PERMISSION TO USE

In presenting this project in partial fulfillment of the requirements for a postgraduate degree from University Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of the Graduate School.

It is understood that any copying or publication or use of this project or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part should be addressed to:

Dean of Postgraduate
College of Arts and Sciences (UUM-CAS)

Kedah Darul Aman.
ABSTRACT

Information world today’s, where the internet and web technology are used widely. Most of the organizations acknowledge the importance of SMS system and WEB in reaching and interacting with their users. However, there is much discussion regarding the effectiveness when it comes to SMS system. This study helped organization’s students, users of organization, and willing to accept, reading and using SMS messages: effective is SMS messages compared to traditional communications. The goal of this study is to investigate the effectiveness of SMS messages compared to traditional ways for different aspects and on the other hand, to develop prototype by using Web and SMS technology to apply this system and extent students are willing to accept SMS messages on their mobile phone, since the effectiveness of SMS messages highly depends on this willing. The results of this research indicate that the use of the web and SMS for the benefit of the organization and students in all aspects instead using traditional ways to contact.
ACKNOWLEDGEMENTS

“By the Name of Allah SWT, the Most Gracious and the Most Merciful”

First of all, thank to Allah S.W.T for this Almighty that makes me healthy throughout completing this research paper. Also take this chance to all who have contributed their help and give me support in completing this study. Without whose cooperation, encouragement, and suggestions, this study would not have been possible.

I would like to thank and express my appreciation to my supervisor and my leader, Mr. Abdul Razak bin Rahmat how gives me full support, courage, constructive suggestion, knowledge and guidance consistence during this study. I appreciate the time he spent discussing the progress of the study.

Also a pleasure to thank and present this study to my first teacher who has helped me step by step to inspire me through the studying terms. I dedicate all the brilliant moments of this study to my father, Mr.Arsan Ehnayan Aloun.

Special thanks to my beloved family, especially my uncle D. Matrok Ehnayan Aloun, and my cousin D.Salim Safah Aloun, who sacrifice much and supported my efforts with love, understanding and constants encouragement without which it would not have been possible for me to earn this master’s degree. Thanks for their never ending support.

Finally, I would like to dedicate my sincere gratitude and appreciation to friend around me for their assistance and support throughout the duration of my graduate studies. Once again, thanks to all who have contributed in completing my study. I cherish all your support, guidance and help.
# Table of Contents

## CHAPTER ONE: INTRODUCTION
1.2 STUDY BACKGROUND ............................................................................................................................. 1  
1.3 PROBLEM STATEMENT ............................................................................................................................ 3  
1.4 RESEARCH QUESTIONS ............................................................................................................................ 4  
1.5 RESEARCH OBJECTIVE ............................................................................................................................ 5  
1.6 SCOPE OF RESEARCH ............................................................................................................................... 5  
1.7 SIGNIFICANT OF THE RESEARCH ............................................................................................................. 6  
1.8 CONCLUSION ........................................................................................................................................... 6  
1.9 THESIS OUTLINE ...................................................................................................................................... 7  

## CHAPTER TWO: LITERATURE VIEW
2.1 INTRODUCTION ....................................................................................................................................... 9  
2.2 MOBILE APPLICATIONS .......................................................................................................................... 9  
2.3 WEB- BASED APPLICATION .................................................................................................................... 11  
2.4 MOBILE WEB APPLICATIONS ENABLING TECHNOLOGIES ................................................................. 11  
2.5 WEB AND WAP DEFINITION .................................................................................................................. 12  
2.6 THE WAP PROTOCOL STACK .............................................................................................................. 13  
2.7 MOBILE PHONE COMMUNITIES .......................................................................................................... 16  
2.8 JAVA/J2EE ............................................................................................................................................. 16  
2.9 DATABASE MANAGEMENT SYSTEM ................................................................................................... 17  
2.10 SMS IN ORGANIZATION BUSSINES ................................................................................................. 18  
2.11 MOBILE SERVICES WITH TOURISM GUIDE .................................................................................... 18  
2.12 MOBILE APPLICATION WITH TRANSPORTATION ......................................................................... 19  
2.13 ZETOON ORGANIZATION ................................................................................................................... 19  
2.14 Conclusion ........................................................................................................................................... 20
CHAPTER THREE: RESEARCH METHODOLOGY
3.1 INTRODUCTION ....................................................................................................................................... 21
  3.1.1 AWARENESS OF PROBLEM ............................................................................................................. 22
  3.1.2 SUGGESTION ........................................................................................................................ 23
  3.1.3 DEVELOPMENT ...................................................................................................................... 24
  3.1.4 EVALUATION ......................................................................................................................... 28
  3.1.5 CONCLUSION ......................................................................................................................... 28
3.2 SUMMARY ............................................................................................................................................ 29

CHAPTER FOUR: ANALYSIS AND DESIGN
4.1 INTRODUCTION ..................................................................................................................................... 30
4.2 USE CASE MODEL .................................................................................................................................. 30
4.3 FUNCTIONAL AND NON-FUNCTIONAL REQUIREMENTS ................................................................. 32
  4.3.1 Functional Requirements: Administrator Requirements ..................................................... 32
  4.3.2 NON-FUNCTIONAL REQUIREMENTS .................................................................................... 32
4.4 USE CASE DIAGRAM ............................................................................................................................. 33
4.5 USE CASE SPECIFICATION ..................................................................................................................... 36
  4.5.1 USE CASE SPECIFICATION FOR LOGIN ................................................................................. 36
  4.5.2 USE CASE SPECIFICATION FOR MANAGE STUDENT ............................................................ 36
  4.5.3 USE CASE SPECIFICATION FOR MANAGE MESSAGE ............................................................ 37
  4.5.4 USE CASE SPECIFICATION FOR SEND MESSAGE ................................................................. 38
  4.5.5 USE CASE SPECIFICATION FOR MANAGE MESSAGE ............................................................ 39
  4.5.6 USE CASE SPECIFICATION FOR VIEW MESSAGE ................................................................... 39
4.5 SEQUENCES DIAGRAM ......................................................................................................................... 40
  4.5.1 SEQUENCES DIAGRAM FOR LOGIN ...................................................................................... 41
  4.5.2 SEQUENCES DIAGRAM FOR MANAGE STUDENT ................................................................. 43
  4.5.3 SEQUENCES DIAGRAM FOR ADD MESSAGE ........................................................................... 44
LIST OF TABLE

Table 2.0: WEB application vs. WAP application ................................................................. 13
Table 4.1: use case specification for login. ........................................................................ 36
Table 4.2: use case specification for Manage Student. ....................................................... 37
Table 4.3: use case specification for manage message ....................................................... 37
