PERMISSION TO USE

In presenting this thesis in fulfillment of the requirements for the postgraduate degree from the Universiti Utara Malaysia, I agree that the Universiti Library may take it freely available for inspection. I further agree that the permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in his absence, by the Dean of the Center for Graduate Studies. It is understood that any copy or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to the Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or make other use of material in this thesis in whole or in part should be addressed to:

Dean of the Center for Graduate Studies  
Universiti Utara Malaysia

Malaysia
ABSTRACT

Using the theory acceptance model as its basis, this study is to identify the relationships among perceived usefulness, perceived ease of use and computerized implementation. Furthermore, for body of knowledge, this study will present the clear description of information technology implementation such as internet among university staff, lecturer and students. The significance of this research also to apply the TAM in the context of computerized acceptance to the management information system in college of business. This study proposes the usefulness and ease of use as the construct to enhance the understanding of an individual's acceptance behavior of ICT in COB of UUM context. Technology acceptance model plays an important role in the computerized management information system.
ACKNOWLEDGMENT

Praise and gratitude be given to Allah the Almighty for putting forward me such a great strength, patience, courage, and ability to complete this project.

My excessive gratefulness to my supportive and helpful supervisor, Mr. Abdul Manaf for assessing and guiding me in the completion of the research. With all truthfulness, without his, the project would not have been a complete one. He has really been for me a center of motivation and guidance. I am truly grateful to his continual support and cooperation, as being prepared to assist me all along the completion of the project.

I would like to present my thanks to my father who has always been there for me, my mother and all my family.

My demonstrative appreciations to all my friends, colleagues, all College of Business staff, and everyone who has helped either directly or indirectly to the completion of this project.

## CHAPTER 1: INTRODUCTION

1.1 Background of the Study  
1.2 Problem Statement  
1.3 Research Questions  
1.4 Research Objectives  
1.5 Significant Study  
1.6 Scope of the Study  
1.7 Conclusion  

## CHAPTER 2: LITERATURE REVIEW

2.1 Introduction  
2.2 Technology Acceptance Model (TAM)  
2.2.1 Perceived Usefulness  
2.2.2 Perceived Ease of Use  
2.3 Perceived Ease of Use and Perceived Usefulness toward Acceptance Management Information System  

vi
CHAPTER 3: RESEARCH METHODOLOGY

3.1 Introduction
3.2 Research Design
3.3 Research Framework
3.4 Hypothesis
3.5 Measurement of Variables
3.6 Population and Sample
3.7 Data Collection Technique
3.8 Data Analysis Technique
3.9 Conclusion

CHAPTER 4: FINDINGS

4.1 Introduction
4.2 Profiles of Respondents
4.3 Descriptive Frequency of Variables
4.4 Reliability of Variable and Measurements
4.5 Correlation among Variables
4.6 Result of Hypothesis Testing
4.6.1 Regression between Perceived Ease of Use to Behavior
4.6.2 Linear Regression between Perceived Usefulness to Behavior
CHAPTER 5: DISCUSSIONS, CONCLUSIONS AND RECOMMENDATIONS

5.1 Introduction 34
5.2 Discussions 34
5.3 Contribution of the Study 35
5.3.1 Theoretical Contribution 35
5.3.2 Practical Contribution 36
5.4 Limitation of Study 37
5.6 Recommendation 38
5.7 Conclusion 39

CHAPTER 1
INTRODUCTION

1.1 Background of the Study

Information and Communications Technologies (ICT) are radically changing the competitiveness of organizations. The Internet is revolutionizing the way business is done due to technological developments in the area of ICT. The use of the Internet along with a range of other (ICT) is transforming how business is done locally and globally (Payne, 2001). The internet is linked with network of computer; it is valuable, powerful, and fast growing business tool because it is flexible, economical, and easy to use. The emergence and the popularity of the internet allow business to get more effective and efficient.

The advent of the personal computer and the Internet has inevitably changed the way we live. These technologies, as well as others, have altered the method in which people work, communicate, shop, and even learn. Distance education, a form of education traditionally associated with correspondence courses, has benefited greatly from the new technological devices of the 21st century (Davis, 1989). Today, communication tools such as e-mail, satellite connections, and video conferencing software have provided educators with the tools to provide synchronous as well as asynchronous communication with their students (Davis & Bostrom, 1993).
