PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for the postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in their absence by the Dean, Research and Innovation Office, UUM College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part should be addressed to:

Dean
College of Business
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darul Aman.
ABSTRACT

Using an already developed model for measuring the quality of online services and its acceptance, the author of this thesis has developed and later on modified a theoretical model (instrument) for measuring the quality and acceptance by the people of online banking services in particular. Using quantitative research method including the design and distribution of a questionnaire, empirical data was collected on which statistical analysis has been performed. As a result of the conducted analysis, the initial theoretical model has been modified, so that the final version of the model (instrument) for measuring quality and acceptance of online banking services includes four quality dimensions (Service Performance, Website Characteristics, Communication and Efficiency) with total of 24 items (questions). Furthermore, based on the modified theoretical model, customer satisfaction with different aspects of the online banking services has been evaluated. Based on the results of the Analysis of the Empirical Data, managerial recommendations are given. Suggestions for further research on quality of online banking services are also offered.
ACKNOWLEDGEMENT

In the name of Allah, Most Gracious and Most Merciful. First and foremost, Alhamdulillah, praises to Allah S.W.T for giving me the will and strength in enduring all the problems in completing this thesis.

My highest and most sincere appreciation goes to my beloved parents, and my brothers and sisters, who have always encouraged and guided me to be independent, never try to limit my aspirations.

I would like to express my deep and sincere gratitude to my supervisor, Mr. Badruddin A. Rahman for his patience, encouragement and kindness throughout the completion of this project paper. His wide knowledge and his logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis. I’m very grateful from him not only for his assistance, but also he is great person as a human. I’ve never forgotten such kind of people.

I would like to express my high appreciation to my all lecturers of College of Business, especially, lecturers of the Division of Finance and Banking. Thank you very much again for everyone including those who I have probably forgotten to mention here. I am indebted to many people whose kind assistance has contributed immensely to the successful completion of this thesis.

CHAPTER ONE
INTRODUCTION

1.0 Introduction

The aim of this chapter to inform the reader about the increasing importance of online banking services, their quality and people’s is recognition. The author discuss the problem, define the purpose and research questions and point out the delimitations of the presented study.

1.1 Background

Globalization and deregulations have increased competition in the marketplace, as nowadays it has become much easier for companies to cross borders and compete internationally. With increased competition, organizations have to constantly try to increase their productivity and decrease their costs. One way for them to achieve that is by investing in information technology (Fredriksson, 2003).

The recent development of information technology has led to major changes in the way services are delivered to the customers. Nowadays, customers are using more and more self-service options, which are more convenient and fast. In addition, the advent and use of the Internet has changed considerably the daily activities of most people, such as shopping and banking. The popularity of banking services delivered over the Internet (online banking services) is increasing in recent years (Fredriksson, 2003). According to the figures presented by the Statistical Central Bureau (SCB) in Uzbekistan Appendix I, during the first quarter of 2005, 51% of the population aged between 16 and 74 has used online banking services.
