## **KEBENARAN MERUJUK**

Kertas projek penyelidikan ini dikemukakan sebagai memenuhi keperluan pengijazahan program sarjana Universiti Utara Malaysia (UUM), Sintok, Kedah Darul Aman. Saya bersetuju membenarkan pihak perpustakaan UUM mempamerkannya sebagai bahan rujukan umum. Saya juga bersetuju bahawa sebarang bentuk salinan sama ada secara keseluruhan atau sebahagian daripada kertas projek ini untuk tujuan akademik adalah dibolehkan dengan kebenaran penyelia projek ini iaitu Dr. Chandrakantan a/l Subramaniam, CEDI, Universiti Utara Malaysia. Sebarang bentuk salinan dan cetakan bagi tujuan komersil adalah dilarang sama sekali tanpa kebenaran bertulis daripada penyelidik. Pernyataan rujukan kepada penulis dan UUM perlulah dinyatakan bagi sebarang bentuk rujukan ke atas kertas projek ini.

Kebenaran untuk menyalin atau menggunakan kertas projek ini sama ada keseluruhan atau sebahagian daripadanya hendaklah dipohon melalui:

## **ABSTRAK**

Agensi-agensi khusus yang terlibat dalam keselamatan dan kesihatan pekerjaan seperti Jabatan Keselamatan dan Kesihatan Pekerjaan (JKKP), Kongres Kesatuan Sekerja Malaysia (MTUC), Institut Keselamatan dan Kesihatan Pekerjaan Kebangsaan (NIOSH), Pertubuhan Keselamatan Sosial (PERKESO) dan lain-lain mendedahkan yang tahap keselamatan dan kesihatan pekerjaan di Malaysia masih tidak memuaskan. Kajian ini mengkaji tahap keselamatan dan kesihatan pekerjaan sektor awam dengan fokus kajian adalah di Jabatan Bomba dan Penyelamat, Malaysia (JBPM). Anggota bomba adalah terdedah kepada risiko dan hazad yang membahayakan ketika menjalankan tugas pemadam dan penyelamatan dan ini membayangkan kepada satu keperluan kajian dijalankan. Justeru, tujuan kajian ialah untuk memerhatikan kelakuan pematuhan keselamatan di kalangan anggota bomba. Kajian dilaksanakan dengan menggunakan pendekatan kuantitatif melalui borang kajiselidik yang diedarkan kepada anggota bomba yang bertugas dalam bidang operasi. Hasil kajian menunjukkan bahawa keselamatan rakan sekerja, keselamatan penyelia dan program keselamatan amat signifikan dalam menerangkan varians berhubung pematuhan keselamatan pekerjaan. Implikasi-implikasi dan arahan-arahan penyelidikan masa depan seterusnya juga turut dibincangkan.

## **ABSTRACT**

Specific agencies that are involved in occupational safety and health namely Department of Occupational Safety and Health (DOSH), Malaysia Trade Union Congress (MTUC), National Institute of Safety and Health (NIOSH), Social Security Organization (SOCSO) and others reveal that occupational safety and health level in Malaysia is still unsatisfactory. This study examined the level of safety and health of Fire and Rescue Department of Malaysia (FRDM). Firemen are exposed to risk and hazard while performing their duties namely during conducting extinguishing operation and rescue indicates a need to be investigated. Hence, the aim of the study is to observe safety compliance behaviour level among firemen. This study employed a quantitative approach through distribution of questionnaire based survey among firemen that are engaged in operational duties. The study shows that co-worker safety, supervisor safety and satisfaction with safety programme is significantly explaining the variance in compliance with safety behaviour. Implications and future research directions are further discussed.

**Didedikasikan Kepada Individu Yang Berminat Di Dalam  
Bidang Keselamatan Dan Kesihatan Pekerjaan.**

## **PENGHARGAAN**

Dengan Nama Allah Yang Maha Pemurah Lagi Maha Mengasihani Dan Selawat Serta Salam kepada RasulNya yang telah membimbing umat ke jalan kebenaran. Alhamdulillah dengan kehendak dan izinNya beroleh saya kekuatan bagi menyempurnakan laporan Projek Sarjana Sains Pengurusan ini.

Pada kesempatan yang ada ini juga saya ingin merakamkan jutaan terima kasih dan setinggi-tinggi penghargaan kepada penyelia projek ini Dr. Chandrakantan a/l Subramaniam yang telah memberi dorongan, semangat, nasihat dan tanpa jemu membimbing saya di sepanjang tempoh penghasilan laporan projek ini. Tidak lupa juga kepada En. Ruzain Bin Idris yang telah memberi nasihat dan panduan dalam penghasilan laporan ini.

Penghargaan yang tidak terhingga juga ditujukan buat suami tercinta Mohamed Nazarudin Bin Abu Samah serta anak-anak yang dikasihi Nursyahzanani, Nurin Batrysia dan Danish kerana dorongan dan pengorbanan diberikan. Tidak dilupakan juga buat abah (En.Saidon) dan emak (Pn.Rahmah), ibu dan bapa mertua serta keluarga atas dorongan dan doa diberikan. Jasa dan pengorbanan kalian pasti tidak akan dilupakan.

Kepada rakan-rakan seperjuangan terima kasih diucapkan atas dorongan, persahabatan dengan kalian memberikan suatu pengalaman yang sungguh besar pengertiannya.

Pengakhir kalam, semoga laporan ini berguna untuk menjadi rujukan buat semua.

## **BAB 1**

### **PENGENALAN**

#### **1.1 Latar Belakang Kajian**

Adakah kita berasa ngeri dan sebak apabila disajikan dengan berita mengenai kemalangan di tempat kerja yang memang kerap didengari, ditontoni dan dibaca. Walaupun kadar kecederaan dan kehilangan nyawa akibat kemalangan pekerjaan tidaklah setinggi kadar kehilangan nyawa disebabkan oleh kemalangan jalanraya tetapi perkara ini tidak seharusnya dipandang remeh memandangkan mereka yang terlibat adalah merupakan gunatenaga aktif negara yang menjadi penyumbang kepada ekonomi dan jentera pentadbiran negara. Anehnya, ada antara kemalangan itu berlaku berulang-ulang seolah-olah langkah pencegahan tidak memberi kesan lantaran kita tidak mempelajari dan mengambil ikhtibar dari kelemahan yang berlaku. Lebih memburukkan keadaan apabila segelintir dari kita bersikap mengambil mudah isu keselamatan pekerjaan dan berasakan kemalangan itu suatu lumrah dan hakikat yang memang akan berlaku dan tidak dapat dielakkan dalam dunia pekerjaan.

Oleh kerana kemalangan pekerjaan melibatkan manusia, maka manusialah yang bertanggungjawab terhadap kemalangan. Jika semua yang ada pada sekeliling manusia itu hazard, maka manusialah yang berperanan untuk mencipta, mengguna, mempunyai, menyelenggara, mengawal dan melupuskan hazard tersebut. Dengan kata lain, setelah mencipta kaedah dan mesin yang boleh mendarangkan hazard dan risiko pekerjaan, manusia juga bertanggungjawab mencipta kaedah atau mekanisme
