PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a post graduate degree from Universiti Utara Malaysia, I agree that University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in his absence, by the Dean of Othman Yeop Abdullah Graduate School of Business. It is understood that any copying or publication or use of this thesis or part thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or make other use of materials in this thesis, in whole or in part should be addressed to:

ABSTRACT

In recent times, marketing has evolved to become the backbone of any successful business activity. This study therefore seeks to investigate the nexus between marketing cost and bank performance. The study is based on a sample of 8 out of 13 commercial banks in Jordan covering a five-year period from 2006 to 2010. The selected banks were identified based on the data availability. In this study, the role of marketing activities is related to bank performance in terms of deposits from customer, loans, profit after taxes, return on assets and return on equity. Data collected were analyzed using the Pearson Correlation Matrix and Simple Linear Regression. The results show a significant positive relationship exists between marketing cost and Jordanian bank performance based on deposits from customer, loans and profits after taxation and a negative relation exists between marketing cost and bank performance in light of return on assets. The findings further reveal that there is no significant link between marketing cost and return on equity in Jordanian banks. Growing marketing cost in improving bank performance is also evidenced and supported in the study, although the marketing role is not the single factor that determines bank performance.
ACKNOWLEDGEMENTS

First and foremost, praise and gratitude go to Allah SWT, the Almighty, for bestowing on me with great strength, patience, and courage in completing my program of study and for the successful completion of this thesis.

There are a number of individuals whom I owe my deepest gratitude. Firstly, my sincere appreciation, gratitude and heartfelt thanks go to my supervisor, Associate Professor Mohamed Nasser Bin Katib, the dedicated and inspiring mentor for his continuous guidance, suggestions, and constructive criticisms all in a bid to make this work a success. I thank him very much. Secondly, my heartfelt gratitude also goes to all lecturers in College of Business, Universiti Utara Malaysia that have taught me.

With deep sense of affection, I will like to acknowledge my mother, the source of love and compassion to the candle that lit the path of my life to the spirit that surrounded me with the warm fragrance of love and security. To my late father, your presence still remain evergreen in my memory for the indelible mark you left in me and for making me what I am today, may your gentle soul continue to rest in peace, Amin.

To all my brothers, sisters and family members, I say a big thank for the moral and financial support you all rendered to see to the successful completion of my studies, may the Almighty Allah reward you all, Amin.

Finally, I would like to acknowledge all my friends here in UUM and Iraq for the tremendous support you all rendered to me, standing by me through bad and good times, I will forever cherish your friendship and may Almighty Allah continue to spare our lives and grant us long life, Amin.

CHAPTER ONE
INTRODUCTION

1.1 Introduction

The marketing of financial services and banks performance like those of other countries is premised on the acceptance of deposits, lending, effect domestic and foreign payments and provide property management and trustee services among other wide range of financial services (Firpo and Consulting, 2005).

The marketing of financial services is a unique and highly specialized branch of marketing. The practice of advertising, promoting, and selling financial products and services is in many ways far more complex than the selling of consumer packaged goods, automobiles, electronics, or other forms of goods or services (Brenkert, 2010).

The environment in which financial services are marketed is becoming more competitive, making the task of marketing financial services increasingly challenging and specialized. Financial services marketers are challenged every day by the unique characteristics of the products they market. There are many predictable behaviors that consumers often exhibit in their dealings with financial services providers. The predictability of these behaviors and the abundance of data on existing and potential customers enable a uniquely scientific approach to developing and executing successful strategies for the marketing of financial services, much more so than in other markets (Lovelock, 2008).

The factors that contributed to the increased interest in marketing banking can be viewed from two sides. The first is external and is in relative decline in income due to increased competition among banks between each other and to other financial institutions. The second is an internal awareness of the need for banks to for the two
