ABSTRACT

The study attempts to investigate the impact influence of macroeconomic variables on Sukuk and conventional bonds issuance during periods that include the Malaysian period of economic crisis. This study examines three variables in relation to Sukuk and conventional bonds issuance for the period of 1990-2011: (i) gross domestic product (GDP), (ii) inflation rate, and (iii) interest rate. The results of the regression analysis for Sukuk indicate that, there is a negative effect and significant relationships between GDP, inflation rate and interest rate with Sukuk issuance. However, for conventional bonds, only GDP shows a significant negative effect on the relationship.

Keywords: Financial Crisis, Sukuk, conventional bonds. Malaysia’s Capital Market
ABSTRACT

Katakuci: Krisis Kewangan, Sukuk, bon konvensional, Pasaran Modal Malaysia
ACKNOWLEDGEMENTS

First, I would like to express my utmost gratitude to Almighty Allah for his creation and making me submissive to Him.

I would like to gratefully acknowledge the enthusiastic supervision of my project paper, by Associate Professor Dr. Jauhari Dahalan. I could not have imagined having a better adviser and mentor for my Masters project, and without his inspiration, stimulating suggestions, sound advice, guidance, and active participation in the process of my work, I would never have finished this project.

Next, I would like to extend my special thanks and gratitude to my beloved family, especially to my lovely mother, my father and my brothers, Noureddine, Abdulsalam, Mohamed and Issa for his providing financial and moral support throughout the journey of pursuing this master course. Thank you for all the support, guidance, and love given and the most important were the trust and belief in me throughout the years.

Finally I would also like to thanks a very special friends of mine, Dr. Madi Mouhamed, Dr. Massoudi Nabil, Dr. Belghith, Dr. Radouan Lamara, Dr. Toufik Badjdadj, Dr. Gichta, Dr. Tamer, Mr. Oussama Saoula, Hassan Labgaa, Abbas Ramdani, Taher Nid, Moussab Bey, Tarek Kacemi, Mouslim Damki, Boubkar Baba, Samir, Kamel, Khaled Bachbouch, Athman, DR. Hamza Lefkir, Abd Elgani Lefkir, Djamal Roubeh, Addel Bounagab, Kassimi Abd Hakim, Thyab Halouch, Bouaoun Abd Erahman, Lakhdari Nacereddine, Lakhdari Djamal, Karwan chklawi, Moussaoui Zohir, and many others.

CHAPTER ONE

INTRODUCTION

1.1 Background of the Study

The global financial crisis of 2008-2009 and was centred in the United States has brought an enormous impact on the global economy. As the asset bubble by a number of derivative financial instruments, among other causes, the subprime boom in the housing and banking crisis led to a domino effect on consumer and investment demand exploded. The housing crisis and quickly grew into a banking crisis, with investment banks and dealers first absorb the impact before it spread to the commercial banks (Krugman, 2009).

According to Mahani and Rajah (2009), the sharply contracting economy of the United States, sent ripples across export-dependent Asian economies, which began to face a contraction as a consequence. Hence, although the Malaysian economy was insulated from the direct effects of financial exposure because the new derivatives were not allowed into the country, the global financial crisis has cast doubt on the Government’s plans to achieve vision 2020, due to a collapse in exports and a slowdown in foreign direct investment (FDI). The global financial crisis that has spilled from the financial sector to the real economy, including international trade in manufacturing commodities and service, in this case Sukuk has sometime lost the investment opportunities for Muslims that offer an expected return with low risk, because the majority of investment of opportunities is based on real estate transactions.
