ABSTRACT

Corporate governance (CG) has received much attention in the current studies all over the world especially after many corporate scandals and the failures of some biggest firms around the world such as Commerce Bank (1991) Enron (2001), Adelphia (2002), and World Com (2002).

The aim of this study is to examine the relationship between board mechanisms (audit committee size, audit committee composition, board size, and board composition) and firm performance (ROA) based on the annual reports of listed companies in the year 2011 of sample of non-financial firms in the Saudi Market (Tadawul). For the purpose of this study, data was collected from a sample of 102 non-financial listed companies.

Furthermore, an analysis of regression analysis is utilized to examine the relationship between board characteristics and firm performance. The results of this study reveal that audit committee size, audit committee composition and board size have no effect on firm performance in the selected sample while board composition has a significant negative relationship with firm performance.
ACKNOWLEDGMENT

In the name of Allah, the Most Gracious and Most Merciful

Above all things, I gave praise, glory, and honor unto Allah for helping me to complete this project. And also all praise to Allah for all his blessings and guidance which provided me the strength to face all the tribulations and trials in completing this project.

There are number of individuals whom I owe gratitude. I am indebted to my father, Ahid Ghabayen for his caring and encouraging me to continue my high studies. My deepest gratitude goes to my beloved mother, Um Mohammad, she is simply perfect. I have no suitable words that can fully describe my everlasting love to her. She is forever remembered.

My special love and appreciation go to my brothers Saqir, Nael, Khadoon and Ahmad and all my sisters for their support, tireless patience, and faith in me to complete this tedious task. My general love and appreciation go to my brothers-in-law, my sisters-in-law and my friends, whether in Malaysia or in Jordan, who instilled in me the value of hard work and dedication.

I wish to express my deepest gratitude and heartfelt thanks to my supervisor, Dr. Kamarul Bahrain Abdul Manaf, for his discerning guidance, positive criticisms and valuable advice throughout the undertaking of this study.

Sincerely,

Mohammad Ahid Mohammad Ghabayen

CHAPTER ONE

INTRODUCTION

1.1 Background

Corporate governance (CG) has received much attention in the current studies all over the world especially after many corporate scandals and the failures of some biggest firms around the world such as Commerce Bank (1991), Enron (2001), Adelphia (2002), and World Com (2002). Practically, transparency and accountability became needed for attracting investors and capital funds on one hand, and for financial security and stability on the other hand. As the environment business has become very competitive, the uncertainty and risk are the main characteristics for today’s business.

Under this modern environment, it became very difficult to predict and control the factors that affect the performance of the firms (Kuratko & Morris, 2003). Good CG practice could be one of the best solutions to reduce the uncertainty and the risk in the current business environment. Furthermore, it could attract investment capital as a result of reducing the risk level.

In fact, the subject of CG is practically very important. Even in developed markets, there is a great debate on how bad or good the current CG mechanisms are (Shleifer & Vishny, 1997). Hence, many international organizations in the world such as the International Corporate Governance Network (ICGN) and the Organization for Economic Cooperation and Development (OECD) have also developed guidelines for CG. The OECD issued a guidance publication for better corporate governance titled “Principles of Corporate Governance” in 1998 and reviewed it in 2004. These principles focus on the performance of long-term economics and enhancement the
