ABSTRACT

The great achievements of PT. PUSRI have resulted from strategies and innovation based upon the various management areas and subsidiaries holding company. The management of PUSRI has built a strong foundation and continuously directed the company to ensure the good implementation of strategies. PPD as a central marketing office which has responsibility to create the market strategy and distribute the fertilizers should able to give the customers such a good services and good reputation for PUSRI itself. Consequently the company require hard working, high commitment and competent staff members. Therefore the purpose of the study is to examine empirically the relationship between management practices on job performance at PPD SUMSEL. Specifically the dimension of management practices that was examined was leadership practices, communication practices and reward practices. The respondents of the study are 106 employees. The Pearson correlation suggested management practices have significant correlation with job performance. Multiple regression analysis indicated leadership and reward practices were the predictors in explaining the respondents’ job performance. The findings were discussed and recommendations for future research were also addressed.
ACKNOWLEDGEMENT

First and foremost praise and gratitude go to Allah, the Almighty, for bestowing me with great strength, patience, and courage in completing this thesis. There are a number of individuals whom I owe my deepest gratitude. Firstly, my sincere, appreciation, gratitude, and heartfelt thanks go to my supervisor Dr. Muhammad Nasri Bin Md Hussain and my examiner Dr. Abdullah Bin Haji Abdul Ghani, the dedicated and aspiring mentor for his continuous guidance, suggestions, and constructive criticisms all in a bid to make this work a success. I thank him very much. Moreover, my heartfelt thanks are extended to the academic and non-academic for their helpful assistance, and especially to all lecturers in School of Business at Universiti Utara Malaysia that have trained me as a student.

My deepest thanks and appreciation to my beloved parents Syahbana and Rahmawati, my siblings Rany, Dea, and Gandhi for the prayers, their unconditional love, encouragement, supports and sacrifices in the success of my study. What I have done, I have done to make them proud.

Last but definitely not the least, I would also like to thank all of my friends and everyone that have been contributed by supporting my work and help myself during the study, especially to my fellow post-graduate colleagues. This journey would not have been possible without them.

CHAPTER 1

INTRODUCTION

1.1 Introduction

This chapter explores the problem statement, objectives of the study, research questions, significance of the study, and scope of the study. Hopes this research able to contribute and get more reliable data about the management practices on employee performance in PUSRI Regional Marketing Office (Pemasaran Pusri Daerah (PPD)) Palembang, South Sumatera.

There is no doubt that management practices are linked to the productivity and performance of a company. Researcher provide an extensive review of the literature in terms of research findings from studies that have been trying to measure and understand the impact of management practices toward job performance. Management is the process of designing and maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims (Koontz and Weihrich, 1990). In its expanded form, this basic definition means several things. As managers, people carry out the managerial functions of planning, organizing, staffing, leading, and controlling. The aim of all managers is the same, to create kind of benefit which at the end managing is concerned with productivity which implies effectiveness and efficiency.
