**PERMISSION TO USE**

In presenting this thesis in fulfillment of the requirements for the postgraduate degree from the Universiti Utara Malaysia, I agree that the Universiti Library may take it freely available for inspection. I further agree that the permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in his absence, by the Dean of the Center for Graduate Studies. It is understood that any copy or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to the Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or make other use of material in this thesis in whole or in part should be addressed to:

**Dean of the Center for Graduate Studies

## ABSTRACT

Most tourists now prefer to know the real Malaysia. Homestay website will give enough information where they can live in a traditional village and discover relish the quiet calm of the rustic life, and also cultural experience that likely to be very different from anything experienced before than in hotel. The objective of the study was to proposed a web-base Homestay reservation application for Langkawi Homestay Sdn Bhd. This research focuses on identify, design and developing prototype for the Langkawi Sdn Bhd. Futhermore, this research had covered the booking process for online Homestay application. The study found that the online reservation has provided complete information the existence of Langkawi Homestay Sdn Bhd to the tourists or customers. The user requirement of the website provided facilities to improve the Langkawi Sdn Bhd limitation within local customers, and also provide update information about tourism industry such as accommodations of Malaysia hospitality. Researcher also found that the online reservation has a multiplier effect to the customer services development. In contrast, the website is enough to fill their pleasure, education, entertainment, and profits. They view the Web and the seemingly endless dynamism, more-compact computers and higher-speed service as tools that allow them to function with increased effectiveness. All the requirement system has been completely full fill with online reservation system.

*Keyword: Online Reservation System, Web Development*

## **ACKNOWLEDGMENT**

My greatest gratitude to Allah SWT, the Grandest and Almighty, Most Gracious and the Most Merciful for giving me the chance, time, and ability to perform this study and for all the chances He has given to me until now. My greatest gratitude to Prophet Muhammad SAW for the teachings and love that he has spread to the whole world.

First and fore most, I would like to thank my supervisor, Assoc. Prof. Dr. Wan Rozaini Bt Sheik Osman, for her help, time, contribution and effort in providing guidance and constructive suggestions in performing this study, and for the understanding and support she has given.

Furthermore I would like to thank my sister Luma for her kindness, as well as all lecturers at the faculty of Information Technology, because they gave me all the information that helped me to finish my work properly.

Above all, I would like to thank my dearest mother and father and all my family members for their encouragement and support all the period of my studying especially my beloved husband Mohamed and my dearest son Omar.

## CHAPTER 1

### INTRODUCTION

#### 1.1 Background of the Study

The world of independent traveling using homestay offers great expectations, new life experiences and opportunities to make new friends. Independent travelers have to deal with balancing spontaneity with the desire to have certainty about travel and accommodation information. For the independent traveler homestay provides low cost accommodation which is used as key staging bases for exploring new countries (Columbia, 2004).

Homestay accommodation offers international students the unique opportunity of experiencing the country way of life with a family in the country. People live in homestay will be experience life with a local family during their home stay. This will be a cultural immersion opportunity, giving their chance to experience the culture, language, family life, traditional foods, and hospitality of local families (Columbia, 2004).

The objective of homestay program is not to offer inexpensive accommodation, but to give participants an opportunity to experience other country culture and lifestyle through exchange with host families, to let both the participants and the host families deepen their understanding of different cultures and customs, and to be aware of the importance of respecting differences and diversity (Division, 2005). This study determined the improvement of IT in homestay and the influence to the hospitality in Malaysia tourism context.
