DECLARATION OF THESIS WORK

I declare that this thesis is my own account of my research and contain work which has not previously been submitted for a degree at any tertiary education institution.

(HAZRUL BIN HAMZAH)
PERMISSION TO USE

In presenting this thesis in fulfillment of the requirement for a post graduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor or in his absence, by the Dean of the graduate school. It is understood that any copying or publication or use of this thesis or parts there of financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made any material from my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part should be address to:

Dean of OYA Graduate School of Business

ABSTRAK

ABSTRACT

The aim of this research is to determine and evaluate whether differences in national culture impact on the buyer behaviour of Malay and Non-Malay consumers when purchasing a mobile phone. The research was conducted in order to identify and compare key cultural attributes that influence mobile phone purchasing between Malay and Non-Malay consumers. An empirical study was based on the model of Hofstede’s dimension of Individualism /Collectivism and Power Distance as well as Schwartz’s values dimension of Power, Achievement, Hedonism and Self-Direction. The data was collected from 140 questionnaires using postgraduate students of Universiti Utara Malaysia, who’s taken the outcampus programme at Kuala Lumpur. The findings indicated that there is a significant difference between Malay and Non-Malay consumers in terms of mobile phone purchasing behaviour as Hofstede’s cultural dimensions and Schwartz’s cultural values are concerned. The findings also recommend that managers in mobile phone organizations should be concerned with the cultural dynamics of consumers as part of their going re-segmentation, communication and promotion strategies within their overall marketing strategies. Additionally, the cultural factors will assist managers to guide the specifications required for the development of online customer decision support systems.
ACKNOWLEDGEMENT

First of all, I would like to thanks Allah S.W.T. for giving me His blessing to encourage me in completing my final year project.

In completing this dissertation, I would like to thank to several people who have supported me and helped me to complete this research. Firstly, I would like to express my deepest love to my parents; Hamzah Bin Wari and Sawiyah Binti Sahnan. I believe without their support, encouragement and ‘doa’ I would not finish this dissertation. Secondly, I would like to say thank you to my supervisor Encik Abdul Manaf Bin Bohari for his supervision, patients, support and constructive comments throughout the course of this study. Finally I want to say thank to all my friends; Nur Syuhada Binti Muhammad, Noranida Binti Daud and Amran Bin Yaacob. Your support, idea and spirit encourage me to finish this special task.

To people that involved directly or not directly and who participated in the questionnaires as without your information this research would not be possible.

CHAPTER 1
INTRODUCTION

1.1 Background Of The Study
Malaysia is a special country where people live with full of respects of other’s culture and religion. The perfect mix of Malay, Chinese, Indian and other communities create a special culture since the ancient days. The different races in Malaysia have formed a unity in diversity that can be seen in the celebration of various festivals by all races that reside here (Culture of Malaysia, 2012).

According to Yakup, Mucahit and Reyhan (2011) culture can be differentiate as a complex of beliefs of human societies, their roles, their behavior, their values, traditions, customs and traditions. Beside of that culture is important concept to understand consumer behavior and it’s the sum of a shared purpose among members of society, customs, norms and traditions. Belshek (2012) in his study mention that culture affects everything people do in their society because of their ideas, values, attitudes, and normative or expected patterns of behavior due to culture is not genetically inherited, and cannot exist on its own, but is always shared by members of a society. However Halimia et al. (2011) believe that cultural differences generally lead to distinctions in consumers’ attitudes and intentions.
