PERAKUAN KERJA KERTAS PROJEK
(Certificate of Project Paper)

Saya, yang bertandatangan, memperakukan bahawa
(I, the undersigned, certify that)

AHMED ABDEL KAREEM MOHAMMAD AL-SA'DI

calon untuk Ijazah
(candidate for the degree of) **MSc. (IT)**

telah mengemukakan kertas projek yang bertajuk
(has presented his/her project paper of the following title)

DEVELOPING E-LEARNING WEB BASED USING ADDIE MODEL IN
ENGINEERING DEPARTMENT FOR ACM

seperti yang tercatat di muka surat tajuk dan kulit kertas projek
(as it appears on the title page and front cover of project paper)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan
dan meliputi bidang ilmu dengan memuaskan.

(that the project paper acceptable in form and content, and that a satisfactory
knowledge of the field is covered by the project paper).

Nama Penyelia Utama

(Name of Main Supervisor): **MR. ABD. HADI ABD. RAZAK**

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of Faculty of Information Technology. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to

Dean of Faculty of Information Technology

Universiti Utara Malaysia

06010 UUM Sintok

Kedah Darul Aman.

ABSTRACT

In recent years, information technology has played an important role in the business field. E-learning has gained a significant popularity and it is expected to continue in the future. E-learning is a multi-dimensional activity where each dimension should be adequately supported by an E-learning system to provide a fruitful learning experience to its users. This research introduces a (EPEN) E-Learning Process Engineering Network prototype for Asian Composites Manufacturing Sdn Bhd (ACM) by providing engineering department with the necessary information and helps them reduce and manage the time by using (ADDIE) model.

Acknowledgements

I would like to say big thanks to every one gave me a minute of his time to help me finishing my work. I hope to be as good as they want. First, I would like to thank Mr. Abd Hadi Bin Abd Razak for advice and supervision during the preparation of this project. Also all lecturers at the faculty of Information Technology, because they gave me all the information that helped me to me specially

- Assoc. Prof. Dr. Wan Rozaini bt Sheik Osman
- Assoc. Prof. Dr. Ku Ruhana Ku Mahamud
- Assoc. Prof. Dr. Nazib bin Nordin
- Dr. Faudziah Bt Ahmad
- Dr. Nor Laily Hashim
- Nassiriah Shaari
- Nooraini Yusoff
- Mohd Shamrie Sainin
- Osman B Ghazali

Furthermore I would like to thank my brothers and friend specially my Ibrahim jala and Hosam .faiq houssein hrot ,and Heba kafi , and for their kindness and support.

Above all, I would like to thank my dearest mother and father and all my family members for their encouragement and support all the period of my studying.

CHAPTER ONE: INTRODUCTION

1.1 Background	1
1.2 Problem Statement	3
1.3 Research Objectives	4
1.4 Research Scope	4
1.5 Research significance	5
1.6 Summary	5

CHAPTER TWO : LITERATURE REVIEW

2.1 Introduction	6
2.2 Definition of E-Learning	7
2.3 The Means of communication in E-Learning	7
2.4 The E-Learning class structure.....	7
2.4.1 E-Learning Synchronous and Asynchronous	8
2.4.2 Technologies used in E-Learning	8
2.5 The Concept of E-Learning.....	9
2.6 The Utlizing of E-Learning	11
2.6.1 Advantages of E-Learning.....	12
2.6.2 Disadvantages of E-Learning.....	13
2.7 Instructional Design for E-Learning.....	14
2.8 ADDIE Model	15

2.9 Database	17
2.9.1 Description E-learning System for DBMS	17
2.10 Active Server Pages (ASP)	18
2.10.1 Advantages of ASP.NET	19
2.11 Web site developing	20
2.12 Summary	21

CHAPTER 3: METHODOLOGY

3.1 Introduction	22
3.2 Research design methodology	23
3.2.1 Analysis	23
3.2.2 Design	24
3.2.3 Development	25
3.2.4 Implementation	28
3.2.5 Evaluation	29
3.2.5.1 Formative Evaluation	29
3.2.5.2 Summative Evaluation	29
3.3 Summary	30

CHAPTER 4: FINDING AND DISCUSSION

4.1 Introduction	31
4.2 Sytem Requirment	31
4.2.1 Learner Requirements	31
4.2.2 Sytem Requirments	32
4.2.3 Functional Requirements	32
4.2.4 Non-Functional Requirements	33
4.3 System Analysis And Design	34
4.3.1 Introduction	34
4.3.2 Use Case	35
4.3.3 The use case identification for all the learners	37
4.3.4 Use Case Specifcation	38
4.4 System Design	50
4.4.1 Sequence Diagram	50

4.5 Class Diagram-----	61
4.6 Testing case and guide screen-----	62
4.7 Evaluation Result-----	77
4.7.1 User Evaluation -----	78
4.8 Summary-----	79

CHAPTER 5: CONCLUSION

5.1 Conclusion of the Study -----	81
5.2 Study Contribution-----	82
5.3 Recommendation and Future Work -----	82
References-----	83
Appendix-----	87

CHAPTER ONE

INTRODUCTION

1.1 Background

In recent years, information technology has played a significant role in the business field. Today workers, immersed in a changing environment, need to rapidly adapt their knowledge. Consequently, the traditional learning systems must evolve and readapt to meet the demands of the market and be able to respond to a widespread, massive and diverse learning demand. E-learning could provide a solution to this problem.

E-learning applications achieve high standards in providing instructors to manage online courses via web technologies and database system ,E-Learning can use all the senses in the learning process, using the latest technologies video, web, phone multimedia conferencing (Flash, graphics, sound, video, etc.) working group to electronic publishing[1].

People remember 10 percent of what they read, 20 percent of what they hear, 30 percent of what they see and 50 percent of what they hear and see. Because different people have
