## **PERMISSION TO USE**

In presenting this report in partial fulfillment of the requirements for a Master of Science in IT degree from University Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in their absence by the Academic Dean Awang Had Salleh Graduate School of Arts and Sciences. It understands that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to

**Dean Awang Had Salleh Graduate School College of Art and Sciences

## **Abstract**

University Utara Malaysia (UUM) has more than 28 thousand local students and more than two thousand international students. After conducting interviews with some of UUM students, the researcher found that the majority of them have had a lot of difficulties during their staying in this region; one of those difficulties is to find primary products. Each student especially international students, need to buy basic needs during the early days in UUM within short time. On other side, they need to sell them again in certain time when they finish their studying. This project aims to develop a system for managing selling and buying products or belongings which could be used to assist students in UUM to advertise their products and in an appropriate and quick way. This research will evaluate the acceptance of the proposed system.

## **Acknowledgement**

*By the Name of Allah, the Beneficent and Merciful*

First and foremost, thanks to Allah (SAW), I would like to thank my supervisor Mr.Azmi bin Md Saman without his knowledge and assistance this study would not have been successful. I am thankful also for my evaluators.

I am indeed very grateful to have all of you around me thus given courage and energy to complete this project. Also thank to all my lecturers and friends who help me and give me emotional support during my study, Thanks to all.

Thank you UUM

Othman Rababa

June27, 2012

## **Dedication**

For my father pure soul. And for my dearest family members: my mother, my brothers, my sisters, my wife and my son. For their continuous support, understanding and encouragement until this project and my studying has finally finished.

# **CHAPTER ONE**

## **INTRODUCTION**

The present chapter elaborates on the study's core idea, provides the reasons behind the study and discusses the major elements contained in the study. The initial subtopic contains a description of the complete idea of the study and the motivation behind it leading to the completion of the project. This is followed by the elaboration of the problem statement, research questions, study objectives, significance of the study and the study scope. The final subtopic discusses the organization of the thesis.

### **1.1 Introduction**

The Universiti Utara Malaysia (UUM) was established on February 16, 1984, with the primary mission of providing academic superiority in the faculties of Business Management Education, Information Technology and Quality Management. True to its unwavering attempt to achieve its goal, the university has, since its inception made sure that its academic areas are concentrated on disciplines including management, banking and finance, social development, human resources development and international affairs management.

The campus is located 10 kilometers east of Changlun, a small town situated on the north highway, in the middle of tropical rain forest against a mountainous background. The rivers of Sintok and Badak run through the campus creating what is considered as one of the most scenic and beautiful campuses in Malaysia. UUM
