumbrill, 2006).

In spite of the incredible progress everywhere, many children around the world are still suffering from different circumstances that prevent them from
