Abstract

The objective of this study is to investigate the relationship among factors such as Attitude, Subjective Norms, Perceived Behavioural Control, Perceived Quality and Satisfaction with Tourists’ Visit Intention. A total 132 respondents participated in this study. All five factors were found to have a positive relationship with Tourists’ Visit Intention. The Pearson correlation analysis conducted showed that Perceived Behavioural Control is the strongest factor influencing Tourists’ Visit Intention. The other four factors showed a weak relationship with Tourists’ Visit Intention. Apart from Perceived Behavioural Control, one demographic factor which is Preferred Tourists’ Destination showed a significant relationship with Tourists’ Visit Intention. Intention can explain how an action was understood and remembered, how it was responded to, and ability to predict about the future action might be taken place. Therefore, hotel operators should make an assessment of the market segment and study the abilities of their customers and try to synchronize their services to this market.

Acknowledgement

Alhamdulillah. Thanks to Allah SWT, whom with His willing gave me the strength and blessing in completing this study. I am truly grateful to Him for the inspirations and spirit.

A very special thanks and sincere appreciation goes to my helpful supervisor, Haji Mohamad Zainol Abidin bin Adam, Senior Lecturer, College of Business, Universiti Utara Malaysia, for his wonderful guidance and enormous patience. The supervision and support that he gave throughout this study truly help the progression and smoothness of it. Once again, the co-operation given is muchly appreciated.

Deepest thanks and appreciation to my father, Shamsudin bin Shaari, my mother, Normariyani binti Ahmad, my siblings, friends and other family members for their encouragement, constructive suggestion and support during my study period. Their help and support gave me the will and vigor to complete this research.

Last but not least, my word of thanks is also extended to the respondents who sacrifice their most valuable time and energy to help me during the data collection process. Their cooperation really facilitates my progress in my study at great length. May Allah S.W.T. reward the kindness of everyone that I had mentioned above.

1 BACKGROUND AND AIMS

1.0 CHAPTER INTRODUCTION

This study investigates the influence of customer purchase intention towards hotel services. Specifically, it will discuss the importance of the customer intention variables such as Attitude, Subjective Norms, Perceived Behavioural Control, Perceived Quality and Satisfaction on Tourists’ Visiting Intention. This chapter contains (1) Background of the Study, (2) Problem Statement, (3) Objectives of the Study, (4) Research Questions, (5) Theoretical Framework, (6) Hypotheses and (7) Significance of the Study.

Part One Background of the Study explains the general description of Visiting Intention. Part Two Problem Statement will describe the issue in this study. Part Three Objectives of the Study provides the detailed overview on how to achieve the objectives of this study. Part Four Research Questions provide the questions to be addressed in this study. Part Five Theoretical Framework explains the theoretical framework for this study. Part Six outlines the hypotheses of the study while part Seven discusses the importance and purpose of this study.
