MAGAZINE SYSTEM FOR SCIENTIFIC RESEARCH**

This thesis is presented to the Graduate School
In fulfillment of the requirements for
Master of Science (Information Technology)
Universiti Utara Malaysia

By

ALAA. K. FAIEQ

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a post-graduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in the whole or in part, for scholarly purposes may be granted by my supervisor or in his absence, by the Dean of Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any materials for my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part should be address to:

Dean of Faculty of Information Technology
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darul Aman

ABSTRACT

In this study noticed that magazine face difficulties in retrieving researcher and Evaluator data because they are working manually; these difficulties and problems can be summarized in organizing and managing appointments, Researcher's records, and Evaluator issues. Where are designed and implemented a computerized system to solve these problems and help manager doing their jobs in a better way. This system will improve the performance of managing all tasks in the Baghdad university magazine that it will save time and keeps and retrieve data easily and perfectly. In addition to that, the data will be more accurate, secure, and safe.

ACKNOWLEDGEMENTS

In the Name of Allah.

Most Beneficent and Most Merciful, Praise and thanks to Allah, first and last, lord and Cherisher of all the worlds who taught humankind everything they knew not. May his blessings and His Mercy be upon the holy prophet Muhammad S.A.W the best of man kind.

My aim in this study to start building my country and this is in shallah the first project to developing Education System in Baghdad University.

My heartfelt, special appreciation thanks and love go to my father Khalil Faieq Raoof, mother, My brother Munadil , my sisters, and all my relatives and My friends (Mohmmad M. Rasheed , Mutaz Al-Mefleh ,Mazen Elsayed) who have constantly, support and motivate me to complete this study. I do and will continue to pray that Allah reward all of them abundantly.

I am very grateful to Universiti Utara Malaysia and especially for my (College Arts and Science) for giving me the opportunity to complete my Master of Information Technology (IT).

I would like to thank my supervisor “ Mdm.Hamirul’Aini Hambali ” for her guidance, critique and comments. I am deeply indebted to him for her kindness and patience throughout the supervision and preparation of this research project from the start until the final stage, is invaluable to me. Words cannot express my sincere appreciation to her.

CHAPTER 1

INTRODUCTION

This chapter explains an overview of the study, problem statements, research objectives, scope of the study, significance of the study and the organization of the report.

1.1 Overview of the Study

When talking about Baghdad University and its foundation, it is basically talking about the history of higher education and scientific research in Iraq. Baghdad University is not only the largest scientific entity, but it is also the oldest one. Baghdad University anticipates that all the highly qualified lecturers, researchers and administrative personnel graduated formed a source to supply the needs of other Iraqi universities that were founded later.

At the time the Iraqi government was obligated by the demand to take few steps towards setting up the university, outstanding efforts have been done from different sectors. At the inception of the university, it included the colleges of: Law, Engineering, Education, Medicine, Pharmacy, Art, Commerce, Agriculture and Veterinary, Languages, Administrative Science, Surveying, Industrial Engineering and Physical Education were also attached to the university. The university developed itself swiftly so it was able to enroll many students and appoint qualified teaching staff due to the increasing demand of the country's rapid development.

5.4 Summary

The E-magazine system becomes an important way to universities to improve itself among other researchers. The researcher is able to understand and accept the online researches submission because it gives them the ability to work and submit their research in any time and any place. The result produced shows that the proposed prototype can be implemented.
